Corrections

In the version of this article initially published, labeling of the x-axis was missing from Fig. 4. The corrected Fig. 4 is shown below. The figure legend was correct as published and is shown below for reference.

The figure has been corrected in the online version of the article, which now differs from the print version as originally published.

![FIGURE 4. T cell–related transcript levels in the control group. Analysis of T cell–related markers show that all transcripts investigated were present in all organs examined. Transcript levels for the control group (n = 8) are displayed with mean ± SEM. Transcript levels are normalized with EF1Aβ and displayed relative to the mean of control gills.](http://www.jimmunol.org/cgi/doi/10.4049/jimmunol.1490047)
