

INDEX TO VOLUME VI

Acute respiratory diseases, 1919-1920, Report on the prophylactic vaccination of 1536 persons against.....	103
— respiratory infection, Microbial study on, with especial consideration of immunological types.....	1
— respiratory infections, Studies on.....	5, 301, 343, 329
Adrenal deficiency, Complementing activity of the blood serum with relation to.....	355
Agar plates, standard blood (Smith and Brown alpha type), Relationship to upper respiratory infections of streptococci producing a green zone on.....	53
Agglutination of the red blood corpuscles, The influence of temperature upon the.....	445
Agglutinative and hemolytic action of calf serum on sheep cells, Observations on the.....	271
Agglutinins are lipoidal in nature, A note on the claim that.....	201
Anderson, Lillian M., and Hooker, Sanford B. The specific antigenic properties of the four groups of human erythrocytes.....	419
Antibody, Chemical nature of.....	185
— from sensitized antigens, The recovery of.....	123
— response to multiple antigens, Polyvalent.....	235
Antibody studies.....	117, 123, 185
Antibodies and the isolated protein bodies, The relation between the absorption of.....	205
—, On the essential identity of the.....	289
Antigen-antibody reaction, Reversal of the.....	117
Antigenic properties, The specific of the four groups of human erythrocytes.....	419
Antigens, multiple, Polyvalent antibody response to.....	235
—, sensitized, The recovery of antibody from.....	123
Anti-hog cholera serum, The value of tissue extracts of virus pigs in the production of.....	263
Anti-organ sera, Specificity of.....	223
Arnstein, Natalie, and Fleisher, Moyer S. Specificity of anti-organ sera....	223
Bacillus of Pfeiffer, A serological study of the.....	87
Bacterial culture products, The action of, on phagocytosis.....	399
Baughman, William H., Coca, Arthur F., and Russell, Ernest F. The reaction of the rat to diphtheria toxin. With observations on the technic of the Roemer method of testing diphtheria toxin and antitoxin.....	387
Blanc, Ninette E., Cooper, Georgia M., and Mishulow, Lucy. II. A study of the serological relationships of pneumococci from the upper respiratory tract with special reference to common colds and influenzal conditions.....	25

Blood agar plates, standard (Smith and Brown alpha type), Relationship to upper respiratory infections of streptococci producing a green zone on.	53
— corpuscles, red, The influence of temperature upon the agglutination of the.....	445
— grouping, human, Medicolegal application of.....	363
— qualities, Hereditary.....	363
— serum, Complementing activity of the, with relation to adrenal deficiency.	355
Brain tissue, The action of leucocytes and, on diphtheria and tetanus toxins.	413
Burnett, Theo. C., and Schmidt, Carl L. A. Immunological experiments with catalase.....	255
Calf serum; Observations on the agglutinative and hemolytic action of, on sheep cells.....	271
Catalase, Immunological experiments with.....	255
Chemical nature of antibody.....	185
Coca, Arthur F., and Kelley, Margaret F. VI. A serological study of the bacillus of Pfeiffer.....	87
—, Russell, Ernest F., and Baughman, William H. The reaction of the rat to diphtheria toxin. With observations on the technic of the Roemer method of testing diphtheria toxin and antitoxin.....	387
Common colds and influenzal conditions, A study of the serological relationships of pneumococci from the upper respiratory tract with special reference to.....	25
“Common colds,” “health,” and “influenza;” Methods of demonstrating microorganisms, including “filterable viruses,” from upper respiratory tract in, with the object of discovering “common strains”.....	5
— strains,” Methods of demonstrating microorganisms, including “filterable viruses,” from upper respiratory tract in “health,” in “common colds” and in “influenza” with the object of discovering.....	5
Complementing activity of the blood serum with relation to adrenal deficiency.....	355
Conglutination phenomenon, Observations upon the.....	349
Cooper, Georgia M., Mishulow, Lucy, and Blanc, Ninette E. II. A study of the serological relationships of pneumococci from the upper respiratory tract with special reference to common colds and influenzal conditions.	25
—, and Park, William H. V. Accidental inoculation of influenza bacilli on the mucous membranes of healthy persons with development of infection in at least one. Persistence of type characteristics of the bacilli.....	81
Corpuscles, red blood, The influence of temperature upon the agglutination of the.....	445
Craig, S. H., and Huntoon, F. M. Polyvalent antibody response to multiple antigens.....	235
Cultural and serological relationship of hemolytic streptococci isolated from inflammatory conditions of the respiratory tract, A study of the.....	301
Deibert, Olin. A test-tube rack for serological work.....	249
Denatured and insoluble proteins, Immunological experiments with.....	281

Denny, Helen T., and Povitzky, Olga R. IV. Further studies on grouping of influenza bacilli with special reference to permanence of type in the carrier.....	65
Diphtheria and tetanus toxins, The action of leucocytes and brain tissue on.....	413
— toxin and antitoxin, Observations on the technic of the Roemer method of testing.....	387
— toxin, The reaction of the rat to.....	387
Ecker, Enrique E., and Rogoff, J. M. Complementing activity of the blood serum with relation to adrenal deficiency.....	355
Erythrocytes, human, The specific antigenic properties of the four groups of.....	419
Etris, S., and Huntoon, F. M. Antibody studies. II. The recovery of antibody from sensitized antigens: Technic.....	123
“Filterable viruses,” from upper respiratory tract in “health,” in “common colds” and in “influenza” with the object of discovering “common strains,” Methods of demonstrating microorganisms, including.....	5
Fleisher, Moyer S., and Arnstein, Natalie. Specificity of anti-organ sera..	223
Goldman, Agnes, Williams, Anna W., Unneberg, Aarlaus, and Hussey, Helena. III. Relationship to upper respiratory infections of streptococci producing a green zone on standard blood agar plates (Smith and Brown alpha type).....	53
Gurley, Caroline R., Williams, Anna W., and Nevin, Mary. Studies on acute respiratory infections. I. Methods of demonstrating microorganisms, including “filterable viruses,” from upper respiratory tract in “health,” in “common colds” and in “influenza” with the object of discovering “common strains”.....	5
Hannum, E., Huntoon, F. M. and Masucci, P. Antibody studies. III. Chemical nature of antibody.....	185
Haslam, Thomas P. The value of tissue extracts of virus pigs in the production of anti-hog cholera serum.....	263
“Health,” “common colds” and “influenza,” Methods of demonstrating microorganisms, including “filterable viruses,” from upper respiratory tract in, with the object of discovering “common strains”.....	5
Hemolytic action of calf serum on sheep cells, Observations on agglutinative and.....	271
— action of streptococci, Differences in the character of the, and the relative value of various methods in demonstrating these differences.....	329
— streptococci isolated from inflammatory conditions of the respiratory tract, A study of the cultural and serological relationship of.....	301
Hereditary blood qualities.....	363
Hooker, Sanford B., and Anderson, Lillian M. The specific antigenic properties of the four groups of human erythrocytes.....	419
Hoppe, E. N., and Wadsworth, Augustus B. The action of bacterial culture products on phagocytosis.....	399

Human blood grouping, Medicolegal application of.....	363
— erythrocytes, The specific antigenic properties of the four groups of....	419
Huntoon, F. M. Antibody studies. I. Reversal of the antigen-antibody reaction.....	117
—, F. M., Masucci, P., and Hannum, E. Antibody studies. III. Chemical nature of antibody.....	185
—, F. M., and Craig, S. H. Polyvalent antibody response to multiple antigens.....	235
—, F. M., and Etris, S. Antibody studies. II. The recovery of antibody from sensitized antigens: Technic.....	123
Hussey, Helena, Williams, Anna W., Unneberg, Aarlaug, and Goldman, Agnes. III. Relationship to upper respiratory infections of streptococci producing a green zone on standard blood agar plates (Smith and Brown alpha type).....	53
Identity of the antibodies, On the essential.....	289
Immunological experiments with catalase.....	255
— experiments with denatured and insoluble proteins.....	281
— types, Microbal studies on acute respiratory infection with especial consideration of.....	1
Influenza bacilli, Accidental inoculation of, on the mucous membranes of healthy persons with development of infection in at least one. Persistence of type characteristics of the bacilli.....	81
— bacilli, Further studies on grouping of, with special reference to permanence of type in the carrier.....	65
“Influenza,” “health,” and “common colds,” Methods of demonstrating microorganisms, including “filterable viruses” from upper respiratory tract in, with the object of discovering “common strains”.....	5
Influenzal conditions, A study of the serological relationship of pneumococci from the upper respiratory tract with special reference to common colds and.....	25
Inoculation, Accidental, of influenza bacilli on the mucous membranes of healthy persons with development of infection in at least one. Persistence of type characteristics of the bacilli.....	81
Insoluble proteins, Immunological experiments with denatured and.....	281
Jervell, Fredrik. The influence of temperature upon the agglutination of the red blood corpuscles.....	445
Johnston, Elizabeth, and Maltaner, Frank. Observations on the agglutinative and hemolytic action of calf serum on sheep cells.....	271
— Elizabeth, and Maltaner, Frank. Observations upon the conglutination phenomenon.....	349
Kelley, Margaret F., and Coca, Arthur F. VI. A serological study of the bacillus of Pfeiffer.....	87
Krumwiede, Charles, Park, William H., and Williams, Anna W. Microbal studies on acute respiratory infection with especial consideration of immunological types.....	1

- Krumwiede, Charles, and Noble, W. Carey. A note on the claim that agglutinins are lipoidal in nature..... 201
- , Charles, and Valentine, Eugenia. Studies on acute respiratory infections. X. The nature and value of a so-called precipitin reaction as applied to the serological grouping of streptococci..... 343
- Leucocytes and brain tissue, The action of, on diphtheria and tetanus toxins. 413
- Maltaner, Frank, and Johnston, Elizabeth. Observations on the agglutinative and hemolytic action of calf serum on sheep cells..... 271
- , Frank, and Johnston, Elizabeth. Observations upon the conglutination phenomenon..... 349
- Masucci, P., Huntoon, F. M., and Hannum, E. Antibody studies. III. Chemical nature of antibody..... 185
- Medicolegal application of human blood grouping..... 363
- Microbial studies on acute respiratory infection with especial consideration of immunological types..... 1
- Microorganisms, Methods of demonstrating, including "filterable viruses," from upper respiratory tract in "health," in "common colds" and in "influenza" with the object of discovering "common strains"..... 5
- Mishulow, Lucy. Studies on acute respiratory infections. IX. Differences in the character of the hemolytic action of streptococci and the relative value of various methods in demonstrating these differences.. 329
- , Lucy, and Valentine, Eugenia. Studies on acute respiratory infections. VIII. A study of the cultural and serological relationship of hemolytic streptococci isolated from inflammatory conditions of the respiratory tract..... 301
- , Lucy, Cooper, Georgia M., and Blanc, Ninette E. II. A study of the serological relationships of pneumococci from the upper respiratory tract with special reference to common colds and influenzal conditions..... 25
- Mucous membranes of healthy persons, Accidental inoculation of influenza bacilli on the, with development of infection in at least one. Persistence of type characteristics of the bacilli..... 81
- Multiple antigens, Polyvalent antibody response to..... 235
- Nature of antibody, Chemical..... 185
- Nevin, Mary, Williams, Anna W., and Gurley, Caroline R. Studies on acute respiratory infections. I. Methods of demonstrating microorganisms, including "filterable viruses," from upper respiratory tract in "health," in "common colds" and in "influenza," with the object of discovering "common strains"..... 5
- Noble, W. Carey, and Krumwiede, Charles. A note on the claim that agglutinins are lipoidal in nature..... 201
- Ottenberg, Reuben. Hereditary blood qualities. Medicolegal application of human blood grouping..... 363

Park, William H., and Cooper, Georgia. V. Accidental inoculation of influenza bacilli on the mucous membranes of healthy persons with development of infection in at least one. Persistence of type characteristics of the bacilli.....	81
—, William H., Williams, Anna W., and Krumwiede, Charles. Microbial studies on acute respiratory infection with especial consideration of immunological types.....	1
—, William H., and von Sholly, Anna I. VII. Report on the prophylactic vaccination of 1513 persons against acute respiratory disease, 1919-1920.	103
Phagocytosis, The action of bacterial culture products on.....	399
Pigs, virus, The value of tissue extracts of, in the production of anti-hog cholera serum.....	263
Pneumococci from the upper respiratory tract, A study of the serological relationship of, with special reference to common colds and influenzal conditions.....	25
Polyvalent antibody response to multiple antigens.....	235
Povitzky, Olga R., and Denny, Helen T. IV. Further studies on grouping of influenza bacilli with special reference to permanence of type in the carrier.....	65
Precipitin reaction, The nature and value of a so-called, as applied to the serological grouping of streptococci.....	343
Prophylactic vaccination of 1536 persons against acute respiratory diseases, 1919-1920, Report on the.....	103
Protein bodies, isolated, The relation between the absorption of antibodies and the.....	205
Proteins, denatured and insoluble, Immunological experiments with.....	281
Rack, A test-tube, for serological work.....	249
Rat, The reaction of the, to diphtheria toxin.....	387
Reaction, Reversal of the antigen-antibody.....	117
Recovery of antibody from sensitized antigens.....	123
Red blood corpuscles, The influence of temperature upon the agglutination of the.....	445
Respiratory diseases, acute, Report on the prophylactic vaccination of 1536 persons against.....	103
— infection, acute. Microbial studies on, with especial consideration of immunological types.....	1
— infections, acute, Studies on.....	5, 301, 329, 343
— infections, upper, Relationship to, of streptococci producing a green zone on standard blood agar plates (Smith and Brown alpha type).....	53
— tract, A study of the cultural and serological relationship of hemolytic streptococci isolated from inflammatory conditions of the.....	301
— tract, upper, A study of the serological relationships of pneumococci from the, with special reference to common colds and influenzal conditions.....	25
— tract, upper, in "health," in "common colds" and in "influenza," Methods of demonstrating "filterable viruses" from, with the object of discovering "common strains".....	5

Roemer method of testing diphtheria toxin and antitoxin, Observations on the technic of.....	387
Rogoff, J. M., and Ecker, Enrique E. Complementing activity of the blood serum with relation to adrenal deficiency.....	355
Russell, Ernest F., Coca, Arthur F., and Baughman, William H. The reaction of the rat to diphtheria toxin. With observations on the technic of the Roemer method of testing diphtheria toxin and antitoxin.....	387
Schmidt, Carl L. A. Immunological experiments with denatured and insoluble proteins.....	281
—, Carl L. A., and Burnett, Theo. C. Immunological experiments with catalase.....	255
Sensitized antigens, The recovery of antibody from.....	123
Sera, anti-organ, Specificity of.....	223
Serological grouping of streptococci, The nature and value of a so-called precipitin reaction as applied to the.....	343
— relationships of pneumococci from the upper respiratory tract, A study of the, with special reference to common colds and influenzal conditions.	25
— study of the bacillus of Pfeiffer, A.....	87
—, work, A test-tube for.....	249
Serum, anti-hog cholera, The value of tissue extracts of virus pigs in the production of.....	263
—, blood, Complementing activity of the, with relation to adrenal deficiency.....	355
— calf, Observation on the agglutinative and hemolytic action of, on sheep cells.....	271
Sheep cells. Observations on the agglutinative and hemolytic action of calf serum on.....	271
Streptococci, Differences in the character of the hemolytic action of, and the relative value of various methods in demonstrating these differences....	329
—, hemolytic, isolated from inflammatory conditions of the respiratory tract, A study of the cultural and serological relationship of.....	301
— producing a green zone on standard blood agar plates (Smith and Brown alpha type), Relationship to upper respiratory infections of.....	53
—, serological grouping of, The nature and value of a so-called precipitin reaction as applied to the.....	343
Temperature, The influence of, upon the agglutination of the red blood corpuscles.....	445
Test-tube rack for serological work, A.....	249
Tetanus toxins, The action of leucocytes and brain tissue on diphtheria and.	413
Tissue extracts, The value of, of virus pigs in the production of anti-hog cholera serum.....	263
Toxin, diphtheria, The reaction of the rat to.....	387
Toxins, diphtheria and tetanus, The action of leucocytes and brain tissue on.	413
Umemura, Rokuro. The relation between the absorption of antibodies and the isolated protein bodies.....	205

- Unneberg, Aarlaug, Williams, Anna W., Goldman, Agnes, and Hussey, Helena. III. Relationship to upper respiratory infections of streptococci producing a green zone on standard blood agar plates (Smith and Brown alpha type)..... 53
- Upper respiratory infections, Relationship to, of streptococci producing a green zone on standard blood agar plates (Smith and Brown alpha types). 53
- respiratory tract, A study of the serological relationships of penumococci from the, with special reference to common colds and influenzal conditions..... 25
- respiratory tract in "health," in "common colds" and in "influenza," Methods of demonstrating microorganisms, including "filterable viruses" from, with the object of discovering "common strains"..... 5
