On the cover: Confocal microscopy of the inguinal lymph node (LN) of G184S KI bone marrow–reconstituted mouse. LNs were
fixed and immunostained with directly fluorescently labeled Abs recognizing B220 (green), CD4 (blue), Ki67 (pink), CD169
(red), and CD21/35 (turquoise). The captured image is focused on one of the LN follicles and the adjacent T cell zone
