CONTENTS

NUMBER 1, SEPTEMBER, 1948

Studies on the Coagulase-reacting Factor. II. Properties of Coagulase-Reacting Factor, and Relation to Blood Clotting Components. Morris Tager and Harriet B. Hales................................................................. 1

Some Factors Influencing the Selection of a Complement-Fixation Method. II. Parallel Use of the Direct and Indirect Techniques. Christine E. Rice................................................. 11

Study of Fixed Rabies Virus Propagated in the Brain of Guinea Pig Fetus. Chen-Chen Jen and Samuel H. Zia................................................................. 17

The Relation of Antagonistic Coliform Organisms to Shigella Infections. I. Survey Observations. Seymour P. Halbert................................................................. 23

Quantitative Assay of Neutralizing Antibody Content of Pools of Gamma Globulin from Different Sections of the United States Against the Viruses of Herpes Simplex, Lymphocytic Choriomeningitis and Epidemic Keratoconjunctivitis. James T. Heyl, Henry F. Allen, and F. S. Cheever................................. 37

The "Inhibition" of Isoagglutinin Activity by Human Plasma and Its Fractions. F. Homburger and Marshall Melin................................................................. 47

Serologic Studies on Antigens from Histoplasma capsulatum Darling. S. B. Salvin and G. A. Hottle................................................................. 57

The Complement Fixation Test in Yellow Fever Epidemiology. II. The Development and Loss of Complement-Fixing Antibodies in Marmosets (Callithrix penicillata, C. jacchus and Leontocebus chrysomelas). A. Perlowagora and T. P. Hughes........... 67

Ultraviolet Absorption Spectroscopy of Immune Precipitates. Herman N. Eisen................................................................. 77

The Determination of the Optimal Haemolysin Level for Use in the Complement-Fixation Test. James W. Fisher................................................................. 85

Antigenic Relationships Between M, S, and R Phases of Streptococci and Their Diphteroid Descendants. Ralph R. Mellon................................................................. 91

A Skin-Test Antigen Common to Five Viruses of the Psittacosis-Lymphogranuloma Group. Lawrence Kilham................................................................. 157

Hemophilus Pertussis Soluble Antigen and Complement Fixing Antibodies. I. A. Parfentjev and M. E. Virion................................................................. 167

The Position of the Wakefield Bacilli (Berger). A. J. Weil and H. Slafkovsky........... 173

Studies in Dysentery Vaccination. V. Immunization of Mice with Vaccine of Shigella sonnei Administered by Gavage. Merlin L. Cooper and Helen M. Keller........... 177

NUMBER 2, OCTOBER, 1948

Cholera Immunization. E. Singer, S. H. Wei and S. H. Hoa................................................................. 181

Studies in Dysentery Vaccination. IV. Primary Vaccination of Children with Monovalent Vaccines of Shigella. Merlin L. Cooper, Jack Tepper and Helen M. Keller........... 189

Quantitative Studies of Complement Fixation. II. Fixation of Complement in the Reaction Between Type III Pneumococcus Specific Polysaccharide and Homologous Antibody. Abraham G. Osler, Manfred M. Mayer and Michael Heidelberger................................................................. 205

The Effect of Certain Enzyme Inhibitors on the Activity and Growth of Psittacosis Virus. Thomas E. Burney and Orville J. Golub................................................................. 213

The Serologic Relationships Between Five Cultured Strains of Supposed T. pallidum (Noguchi, Kro6, Nichols, Reiter and Karan) and Two Strains of Mouth Treponemata. Harry Eagle and Frederick G. Germuth, Jr................................................................. 223

The Effect of Roentgen Irradiation on Antibody Formation in Rabbits. Charles G. Craddock, Jr., and John S. Lawrence................................................................. 241
Immunochemical Studies on Tobacco Mosaic Virus. V. The Serological Relationship to the Aucuba and J14DI Strains. Saul Malkiel ................................ 255
The Inhibition of the Anti-Trypanosomal Activity of Arsenoso Compounds and Acrinones by Esters and Amides of Organic Acids. W. L. Schleyer and R. J. Schnitzer.. 265
Anaphylaxis in the Fish. N. B. Dreyer and J. W. King ............................. 277
The Use of Synthetic Medium as an in vitro Test of Possible Chemotherapeutic Agents against Gram-Negative Bacteria. Doris McKenzie, Marilyn Stadler, Jane Boothe, J. J. Oleson and Y. SubbaRow ......................................... 283
Comparison of Mouse-Protective Tests and Chick-Protective Tests of over 600 Chemicals against Pasteurella multocida. Paul Little, G. DeMello, J. Tanzola and Y. SubbaRow ............................................................................................. 295
The Mouse-Protective Test as a Means of Determining the Inhibitory Effect of Chemicals on Vibrio cholera. Paul Little and Y. SubbaRow .......................... 299

NUMBER 3, NOVEMBER, 1948
Studies in Cellular Growth. II. Effect of Antisplenic-Tissue-Serum (ASTS) on Large Experimentally Induced Wounds in Guinea Pigs. Maxwell Maltz, David M. Spain and Norman Molomut. .......................................................... 313
Quantitative Studies of Complement-Fixation. III. Homologous and Cross-Reactions in Pneumococcal Type III and Type VIII Systems. Abraham G. Osler and Michael Heidelberger .......................................................... 317
Prolonged Protection of Guinea Pigs Against Histamine by Means of Pellets of Pyribenzamine in Beeswax Implanted Subcutaneously. Aaron Kellner, James W. Correll, Anthony T. Ladd, and Ellsworth C. Alvord, Jr. .......................................................... 339
The Effect of Pyribenzamine in Beeswax on Experimental Meningoencephalomyelitis in the Guinea Pig. Ellsworth C. Alvord, Jr., James W. Correll, Anthony T. Ladd, and Aaron Kellner .......................................................... 345
The Reversal in vivo by Bal of Inactivation of Influenza A Virus and Diplococcus pneumoniae by Bichloride of Mercury. Morton Klein and J. E. Perez .......................... 349
The Relation of Antagonistic Coliform Organisms to Shigella Infections. II. Observations in Acute Infections. Seymour P. Halbert .......................................................... 359
An Attempt to Produce Streptococcal Agglutinins in vitro. L. B. Fastier .......................... 395
Therapy of Experimental Brucella Infection in the Developing Chick Embryo. III. The Synergistic Action of Streptomycin and Sulfadiazine. James M. Shaffer and Wesley W. Spink .......................................................... 405
Studies in Cellular Growth. III. Effect of Antigranulation-Tissue-Serum on Wound Healing in Mice. Maxwell Maltz .......................................................... 411
Neurotoxic Symptoms Produced in the Syrian Hamster (Oriettus auratus) by Diphtherial Toxin. L. Olitzki, L. A. Stuczynski and N. Grossowitz .......................... 419
Preparation of a Serological Antigen and a Vaccine for Experimental Tsutsugamushi Disease (Scrub Typhus). Charles A. Bailey, Fred H. Diercks and James E. Proffitt. .......................................................... 431

NUMBER 4, DECEMBER, 1948
Studies on Infection with Brucella abortus Variants. Werner Braun and Steinar Hauge. 443
Infection of Guinea Pigs with Massive Doses of Rickettsiae of Epidemic and Murine Typhus. F. Perez Gallardo and John P. Fox .......................... 455
A Study of Shigella Isolated in India and Burma, with Special Reference to Two Previously Undescribed Sero-Types. C. D. Cox and G. I. Wallace

The Experimental Production of Antibodies to Staphylocoagulase. Morris Tager and Harriet B. Hales

The Effect of Incubation at 37°C on the Neutralization Test with Various Encephalitis Viruses Including Lansing Strains of Poliomyelitis Virus. Peter K. Olitsky and J. Casals

The Effect of Streptothricin on Systemic Infection with Cryptococcus neoformans in Mice. Morris Solotorovsky and Elizabeth J. Bugie

Further Studies on Oncolysis and Tumor Immunity in Rats. Margaret Reed Lewis, Helen Dean King, Paul M. Aptekman and Florence B. Seibert

Antigenic Studies of a Sucrose-Fermenting Bacterium. P. R. Edwards, Alice B. Moran and D. W. Bruner

Studies on Chick Embryo Adapted Rabies Virus. I. Culture Characteristics and Pathogenicity. Hilary Koprowski and Herald R. Cox

On the Individual Specificity of Human Serum. Henry P. Goldberg and Paul F. deGara

Salmonella atlanta, a New Member of the Salmonella G Group. Ivan Saphra and Erich Seligmann

Purification, pH Stability and Culture of the Mumps Virus. M. L. Weil, Dorothy Beard, D. G. Sharp and J. W. Beard

Antibody Response in Monkeys Following Oral Administration of Poliomyelitis Virus. Herdis von Magnus and Joseph L. Melnick

Blood Groups and Subgroups of the Newborn. II. The B Factor of the Newborn. Lillian M. Engasser and Ernest Witebsky
