NEW AND FORTHCOMING BOOKS

This List Compiled JUNE 21, 1937

PUBLISHED SINCE MARCH 1, 1937

THE MECHANICS OF PROSPERITY by Dr. Hobart C. Dickinson
Cloth, $2.00

THE BASIS OF CLINICAL NEUROLOGY by Dr. Samuel Brock
Cloth, viii + 360 pages. 72 Illustrations. Index. $4.75

THE ENDOCRINES IN OBSTETRICS AND GYNECOLOGY by Dr. Raphael Kurzrok
Cloth, 6 x 9, xvi + 488 pages. Illustrated. $7.50

SAFE CHILDBIRTH by Katharine Vaughan
Cloth, 6$1/2 x 9$, xvi + 150 pages. 49 Illustrations. Bibliography. Index. $3.00

THE AVITAMINOSES by Drs. Walter Eddy and Gilbert Dall Dorf
Cloth, 6 x 9, viii + 367 pages. $4.50

COLLOID SYMPOSIUM 1936, edited by Dr. Harry B. Weiser
Cloth, $4.50

ELECTROCARDIOGRAPHY (2nd Edition) by Dr. C. C. Maher
Cloth, 7 x 10, xvi + 254 pages. Index. Illustrated. $4.00

FORTHCOMING

HERMAPHRODITISM, GENITAL ABNORMALITIES AND RELATED ADRENAL DISEASES, by Dr. Hugh Hampton Young, to be published about July 28, probable price $10.00

THE CHEMISTRY OF THE BILE by Harry Sobotka, to be published about July 15, probable price $3.00

PRACTICAL NEUROANATOMY by J. H. Globus, to be published about July 15, probable price $6.00

ELECTRIC HOT AIR STERILIZER
WITH AUTOMATIC TEMPERATURE REGULATION

ELECTRIC HOT AIR STERILIZER, A. H. T. Co. Specification. With automatic temperature regulation. Constructed of heavy asbestos board with Monel metal frame and cast metal legs and support. The gross inside dimensions are 11 inches high × 18 inches wide × 10 inches deep, with net working space of 9 inches high × 17 inches wide × 8 1/2 inches deep, i.e. sufficient for the sterilization of pipettes as ordinarily used in bacteriological work. Two shelves are provided, with four shelf supports each 2 inches apart. The highest of these supports is 3 inches below the inside top of the sterilizer.

Ventilating holes are provided under the heaters in the bottom of the sterilizer, also in the top of the sterilizer, the latter with rotating shutters that permit adjustment of their size.

Temperature regulation is by means of a special control mechanism conveniently located at the upper right-hand side of the sterilizer. It is operated by means of a knurled-edge wheel with arrows indicating direction of motion required for either raising or lowering the temperature level.

For operation up to 180°C. Heating units are wound for a total capacity of 1500 watts and the sterilizer must, therefore, be connected directly to a line of this capacity.

1624-A. Electric Hot Air Sterilizer, A. H. T. Co. Specification, as above described, complete with thermometer reading to 200°C, two shelves, cord and plug for connection, and detailed operating directions. For 110 volts, a. c. 50.00

1624-B. Ditto, but for 110 volts, d. c. 52.25

Details of tests, showing temperature distribution, uniformity, etc., are sent upon request.
