On the cover: Lymphatic endothelial cell expression of programmed death ligand 1 (PD-L1) increases after viral infection. Shown is a murine lymph node section from 5 d after s.c. vaccinia viral infection. The 7- μ m section was stained with anti-Lyve-1 (red) to visualize lymphatics and anti-PD-L1 (green) to visualize PD-L1 expression. Lucas, E. D., J. M. Finlon, M. A. Burchill, M. K. McCarthy, T. E. Morrison, T. M. Colpitts, and B. A. J. Tamburini. 2018. Type 1 IFN and PD-L1 coordinate lymphatic endothelial cell expansion and contraction during an inflammatory immune response. *J. Immunol.* 201: 1735–1747.
