CONTENTS

NUMBER 1, JULY, 1950

The Effect of Adrenocorticotropic Hormone on Circulating Antibody Levels. Joan A. de Vries........................................................... 1
A Nomographic Probit Solution for the Median Effective Dose (ED_{50}). Walter Koch and Deborah Kaplan........................................ 7
A Quantitative Complement Fixation Test: Titration of Luetic Sera by the Unit of 50 Per Cent Hemolysis. George J. Stein and Dang Van Ngu............... 17
The Action of Enzymes in Hemagglutinating Systems. II. Agglutinating Properties of Trypsin-Modified Red Cells with Anti-Rh-Sera. Warren E. Wheeler, A. Leonard Lushby and Mary Louise L. Scholl.............................................. 39
Tuberculostatic Activity of Blood and Urine From Animals Given Gliotoxin. Ralph Tompsett, Walsh McDermott and John G. Kidd................................................................. 59
A General Method for the Specific Purification of Antiprotein Antibodies. L. A. Sternberger and David Pressman.................................................... 65
The Hypotensive Action of Influenza Virus on Rats. Hsioh-Teh Chang and J. Emerson Kemp............................................................... 75
Anti (Streptococcal Desoxyribonuclease. Occurrence in the Sera of Patients Treated with Streptococcal Concentrates Containing Streptodornase. George N. Hazlehurst. 85
Quantitative Studies of the Relationship Between Fecal and Serum Antibody. Marion Elliott Koehland and William Burrows........................................ 93
Serological Relationships Existing Between Bacterial Parasites and Their Hosts. I. Antibodies in Human Blood Serum for Native Intestinal Bacteria. Hazel B. Gillespie, Madje Stacy Steber, Elizabeth Netto Scott and Yvonne Serett Christ................. 105
Serological Relationships Existing Between Bacterial Parasites and Their Hosts. II. The Agglutination of Intestinal Bacteria by Blood Serum from Human Beings and Animals not Known to Carry the Strains Tested. Hazel B. Gillespie, Madje Stacy Steber and M. Harriet Waugh .................................................. 115
Cytochemical Studies on the Intranuclear Inclusion of Herpes Simplex. Helen B. Crouse, L. L. Coriell, H. Blank and T. F. McNair Scott.......................... 119
The Effect of Terramycin on the PRS Strain of Influenza A Virus in Chick Embryos and Mice. J. W. Vinson and F. Tracey Walsh........................................ 129
Studies on the Protective Effect of Gamma Globulin Against Herpes Simplex Infections in Mice. F. S. Cheever and George Daikos.......................................... 135

NUMBER 2, AUGUST, 1950

Combined Active-Passive Re-Immunization against Tetanus in Previously Immunized Individuals: Experimental and Clinical Evidence. John J. Miller, Jr. and Mary Louise Ryan............................................................. 143
The Antigenic Relationships of Certain Viruses Capable of Producing Encephalitis in Mice. As Shown by Complement Fixation Tests. T. P. Hughes and Alina Perlowagora.......................................................... 155
The Antigenic Relationships of Native Antigens of Species of Brucella. Sidney J. Silverman and Sanford S. Elberg................................................................. 163
A New Method for the Large-Scale Production of High-Titre Botulinum Formol-Toxoid Types C and D. M. Sterne and L. M. Wentzel................................. 175
The Action of Aureomycin and Other Chemotherapeutic Agents in Experimental Brucellosis. Abraham I. Braude and Wesley W. Spink........................................ 185
The Interchangeability of the Complement Components of Different Animal Species. II. In the Hemolysis of Sheep Erythrocytes Sensitized with Rabbit Ambroceptor. Christine E. Rice and C. N. Crowson........................................ 201

iii
CONTENTS

Q Fever in California. II. Recovery of Coxiella burnetii from Naturally Infected Air-Borne Dust. Paul D. DeLay, Edwin H. Lennette and Kenneth B. DeOme........... 211

Differences in Toxicity of the S- and R-Variants of Shigella dysenteriae. Choe Tahl........ 221

A Comparison of Influenza Complement Fixation Antigens Derived from Allantoic Fluids and Membranes. Maria Wiener Kirker and Werner Henle............. 229

Evaluation of the Agglutination of Erythrocytes Sensitized by Newcastle Disease Virus (NDV) as a Serologic Test in Infectious Mononucleosis. Lawrence Kilham.................. 245

A Comparison of Physicochemical Measurements of Hyaluronidase and of Neutralizing Antibodies Thereto. T. N. Harris and Susanna Harris......................................... 255

The Egg-White Inhibitor of Influenza Virus Hemagglutination. III. Stability in Relation to the Preparation of a Standard of Activity. Frank Lanni, Yvonne Théry Lanni and J. W. Beard.............................................................................. 269

Hemagglutinating Substances for Human Cells in Various Egyptian Plants. William C. Boyd ................................................................. 281

The Electron Microscopy of Fowl Pox Virus within the Chorioallantoic Membrane. Councilman Morgan and Ralph W. G. Wyckoff.............................................. 285

NUMBER 3, SEPTEMBER, 1950
Comparative Immunizing Capacity of BCG and the Proteins and Polysaccharides in Tubercle Bacillus Culture Filtrates. Florence B. Seibert......................... 297

Immunological Studies of Three Antitoxin Containing Globulin Fractions of the Horse. B. V. Jager, Emil L. Smith, Harry Bernhisl and Louise A. Jager.............. 311

Studies on Haemagglutination with the GDVII Strain of Murine Encephalomyelitis. L. B. Fastier.............................................................................. 323

An Agglutination-Inhibition Test Proposed as a Standard of Reference in Influenza Diagnostic Studies. Committee on Standard Serological Procedures in Influenza Studies................................................................. 347

NUMBER 4, OCTOBER, 1950

Complement Fixation and Weil-Felix Reaction in Rabbits Inoculated with Bartonella bacilliformis. J. D. Reese, M. E. Morrison and E. M. Fowler...................... 355

Cellular Changes in Rabbits during Antibody Formation. II. Multiple Antigen Injections. Crichton McNeil................................................................. 359

Neutralization and Hemagglutination Inhibition of Swine Influenza Virus by Serum from Suckling Swine and by Milk from their Dams. George A. Young, Jr. and Norman R. Underdahl......................................................... 369

The Separation of a Protective Antigen from a Toxin-Producing Strain of Hemophilus pertussis. Kenneth C. Robbins and Louis Pillemer................................. 393

The Antigenicity of Shigella sonnei. Sara E. Branham and Sadie A. Carlin.......... 407

Comparison of Seven Antibiotics against Hemophilus pertussis Infection in Chick Embryos. George Gee Jackson, Mildred W. Barnes and Maxwell Finland............... 419

Immunology and Preservation of the Norm. Thomas Francis, Jr...................... 437
CONTENTS

NUMBER 5, NOVEMBER, 1950

The Occurrence of Salmonella Factor I in Different Types of Bacteria as Shown by a Serologically Cosmopolitan Paracolon Bacterium. Rolf Saxholm ................................................................. 443
Studies on Commercial Typhus Vaccines. II. The Antigenic Fractions of Disrupted Epidemic Typhus Rickettsiae. Leslie A. Chambers, Seymour S. Cohen and Jean R. Clawson ........................................................................................... 459
Studies on Commercial Typhus Vaccines. III. The Concentration and Isolation of the Rickettsia-Specific Soluble Antigen of Commercial Typhus Vaccine. Seymour S. Cohen, Leslie A. Chambers and Jean R. Clawson ............................................................................................. 465
Studies on Commercial Typhus Vaccines. IV. The Chemical Composition of Commercial Typhus Vaccine. Seymour S. Cohen ........................................................................................................ 475
Purification of the Bovine γ-Globulin Factor Which Suppresses Variation in Brucella abortus. Leonard J. Cole ................................................................................................................................. 485
The Effect of Pteroylglutamic Acid on Some Immune Responses of Chicks. P. A. Little, J. J. Oleson and P. K. Roesch ................................................................. 491
The Interchangeability of the Complement Components of Different Species. II. In Conglutination. Christine E. Rice .................................................................................................................... 499
The Suppressive Effect of Antimicrobial Drugs on Brucella melitensis Infection in Mice Charles A. Werner and Vernon Knight ................................................................. 509
The Formation of Circulating Antibody in the Splenectomized Human Being Following Intravenous Injection of Heterologous Erythrocytes. Donald Adams Rowley ................................................................. 515
114 as an Antigen Label in the Circulating Serum of Non-Immune Rabbits. William C. Knox and Frances C. Endicott .................................................................................................................... 523
The Zone of Localization of Antibodies. IX. The Properties of Anti-Rat-Lung Serum. Herman N. Eisen, Beila Sherman and David Pressman .................................................................................................................... 543
The Zone of Localization of Antibodies. X. The Use of Radioactive Sulfur 35 as a Label for Anti-Kidney Serum. David Pressman, Herman N. Eisen, Malcolm Siegel, Patrick J. Fitzgerald, Beila Sherman and Arthur Silverstein .................................................................................................................... 559
Study of Infectivity and Hemagglutination of Influenza Virus in Deembryonated Eggs. Hans Bernkopf ................................................................................................................................. 571
The Sedimentable Components of Influenza Virus Propagated in Deembryonated Eggs. Martin Hanig and Hans Bernkopf .................................................................................................................... 585
The Immunocchemistry of Toxins and Toxoids. VII. Further Studies on the Solubility of Diphtherial Toxoid in Methanol-Water Mixtures of Controlled pH, Ionic Strength and Temperature. Louis Pillemer, Judith Bentoff, Eleanor Brown and Irwin H. Lepow .................................................................................................................... 591
The Immunocchemistry of Toxins and Toxoids. VIII. Further Studies on the Solubility of Tetanal Toxoid in Methanol-Water Mixtures of Controlled pH, Ionic Strength and Temperature. Louis Pillemer and Judith Bentoff .................................................................................................................... 599

NUMBER 6, DECEMBER, 1950

Quantitative Studies on the Serologic Relationships of Fungi. S. B. Salvin ................................................................................................................................. 617
Studies on the Hemagglutinin of *Hemophilus pertussis*. Elizabeth H. Thiele............. 627
Antibody Production in the Rabbit’s Cornea. Richard Thompson and Howard Olson... 633
Treatment with Chloramphenicol, Aureomycin, and Terramycin of the Pneumonia of
Mice Caused by Feline Pneumonitis Virus. Yale Kneeland, Jr. and Katherine
Mills Price................................................................. 653
Quantitative Studies of Complement-Fixation. V. Estimation of Complement-Fixing
Potency of Immune Sera and Its Relation to Antibody-Nitrogen Content. Alwilda
L. Wallace, Abraham G. Osler and Manfred M. Mayer................................. 661
*In Vivo* Antibiotic Production by *Escherichia coli*. Seymour P. Halbert and Lois S.
Swick................................................................. 675
The Enhancement of Anaphylaxis in Albino Mice with the Aid of Adjuvants. Albert
H. Wheeler, Ella M. Brandon and Helene Petrenco........................................ 687
Recovery of Two Distinct Haemagglutinins of Vacciinia Virus. Anne L. Gillen, Muriel
M. Burr and F. P. Nagler.......................................................... 701
Agglutinin Nitrogen in Staphylococcus Antisera. M. Jeanne Kahnke............... 707
Study of an American Negro Family with the Rare Rh Genotype rPr (CdE/cde). Som-
sak Phansomboon and Otakar J. Pollak........................................... 711
Index.......................................................... 715
