The Journal of Immunology is published twice each month by  
The American Association of Immunologists, Inc.,  
1451 Rockville Pike, Suite 650, Rockville, MD 20852  
All rights reserved.  
Print ISSN: 0022-1767 Online ISSN: 1550-6606.
CONTENTS

NUMBER 1, JULY, 1951

Studies on the Immunization of Guinea Pigs and Mice to Brucella Infection by Means of the "Native Antigen." S. Elberg, M. Herzberg, P. Schneider, S. J. Silverman and K. F. Meyer .............................................................. 1

The Zone of Localization of Antibodies. XI. The in vivo Purification of Kidney-Localizing Anti-Kidney Antibody. David Pressman and Beila Sherman .............. 15

The Zone of Localization of Antibodies. XII. Immunological Specificities and Cross Reactions in the Vascular Beds of Liver, Kidney and Lung. David Pressman and Beila Sherman ................................................................. 21

Heterologous Strain Immunity in Experimental Syphilis. Harold J. Magnuson and Frederick A. Thompson, Jr ...................................................... 35

Relationship between Treponemal Immobilizing Antibodies and Acquired Immunity in Experimental Syphilis. Harold J. Magnuson, Frederick A. Thompson, Jr. and Charlotte P. McLeod ........................................................... 41

Serological Group II of the Proteolytic Clostridia. James W. Manda ................................. 49

The Effect of Antilymphocytic Serum on Circulating Antibody Levels. M. F. A. Woodruff, Bruce Forman and K. B. Fraser ............................ 57

Surface Phagocytosis in vivo. Mary Ruth Smith, William D. Perry, John W. Berry and W. Barry Wood, Jr ............................................................. 71

Purification and Concentration of Mouse Encephalomyelitis Virus by Hemagglutination. O. Lahelle and Thomas G. Ward .......................................... 75

Alternate Passage of Influenza Virus. A Comparison of the Effects of Serial Passage and Alternate Passage of Type B Influenza Virus in Hamsters. Fred M. Davenport 83

NUMBER 2, AUGUST, 1951

Studies on the Specific Soluble Protein of Pasteurella pestis and Allied Organisms. I. Isolation, Fractionation and certain Physical, Chemical and Serological Properties. S. C. Seal ...................................................................... 93

The Antigenic Composition of Cryptococcus neoformans. E. Edward Evans and John F. Kessel ......................................................................... 109

Factors Influencing the Agglutination Titration in Human Brucellosis. Richard J. Feinberg and George G. Wright ...................................................... 115

Metabolic Studies of Rickettsiae. I. The Effects of Antimicrobial Substances and Enzyme Inhibitors on the Oxidation of Glutamate by Purified Rickettsiae. Charles L. Wisseman, Jr., Elizabeth B. Jackson, Fred E. Hahn, Anita C. Ley and Joseph E. Smadel ............................................................... 123

Effect of BCG Vaccination and Chemotherapy on Experimental Tuberculosis in Mice. Charles O. Siebenmann ........................................................ 137

The Size of Coxsackie Viruses and Lansing Poliomyelitis Virus Determined by Sedimentation and Ultrafiltration. Joseph L. Melnick, Morris Rhian, Joel Warren and Sydney S. Breese, Jr .......................................................... 151

A Portable Freeze-Drying Apparatus Employing Either Mechanical or Dry Ice Refrigeration. Joel Warren, Heinz Kugler and Herman M. Hall ............... 163

What is Immunology? Geoffrey Edsall ................................. 167

NUMBER 3, SEPTEMBER, 1951

Experimental Streptococcal Pneumonia. I. The Pathologic and Bacteriologic Features of the Untreated Disease. Louis Weinstein, Charles G. Colburn, Raymond Seltser, G. Kenneth Mallory and Geo. W. Waring, Jr ................................................ 173
Experimental Streptococcal Pneumonia. II. The Effect of Penicillin Therapy on the Pathologic and Bacteriologic Features. Louis Weinstein, Charles G. Colburn, Raymond Seltser and G. Kenneth Mallory .......................................... 183

Experimental Streptococcal Pneumonia. III. The Anatomical Lesions Produced by the Injection of Dead Streptococci into the Lung. Louis Weinstein, Charles G. Colburn, Raymond Seltser and G. Kenneth Mallory ...................................... 189

Antigenicity of Sarcomata Undergoing Atrophy in Rats. Margaret Reed Lewis and Paul Myron Aptekman ......................................................... 193

Studies on Herpes Simplex Virus. II. A Soluble Antigen of Herpes Virus Possessing Skin-Reactive Properties. Ernest Jawetz, Virginia Coleman and M. F. Allende. ................................................................. 197

The Effect of the Calcium Hydroxide-Calcium Aluminate Antibody Purification Procedure on the Physical Properties of Rabbit Gamma Globulin. L. A. Sternberger and M. L. Petermann ..................................... 207

Immunity Following Oral Administration of Poliomyelitis Virus to Monkeys. Joseph L. Melnick and Nada Ledinko .................................................. 213

Differences in the Degree of Infectiousness of Two Related Strains of Poliomyelitis Virus Following Their Oral Administration to Monkeys. Joseph L. Melnick ........... 219

The Resistance of Mice to Myositis and Central Nervous System Infection Following Immunization with GDVII Mouse Encephalomyelitis Virus. Robert Rustigian, Alwin M. Pappenheimer and Thelma LeBlanc ........................................ 225

The Purification of Tetanus Toxoid by Ammonium Sulfate Fractionation. Leo Levine and Joseph L. Stone ........................................................... 235

Number 4, October, 1951

A Study of Cold Hemagglutinins for Normal and Trypsinized Red Blood Cells in the Serum of Normal Individuals and of Hemolytic Anemias. Bertha A. Bouroncle, Matthew C. Dodd and Claude-Starr Wright ....................................................... 265

Antibody in Lymphocytes from Hyperimmunized Rabbits. Allan Erslev .................. 281

Precipitin Reactions with Soluble Antigens from Suspensions of Pasteurella pestis or from Tissues of Animals Dead of Plague. Carl L. Larson, Cornelius B. Philip, W. C. Wicht and L. E. Hughes ................................................................. 289

Studies on the Chemotherapy of Vaccinia Virus. II. The Activity of Some Thiosemicarbazones. Dorothy Hamre, K. A. Brownlee and Richard Donovick .................. 305

The Hybridization of Coliphage T5 and Salmonella Phage PB. Mark H. Adamo .......... 313

Studies of Herpes Simplex Virus in Newborn Mice. Edwin D. Kilbourne and Frank L. Horsfall, Jr. ................................................................. 321

Increase in Virulence of the Lansing Strain of Poliomyelitis Virus with Passage in Mice. John D. Ainslie ................................................................. 331

The Production of Antibody by Patients with Chronic Hepatic Disease. W. Paul Havens, Jr., James M. Shaffer and Charles J. Hopke, Jr. ............................. 347

Western Equine and St. Louis Encephalitis Viruses in the Blood of Experimentally Infected Wild Birds and Epidemiological Implications of Findings. W. McD. Hammon, W. C. Reeves and Gladys E. Sather .............................................. 357

Interference between Mumps Virus and Pneumonia Virus of Mice (PVM). Fate of Mumps Virus in the Mouse Lung. Harold S. Ginsberg and Frank L. Horsfall, Jr. 369
CONTENTS

NUMBER 5, NOVEMBER, 1951

High Intensity Electrons as a Tool for Preparation of Vaccines. I. Preparation of Rabies Vaccine. Frederick B. Traub, Ulrich Friedemann, Arno Brasch and Wolfgang Huber ......................................................... 379
Pig Complement and Its Fractionation for the Production of Reagents Containing Third Component. Jon Jonsen, Wladyslaw Manski and Michael Heidelberger ............ 385
The in vivo Stability of the 1st Protein Label of Rabbit Antibody in Guinea Pigs as Determined by the Quantitative Precipitin Reaction. L. R. Melcher and S. P. Masouredis ......................................................... 393
Studies on Vaccinia Virus. I. The Development of Hemagglutinating and Infective Particles in the Chorioallantois of the Chick Embryo. B. A. Briody and Claudia Stannard .......................................................... 403
Studies on Vaccinia Virus. II. Neutralization of Vaccinia Virus by Normal Guinea Pig Serum. B. A. Briody, Nada Ledinko and Claudia Stannard ......................................................... 413
The Effect of Proflavine on the Growth of Viruses in the Chick Embryo. B. A. Briody and Claudia Stannard .......................................................... 423
Mouse-Egg Neutralization. Neutralization in the Mouse of Influenza Viruses not Adapted to the Mouse. Edwin D. Kilbourne and Frank L. Horsfall, Jr ..................... 431

NUMBER 6, DECEMBER, 1951

Attempts at a Quantitative Estimation of the Second Component of Complement. Michael Heidelberger, Jon Jonsen, Byron H. Waksman and Wladyslaw Manski . 449
The Serological Response of Cotton Rats and Monkeys to Poliomyelitis Virus. Morris Pollard .......................................................... 463
Antiviral Properties of Ehrlichin, an Antibiotic Produced by Streptomyces lavendulae. Vincent Groupé, Jack W. Frankel, Mary Lechevalier and Selman A. Waksman . 471
Protection of Mice against the Vaccinia Virus by the Administration of Phenoxathiouracils. Randall L. Thompson, Marian Price, S. A. Minton, Jr., Elvira A. Falco and G. H. Hitchings .......................................................... 483
The Zone of Localization of Antibodies. XIII. The in vivo Localization of Anti-Liver-Blood-Vessel Antibodies in the Rat. David Pressman, Beila Sherman and Leonard Korngold .......................................................... 492
The Interaction of Influenza Virus and Intact Human Erythrocytes Observed by Replica Technique in the Electron Microscope. Morris Rhiain, Alfred S. Evans, and Joseph L. Melnick .......................................................... 513
The Electron Microscopy of Chick Embryo Membranes Infected with Newcastle Disease. Lawrence Kilham, Councilman Morgan and Ralph W. G. Wyckoff ...... 523
The Occurrence of Newcastle Disease Antihemagglutinin in Human Sera and Its Relationship to Mumps Virus. Alfred S. Evans .......................................................... 529
A Micro-Test for Measuring Circulating Antibodies against a Virus (FVM). J. Maclean Smith and George S. Mirick ........................................................................ 539
Concurrent Infection with Influenza A and B Viruses in a Single Epidemic of Influenza. Edwin D. Kilbourne, Harold C. Anderson and Frank L. Horsfall, Jr ..................... 547
Index ............................................................................. 559
