THE JOURNAL
OF
IMMUNOLOGY

VOLUME XXVIII

Baltimore, Md.
1935
CONTENTS

NUMBER 1, JANUARY, 1935

Active Immunization in Monkeys against Poliomyelitis with Germicidally Inactivated Virus. Maurice Brodie ................................................. 1
Development of Precipitins for Protein, Lipoid and Carbohydrate Fractions of S and R Forms of Tubercle Bacilli. Christine E. Rice .................. 19
Hemolytic Streptococcus Toxins and Antitoxins. I. A Medium for Toxin Production. Wilbur G. Malcolm and Louise Wyman .......................... 31
Hemolytic Streptococcus Toxins and Antitoxins. II. Titration by Rabbit Intradermal and Ear Tests. Wilbur G. Malcolm and Louise Wyman ... 33
Hemolytic Streptococcus Toxins and Antitoxins. III. Toxicogenic Variation in a Hemolytic Streptococcus Strain of Scarlet Fever Origin. Wilbur G. Malcolm and Louise Wyman ........................................ 41
Susceptibility to Pneumococcus Infection as Measured by Species-Specific Agglutinins. Theodore J. Curphey ........................................ 55

NUMBER 2, FEBRUARY, 1935

Agglutinins for Sheep and Rabbit Erythrocytes in Human Sera. C. A. Stuart, Juanita Tallman and E. G. Anderson .......................... 75
Sheep and Rabbit Cell Agglutinins in Horse Serum Sickness and Infectious Mononucleosis. C. A. Stuart, Juanita Tallman and Esther Brintzenhoff .......................................................... 85
A Ring Precipitin Test for Estimating the Concentration of Antibody in Small Amounts of Immune Serum. John H. Hanks .................... 95
The Mechanism of Tuberculin Hypersensitiveness. The Rôle of the Tubercle and of the Inflammatory Reaction of the Early Tuberculous Lesion in the Production of Tuberculin Hypersensitiveness as Determined by Inducing the “Tuberculin Type” of Hypersensitiveness with Egg White or Horse serum. John H. Hanks ......................................................... 105
Quantitative Measurements of the Absorption of Agglutinins by Bacteria. Leo Olitzki ................................................................. 123
CONTENTS

NUMBER 3, MARCH, 1935

Some Observations on the Relative Importance of the Reticulo-Endothelial Tissues and Circulating Antibody in Immunity. II. Hypersensitiveness and Immunity to Foreign Proteins. An Analysis of the Parts Played by the Tissues and Circulating Antibody in These Two States. F. H. Teale ................................................................. 161

The Antigenic Action of the Phosphatides. Further Studies of Purified Cephalin. Augustus Wadsworth, Elizabeth Maltaner and Frank Maltaner ................................................................. 183

The Photodynamic Effect of Methylene Blue on Tetanus Toxin. Karl M. Lippert ............................................................... 193

A Note on the Concentration and Purification of Antimeningococcus Serum. Philip P. Murdick and Sophia M. Cohen ................................................................. 205

Merthiolate Versus Phenol as a Preservative for Diphtheria Toxoids—Diluted and Undiluted at Icebox and Room Temperatures. Olga R. Povitzky and Minnie Eisner .......................................... 209

The Effect of Temperature on the Antigenic Value of Diphtheria Toxoid. Olga R. Povitzky, Assisted by Minnie Eisner ................................................................. 215

A Quantitative Study of Serum Precipitin in Anaphylaxis in the Rabbit. Carol Jackson ........................................................ 225

NUMBER 4, APRIL, 1935

Some Observations on the Question of the Various Manifestations of Antibody Activity Being Due to Separate Antibodies or an Immune Substance Acting Differently under Various Conditions. F. H. Teale ............ 241

The Rôle of the Precipitin Antibody in the Removal of Intravenously Injected Antigen. James T. Culbertson ................................................................. 279

An Immunological Study of the Effects of Intense Sound Vibrations on Egg Albumin. Earl W. Flosdorf and Leslie A. Chambers ................................................................. 297

An Ultramicro Technic for Precipitation and Agglutination Reactions. Charles L. Hudson and Stuart Mudd ................................................................. 311

The Flaring up of Infection Sites in Allergic Guinea Pigs. L. Dienes and F. A. Simon ................................................................. 321

NUMBER 5, MAY, 1935

Factors Influencing the Speed of Flocculation. K. Ando and T. Komiyama ................................................................. 331

Diphtheria Toxin Produced on Semi-synthetic Medium. K. Ando and T. Komiyama ................................................................. 345

The Rôle of Convalescent Serum in Preparalytic Poliomyelitis. Maurice Brodie ................................................................. 353

The Individual as a Factor in Antidiphtheria Immunity. II. Titers of Individual Guinea Pigs at Times Remote from the Last Injection of Antigen. John Y. Sugg, Lurline V. Richardson and James M. Neill ........... 385
CONTENTS

Incidence of Serological Types of Hemolytic Streptococci in Recent Cases of Erysipelas. Extent of Protection of Antierysipelas Serum against These Erysipelas Strains as Tested on White Mice. Sophie Spicer, Mary F. Gonshorek and Emily L. Spicer............................. 399

NUMBER 6, JUNE, 1935

The Adaptation of a Staphylococcus Bacteriophage to an Artificially Produced Anti-bacteriophage Serum. F. d'Herelle and M. L. Rakieten.... 413

The Chemical Composition of the Active Principle of Tuberculin. XIX. Differences in the Antigenic Properties of Various Tuberculin Fractions; Adsorption to Aluminium Hydroxide and Charcoal. Florence B. Seibert............................................................... 425

The Desiccation of Sera and Other Biological Products (Including Microorganisms) in the Frozen State with the Preservation of the Original Qualities of Products, so Treated. William J. Elser, Ruth A. Thomas and Gustav I. Steffen................................................ 433

Oral Immunization to Colds. George E. Rockwell and Herman C. van Kirk and H. M. Powell..................................................... 475

The Relation of Heterophile Immunity to the Incidence of Colds. George E. Rockwell and Herman C. van Kirk.............................. 485

Index................................................................. 489
