INDEX

Acriflavine fastness of trypanosomes, comparison of two different antagonists as inhibitors of, 95
Adams, M. H. and Lark, G. Mutation to heat resistance in coliphage T5, 335
Adjuvants, formation of complement fixing and neutralizing antibodies after injection of inactivated rabies virus with, 297
Agglutination, colloidion particle, with acute-phase serums and immune globulin in viral hepatitis, 349
Allantoic fluid proteins of, from chick embryos infected with influenza virus, amino acids present in, 499
Allen, F. H. See Wagley, Sizer, Diamond and Allen, 85
Amino acids present in allantoic fluid proteins from chick embryos infected with influenza virus, 499
Analysis of immunological heterogeneity of human gamma globulin fractions, 381
Antibodies to H. pertussis, occurrence in human plasma fraction, 39
—to M protein and relation of acquired immunity in rabbits to infection with Group A Type 30 hemolytic streptococcus, 245
—, zone of localization, 273, 281, 487
Antibody-antigen complex, effect of papain on, 197
—, binding sites in mouse kidney, attempt to saturate, 273
—, circulating, effect of splenectomy on the formation of, 289
—, formation in chickens, effect of splenectomy on, 179
—, production by lymphatic tissue, biological and technical factors in demonstration of, 45
—, relation of nutritional deficiency in man to, 397
Antigen responsible for renal localization of anti-kidney serum, some properties of, 487
Antigenic composition of Cryptococcus neoformans, 423
Antigenicity, assessment of, in diphtheria, 373
Anti-kidney serum, some properties of antigen responsible for renal localization of, 487
Anti-mouse-kidney serum, rate of localization of, 281
Antisera, specific for enzymes that decompose carbohydrates of Pneumococcus Types III and VII, production of, 21
Arthus phenomenon induced passively in the guinea pig, 1
Bailly, M. D. Acquired immunity in rabbits to infection with Group A Type 30 hemolytic streptococcus: its relation to antibodies to the M protein, 245
Baich, H. H. Relation of nutritional deficiency in man to antibody production, 397
Bartonella-like organism in embryonate eggs injected with H. muris, 455
Benacerraf, B. and Kabat, E. A. A quantitative study of the arthus phenomenon induced passively in the guinea pig, 1
Berry, B. See Bozeman, Tripp and Berry 65
Bick, M. W. and Wood, R. M. Heparin and ocular hypersensitivity, 357
Biological and technical factors in demonstration of antibody production by lymphatic tissue, 45
Biophysical studies of blood plasma proteins. Immunological analysis of human gamma globulin fractions, 381
Black, J. See Koprowski and Black, 185
Blood plasma proteins, biophysical studies of, 381
Booster effect of pneumococcus capsular polysaccharide, 421
Bourke, A. R. See Robbins, Bourke and Smith, 431
Bozeman, V., Tripp, J. T. and Berry, B. A modified Habel-Sockrider ultraviolet irradiation apparatus for use in serum and vaccine production, 65
Braun, W. See Cole and Braun, 111
Brucella abortus, studies on chemical nature of normal plasma factor which suppresses variation of, 111
Brunner, K. T. and Meyer, K. F. Immunization of hamsters and dogs against experimental leptospirosis, 365
Carbohydrate-splitting enzymes of Pneu-
mococcus, production in media to which specific substrate was not added, 27
Carbohydrates of Pneumococcus Types III and VII, production of specific antisera for enzymes that decompose, 21
Carlinfanti, E. Quantitative studies on diphtheria prophylactic and some consideration on the assessment of antigenicity, 373
Carpenter, P. L. and Stuart, C. A. Relationships of Proshigella to other members of the Enterobacteriaceae, 237
Chemical nature of normal plasma factor which suppresses variation of Brucella abortus, 111
Chemicals, effect of, on Rickettsia typhi infections in chick embryos, 431
Chick-embryo adapted rabies virus. Pathogenicity for dogs and use of egg-adapted strains for vaccination purposes, 185
Chicken, precipitin production in, 179
Cohn, M., Deutsch, H. F. and Wetter, L. R. Biophysical studies of blood plasma proteins. Analysis of immunological heterogeneity of human gamma globulin fractions, 381
Cole, L. J. and Braun, W. Studies on the chemical nature of a normal plasma factor which suppresses variation of Brucella abortus, 111
Coliphage T5, mutation to heat resistance in, 335
Collodion particle agglutination with acute-phase serums and immune globulin in viral hepatitis, 349
Colorado tick fever, 257, 265
Complement fixation with Newcastle disease virus, 323
— — and neutralizing antibodies, formation after the injection of inactivated rabies virus with adjuvants, 297
Coxackie virus, infection of cynomolgus monkeys with the Ohio type of, 101
Cryptococcus neoformans, antigenic composition of, 423
Dermacentor andersoni, isolation of Colorado tick fever virus from, 257
— variabilis, isolation of Colorado tick fever virus from, 265
Deutsch, H. F. See Cohn, Deutsch and Wetter, 381
Diamond, L. K. See Wagley, Sizer, Diamond and Allen, 85
Diphtheria prophylactic, quantitative studies on, 373
Eichman, H. L. See Havens and Eichman, 349
Eisen, H. N. See Pressman and Eisen, 273
— See Pressman, Eisen and Fitzgerald, 281
— and Pressman, D. Zone of localization of antibodies VIII. Some properties of antigen responsible for renal localization of anti-kidney serum, 487
Encephalomyelitis virus of mouse, Theiler’s GDVII, in tissue cultures, factors affecting propagation of, 447
Enterobacteriaceae, relationships of Proshigella to other members of, 237
Enzymes, Pneumococcus carbohydrate-splitting, production in media to which specific substrate was not added, 27
— that decompose carbohydrates of Pneumococcus Types III and VIII, production of specific antisera for, 21
Evans, A. S. Serological studies on infectious mononucleosis and viral hepatitis with human erythrocytes modified by different strains of Newcastle disease virus, 411
Evans, E. E. The antigenic composition of Cryptococcus neoformans. A serologic classification by means of the capsular and agglutination reactions, 423
Fitzgerald, P. J. See Pressman, Eisen and Fitzgerald, 281
Flocculation and rabbit skin test method, estimation of potency of scarlatinal antitoxin by, 57
Florio, L., Miller, M. S. and Mugrace, E. R. Colorado tick fever. Isolation of the virus from Dermacentor andersoni in nature and a laboratory study of the transmission of the virus in the tick, 257
Foter, M. J. See Murray, Ludwig and Foter, 421
Freund, J. See Lipton and Freund, 297
Gamma globulin fractions, analysis of immunological heterogeneity, 381
Goodman, M. See Wolfe, Norton, Springer, Goodman and Herrick, 179
INDEX

Greiff, D. See Laskowski, Pinkerton and Greiff, 455
