CONTENTS

NUMBER 1, JULY, 1938

Second Attacks of Experimental Poliomyelitis in Macacus rhesus Monkeys. John A. Toomey ...................................................... 1

Experiments with Staphylococcal Enterotoxin. C. E. Dolman and R. J. Wilson................................................................ 13

Immunization of the Respiratory Tract. A Comparative Study of the Antibody Content of the Respiratory and Other Tissues Following Active, Passive and Regional Immunization. Theodore E. Walsh and Paul R. Cannon ............................................................... 31

Response in the Horse to Mexican Typhus Infection. M. Ruiz Castaneda and J. Vargas-Curiel .................................................. 47

Phospholipids and Cholesterol in Plasma of Immunized Horses. Augustus Wadsworth and L. W. Hyman .............................. 55

Analysis of the Alcohol-Ether Extract of Horse Serum. L. W. Hyman .......................................................... 71

NUMBER 2, AUGUST, 1938

The Incidence of Agglutinins for the Para-dysentery Bacilli in Serums from Human Beings and from Animals. H. J. Sears, Lillian Schwichtenberg, and Marian Schwichtenberg .................................................. 83

Quantitative Studies of the Reaction of Complement Fixation with Tuberculous Immune Serum and Antigen. Augustus Wadsworth, Frank Maltaner, and Elizabeth Maltaner ...................................................... 93

Quantitative Studies of the Reaction of Complement Fixation with Syphilitic Serum and Tissue Extract. Augustus Wadsworth, Frank Maltaner, and Elizabeth Maltaner .......................................................... 105

On a Rapid Method for the Standardization of Antimeningococcal Horse Serum Type I. Paul A. Little ..................................................... 117

Further Observations on the Toxigenic Properties of Hemolytic Streptococci. Julia M. Coffey .......................................................... 121

Studies of Staphylococcal Toxin. The Toxin-red-cell Reaction. B. S. Levine .......................................................... 131

A Study of Strains of Pneumococci Immunologically Closely Related to Both Type XI and Type XVI Pneumococci. Maxwell Finland and John W. Brown .......................................................... 141

NUMBER 3, SEPTEMBER, 1938

Studies on the Mechanism of the Action of Sulfanilamide. III. The Effect of Sulfanilamide in Serum and Blood on Hemolytic Streptococci in Vitro. John S. Lockwood ..................................................... 155
The Specific Protective Property of Serum from Rats Infected with Cysticercus Crassicollis. Dan H. Campbell .................................... 195
The Specific Absorbability of Protective Antibodies Against Cysticercus Crassicollis in Rats and C. Pisiformis in Rabbits from Infected and Artificially Immunized Animals. Dan H. Campbell .................... 205
Quantitative Studies of the Complement-Fixation Reaction with Syphilitic Serum and Tissue Extract: Technic of the Practical Quantitative Test. Augustus Wadsworth, Frank Maltaner, and Elizabeth Maltaner....... 217

NUMBER 4, OCTOBER, 1938
The Absorption of Pneumococcal Antibody after Intramuscular Injection of Antipneumococcal Horse and Rabbit Serums. Maxwell Finland and John W. Brown ....................................................... 245
The Spread of Tubercle Bacilli in the Bodies of Sensitized and Immunized Animals. Jules Freund and D. Murray Angevine ...................... 271
A Simplified Photomicroreflectometric Technic for the Titration of the Antibody-Potency of Antipneumococcal Horse and Rabbit Serum. Raymond L. Libby ........................................................ 289
Ablastic and Trypanocidal Antibodies Against Trypanosoma duttoni. William H. Taliaferro .................................................... 303

NUMBER 5, NOVEMBER, 1938
Concentration of Tetanic Antitoxin by Adsorption. D. von Klobusitzky .. 329
The Antigenic Structure of Shigella Alkalescens (Andrewes) and the Demonstration of Antibodies in the Serum of Patients with Shigella Alkalescens Infections. Erwin Neter .............................................. 339
Photodynamic Action of Methylene Blue on Antipneumococcal Serum. Victor Ross ........................................................... 351
Photodynamic Action of Methylene Blue on Diphtheric Antitoxin. Victor Ross ........................................................... 371
The Character of Dissociative Changes in Escherichia Coli Affecting Immunizing Values. John C. Torrey ......................................... 379
Antigenic Qualities of Antitoxins. A. J. Weil, I. A. Parfentjev and K. L. Bowman .............................................................. 399

NUMBER 6, DECEMBER, 1938
Studies of Antimeningococcal Serum. II. The Complement-fixing Activity of Sera from Horses under Immunization with Suspensions of Living Cells or with Broth Culture Filtrate of the Meningococcus. Grace M. Sickles and Christine E. Rice ............................... 427
Some Factors which Affect the Ultrafiltration of Antipneumococcal Sera. Kenneth Goodner, Frank L. Horsfall, jr., and Johannes H. Bauer...... 439
