59 (2)

J Immunol 1948; 59:109-220; ;
http://www.jimmunol.org/content/59/2.citation

This information is current as of October 28, 2017.

Why The JI?

- **Rapid Reviews! 30 days**\(^*\) from submission to initial decision
- **No Triage!** Every submission reviewed by practicing scientists
- **Speedy Publication!** 4 weeks from acceptance to publication

\(^*\)average

Subscription

*The Journal of Immunology* is published twice each month by
The American Association of Immunologists, Inc.,
1451 Rockville Pike, Suite 650, Rockville, MD 20852
All rights reserved.
Print ISSN: 0022-1767 Online ISSN: 1550-6606.
CONTENTS

NUMBER 1, MAY, 1948

The Predisposition for Immunity. E. Carlinanti .................................. 1

Lymphocytopenia in Rabbits Following Intravenous Injection of Influenzal Virus. Susanna Harris and Werner Henle ............................................... 9

A Note on Enzyme-Purified Antitoxin and Anaphylaxis in Guinea Pigs. P. Agerholm Christensen and J. E. Kerrich ................................................... 21

An Improved Benzene Extracted Complement Fixing Antigen Applied to the Diagnosis of the Arthropod-Borne Virus Encephalitides. Carlos EspaSa and W. McD. Hammon ......... 31

Studies on the Toxicity of Influenzal Viruses. III. Immunization of Mice against the Toxic Activity of Influenzal Viruses. A New Potency Test for the Assay of Vaccines of Influenzal Virus. Werner Henle and Gertrude Henle ...................... 45

Studies on the Interference Phenomenon with Certain Members of the Psittacosis-lymphogranuloma Group of Viruses. Orville J. Golub and John C. Wagner ........ 59

A Single-Dilution Method for the Estimation of LD₉₀ Titors of the Psittacosis-LGV Group of Viruses in Chick Embryos. Orville J. Golub........................ 71

Statistical Analysis of Factors Affecting the Susceptibility of Chick Embryos to Eastern Equine Encephalomyelitis Virus. John F. Crawley, D.V.M ................... 83

Some Factors Influencing the Selection of a Complement-Fixation Method. I. A Comparison of Two Quantitative Techniques, and an Alternative Method of Expressing Serum-Dilution Titer. Christine E. Rice .................................... 95

NUMBER 2, JUNE, 1948

The Long Persistence of Rickettsia orientalis in the Blood and Tissues of Infected Animals. John P. Fox, M.D .................................................... 109

Characterization of the “Enzymic” Action of Influenza Viruses on Human Red Cells. B. A. Briody .................................................................... 115

Tolerance to the Toxic Action of Somatic Antigens of Enteric Bacteria. Herbert R. Morgan ........................................................................ 129

The Inactivation of Influenza Virus by Mercurials and the Reactivation by Sodium Thioglycolate and BAL. Morton Klein, J. H. Brewer, J. E. Perez and Beatrice Day .......................................................... 135

The Zone of Activity of Antibodies as Determined by the use of Radioactive Tracers; the Zone of Activity of Nephritoxic Antikidney Serum. David Pressman and Geoffrey Keighley .......................................................... 141

An Epidemic of Influenza A Due to an Atypical Strain. The Relationship of this Strain to other Influenza Viruses. Seymour S. Kalter, Orren D. Chapman, Doris A. Feeley and Shirley L. MacDowell .......................................................... 147

The Incidence of Neutralizing Antibodies for Type A and Type B Influenza Virus in Normal Infants and Children. Alfred S. Lazarus and Robert E. Westfall ......... 159

Production of Anti-Haemophilus Influenzae Type b Rabbit Serum. F. D. Eaton, E. G. Gerwe and G. F. Leonard .......................................................... 165

An Analysis of Rabbit Mortality and Plasma Potency in Production of Anti-Haemophilus influenzae Type b Rabbit Serum. A. W. Tallman, F. D. Eaton and E. G. Gerwe .......................................................... 169

Destructive Action of Mouse and Rat Tumor Extracts on Red Blood Cells in vitro. Ludwik Gross ................................................................... 173

The Serial Passage of Hodgkin’s Disease Tissue Extract in Chicken Eggs. Warren L. Bostick .......................................................... 189
Preparation of Diphtheria Toxin Solution Requiring no Control in the Shick Test. Victor Ross................................................................. 207

NUMBER 3, JULY, 1948
The Biological Assay of Diphtherial Toxoid. Louis Greenberg and Marion Roblin...... 221
The Antigen-Antibody Reaction with Type A Botulinal Toxin. Carl Lamanna and Beatrice W. Doak................................. 231
The Application of the Falling Drop Technic to the Quantitative Determination of Precipitin. Murray M. Lipton........................................ 249
The Application of the Falling Drop Technic. The Quantitative Determination of Pneumococcal Polysaccharide. Murray M. Lipton................. 263
Activity of Hexenolactone against Salmonella Enteritidis in Mice. James W. Bartholomew and Charles W. Johnson .................................................... 269
Antibacterial Activity of Hexenolactone in vitro. James W. Bartholomew and Francis L. Hervey.............................................................. 273
The Prolonged Viability of Sporozoites of Plasmodium gallinaceum in Extracts of Washed Chicken Erythrocytes. Loring Whitman.................. 285
In Vitro Action of Various Chemical Agents on Trichomonas hominis, Trichomonas vaginalis and Trichomonas foetus. Etta Mae Macdonald and A. L. Tatum.................................................. 301
The Differentiation of Species of Trichomonads by Immunological Methods. Etta Mae Macdonald and A. L. Tatum.................................................. 309
Neutralization Tests with Eastern Equine Encephalomyelitis Virus in the Chick Embryo: A Statistical Treatment of the Results by the Probit Method. John F. Crawley.......................................................... 319

NUMBER 4, AUGUST, 1948
The Action of Urea and Some of Its Derivatives on Bacteria. VIII. The Antibacterial Activity of Hexyl Carbamate, Alone and in Combination with Sulfonamides, and Its Effect on Para-Aminobenzoic Acid. Louis Weinstein........................................ 331
Donovania granulomatis: Cultivation, Antigen Preparation, and Immunological Tests. Anna Dean Dulaney, Koda Guo and Henry Packer............................... 335
Immunological Studies of Cholera Filtrates. E. Singer; S. H. Wei and S. H. Hoa.... 341
Inhibitory Effects of Certain Avian and Mammalian Antisera in Specific Complement-Fixation Systems. Christine E. Rice........................................ 365
Therapy of Experimental Brucella Infection in the Developing Chick Embryo. I. Infection and Therapy via the Allantoic Sac. Wendell H. Hall and Wesley W. Spink............. 379
Therapy of Experimental Brucella Infection in the Developing Chick Embryo. II. Infection and Therapy via the Yolk Sac. James M. Shaffer and Wesley W. Spink.............................................. 393
Index...................................................................................... 405
