CONTENTS

NUMBER 1, JANUARY, 1936

A Study of the Pneumococcus Toxins. Arthur F. Coca .................... 1
Two Antigens of High Molecular Weight: Hemocyanins of Limulus polyphemus and Fulger caniculatus. Sanford B. Hooker and William C. Boyd . 33
The Existence of Antigenic Determinants of Diverse Specificity in a Single Protein. III. Further Notes on Crystalline Hen- and Duck-ovalbumins. Sanford B. Hooker and William C. Boyd . 41
Relation of the Adrenal Glands to Immunological Processes. Effect of Cortico-adrenal Extract of Hemolysin Production in Normal Adult Laboratory Animals. Charles A. Fox and R. W. Whitehead . 51
On Differentiation in the Suipestifer Group and on Resistance to Phage. Philip Levine and Arthur W. Frisch . 63
Specificity of the Multiplication of Bacteriophage. Arthur W. Frisch and Philip Levine . 89

NUMBER 2, FEBRUARY, 1936

A Serological Comparison of the Phosphoprotein of the Serum of the Laying Hen and the Vitellin of the Egg Yolk. R. R. Roepke and L. D. Bushnell . 109
Studies on Tetanus Toxoid. I. The Antitoxic Titer of Human Subjects Following Immunization with Tetanus Toxoid and Tetanus Alum Precipitated Toxoid. F. G. Jones and J. M. Moss . 115
Comparisons of Various Methods for the Routine Titration of Types I and II Antipneumococcic Horse Serums. L. A. Barnes, Charlotte M. Clarke and Eleanor C. Wight . 127
The Development of Foreign Protein Sensitization in Human Beings. John R. Mote and T. Duckett Jones . 149
The Mass Factor in Immunological Studies upon Viruses. Malcolm H. Merrill . 169
Quantitative Studies on the Neutralization of Equine Encephalomyelitis Virus by Immune Serum. I. Combination of Virus and Antibody in Vitro. Malcolm H. Merrill . 185
Quantitative Studies on the Neutralization of Equine Encephalomyelitis Virus by Immune Serum. II. The “Percentage Law.” Malcolm H. Merrill . 193
A Study of the Virulence of Meningococcus Strains and of the Protective Activity of Antimeningococcus Sera. Sophia M. Cohen . 203
CONTENTS

NUMBER 3, MARCH, 1936

Blood Grouping and Poliomyelitis. Th. Madsen, E. T. Engle, Claus Jensen, and Ib Freuchen ..................................................... 213
A Study of Inactivated Yellow Fever Virus as an Immunizing Agent. John E. Gordon and Thomas P. Hughes ................ : ................... 221
Toxic Substances in Urine and Sweat of Typhoid Fever Patients as Demonstrated by the Shwartzman Phenomenon. Nik Stolyhwo .............. 235
The Effect of Heterologous Bacterial Products upon Tuberculous Animals. Jules Freund .......................................................... 241
Observations on Abnormal Isoantibodies Following Transfusions. Erwin Neter ................................................................ 255
The Plasma Lipids in Purpura Produced with Antiplatelet Serum. L. M. Tocantins and A. Cantarow ........................................... 261
Carbohydrate-Containing Proteins of the Hemolytic Streptococcus. Michael Heidelberger and Forrest E. Kendall .................................. 267

NUMBER 4, APRIL, 1936

Observations on Poison Ivy Hypersensitivity in Guinea Pigs. Frank A. Simon ................................................................ 275
On the Agglutinogens M and N of the Ainu. Tadao Kubo ................... 287
Antigenic Properties of Brain Tumors. Arthur Weil and Erich Liebert ... 291
Antileucocytic Serum. W. B. Chew, D. J. Stephens and John S. Lawrence. 301
Further Observations on the Nature of the Active Substance ("Anaphylatoxin") in Canine Anaphylactic Shock. Carl A. Dragstedt and Franklin B. Mead .............................................................. 319
Variation in the Susceptibility of Guinea Pigs to Reversed Passive Anaphylaxis. Hans Zinsser and John F. Enders ...................... 327
The Non-identity of the Antigenic and Antitoxic Groups in Diphtheria Antitoxin. Harry Eagle ..................................................... 339

NUMBER 5, MAY, 1936

The Flocculation Reaction with Purified Diphtheria Toxin. Monroe D. Eaton ................................................................. 361
Proceedings of the American Association of Immunologists. Twenty-third Annual Meeting ....................................................... 373

NUMBER 6, JUNE, 1936

The Nature of a Virucidal Substance in "Normal" Human Serum as Compared with the Trypanocidal and Bactericidal Substances. Paul S. Strong ........................................................................ 403
Studies on the Activity of Cephalin as it Relates to the Coagulative and Complementary Properties of the Blood. Augustus Wadsworth, Frank Maltaner and Elizabeth Maltaner .................................................. 417

The Significance of Age of Rabbits for the Elicitation of the Shwartzman Phenomenon. Ernst Witebsky and Erwin Neter ....................... 471

General and Cerebral Anaphylaxis in the Monkey (Macacus rhesus). Nicholas Kopeloff, Leo M. Davidoff and Lenore M. Kopeloff .................. 477
An Announcement to Authors and Prospective Authors

The Editors of the Journal of Immunology are, for the present, able to assure prompt publication of all papers that are promptly submitted.

An unusual—indeed all but unprecedented—situation of this sort demands special notification to prospective authors, in order that they may take advantage of it.

The situation is not likely to be long continued; the editors suggest therefore that manuscripts be sent forthwith. They should be mailed to

Dr. Arthur F. Coca
Pearl River, N. Y.
