CONTENTS

NUMBER 1, MAY, 1947

The Appearance of Sheep Cell Lysins and Human A Cell Agglutinins in a Rabbit Immunized with a Partially Purified Blood Group A-Specific Substance from Hog Gastric Mucin. David H. Brown, Edward L. Bennett and Carl Niemann............. 1

Bacterial Warfare, A Critical Analysis of the Available Agents, Their Possible Military Applications, and the Means for Protection against Them. Theodor Rosebury and Elvin A. Kabat, with the assistance of Martin H. Boldt...................... 7

NUMBER 2, JUNE, 1947

The Neutralization of Western Equine Encephalomyelitis Virus by Human Convalescent Serum. The Influence of Heat Labile Substances in Serum on the Neutralization Index. Loring Whitman................................. 97

Studies on the Immunization of Swine against Infection with the Swine Influenza Virus. I. Resistance Following Subcutaneous Administration of Formolized Purified Influenza Virus. I. W. McLean, Jr., Dorothy Beard, and J. W. Beard........ 109

Mechanism Responsible for Lowered Resistance of Hypophysectomized Rats to T. Levisi. Norman Molomut................................................................. 139

Factors Influencing the Production of Tetanal Toxin. J. Howard Mueller and Pauline A. Miller................................................................. 143

The Purification and Concentration of Influenza-Virus by Means of Alcohol Precipitation. Herald R. Cox, James van der Scheer, Stewart Aiston and Emil Bohnel......... 149

Factors Influencing the Red Cell Agglutination-Inhibitive Reaction in Influenza and Their Application to the Diagnostic Test. Loring Whitman.................... 167

The Effect of Temperature and of Serum on the Detoxification of Staphylococcal Toxin by Interfacial Adsorption. J. M. Johlin.............................................. 179

NUMBER 3, JULY, 1947

The Action of Urea and Some of Its Derivatives on Bacteria. VI. The Antibacterial Activity of Propyl and Isopropyl Carbamate, Alone and in Combination with Sulfonamides, and the Effect of these Drugs on Para-aminobenzoic Acid. Louis Weinstein................................................................. 195

The Action of Urea and Some of Its Derivatives on Bacteria. VII. The Antibacterial Activity of Butyl and Isobutyl Carbamate, Alone and in Combination with Sulfonamides, and the Effect of these Drugs on Para-aminobenzoic Acid. Louis Weinstein......................................................... 203

Age and Lung-Histamine. E. R. Trethewie.................................................. 211

Studies on Tularemia. I. The Comparative Susceptibility of Various Laboratory Animals. Cora M. Downs, Lewis L. Coriell, Gifford B. Pinchot, Edward Maumenee, Alice Klauber, S. S. Chapman, and Barbara Owen........ 217

Studies on Tularemia. II. Immunization of White Rats. Cora M. Downs, Lewis L. Coriell, Henry T. Eigelsbach, Karl F. Plitt, Gifford B. Pinchot and Barbara J. Owen................................................................. 229

Studies on Tularemia. III. Immunization of Mice. Lewis L. Coriell, Cora M. Downs, and Mary P. Clapp............................................................... 245

Chemical Detoxification of Flexner Dysentery Antigen. I. Survey of Results. Frederick W. Barnes, Marguerite Dewey, Sarah S. Henry, and Hope Lupfer........ 255

Studies on the Growth of Murine Encephalomyelitis Viruses in Fertile Eggs. John T. Riordan and M. José Sá-Fleitas................................................. 263

Cutaneous Reactions with the Virus of Herpes Simplex. Harry M. Rose and Eleanora Molloy ................................................................. 287

Resistance Induced by Vaccinia Virus to Pertussis Infection in Mice. Gilbert Dall-dorf, Sophia M. Cohen, and Julia M. Coffey ............................. 295

The Effect of Tubercle Bacilli on the Antigenicity of a Synthetic Ester of Oleic Acid. Gardner Middlebrook and René J. Dubos ............................. 301

In Vitro Effect of Penicillin on Toxins of Clostridium welchii, Type A. S. Stanley Schneierson ................................................................. 307

Susceptibility and Immunity in Poliomyelitis. A Study of Age Incidence and Epidemiology as Related to Virgin Soil Outbreaks, Early Poliomyelitis, Geographic Distribution, and Institutional Outbreaks. Norman Nelson .......................... 311

Immunization with Clostridium septicum Toxoid and with Trivalent Gas Gangrene Toxoid. Alan W. Bernheimer ........................................ 317

Antigenicity of Gas Gangrene Toxoids in Guinea Pigs, Mice, and Human Beings. Mark H. Adams ................................................................. 323

Complement-Fixation Test for Diagnosis of Human Viral Encephalitides. J. Casals ................................................................. 337

Studies of the Complement-Fixation Reaction in Virus Systems. II. Activities of Influenza Virus Antigens and Antisera. Christine E. Rice ........................ 343

Persistence of Antigen at the Site of Inoculation of Vaccine Emulsified in Oil. Miriam Herdegen, Seymour P. Halbert and Stuart Mudd ............................. 357

Diagnostic Antigens for Epidemic Typhus, Murine Typhus and Rocky Mountain Spotted Fever. James van der Scheer, Emil Bohnel and Herald R. Cox .......................... 365

A Quantitative Study of Passive Anaphylaxis in the Guinea Pig. III. Elvin A. Kabat, Grange S. Coffin and David J. Smith ........................................ 377

The Inactivation of Equine Encephalitis Virus by Mechanical Agitation. Lt. William F. McLimans, H-(S), USNR ........................................ 385
