INDEX

Adams, M. H., 313
Agglutination titration in human brucellosis, factors influencing, 115
Ainslie, J. D., 331
Allende, M. F. See Jawetz, Coleman and Allende, 197
Alternate passage of influenza virus, 83
Ammonium sulfate fractionation, purification of tetanus toxoid by, 235
Anatomical lesions produced by injection of dead streptococci into lung in experimental streptococcal pneumonia, 189
Anderson, H. C. See Kilbourne, Anderson and Horsfall, 547
Antibodies, anti-liver-blood-vessel, in vivo localization in the rat of, 493
—, circulating, against a virus (PVM), micro-test for measuring, 539
—, zone of localization of, 15, 21, 493
Antibody, in lymphocytes from hyperimmunized rabbits, 281
—, levels, circulating, effect of antilymphocytic serum on, 57
—, purification procedure—calcium hydroxide-calcium aluminate—effect on physical properties of rabbit gamma globulin, 207
—, rabbit, in guinea pigs as determined by quantitative precipitin reaction, in vivo stability of I\textsuperscript{14} protein label of, 393
Antigen, elementary theory and determination of diffusion coefficients of, 501
—, elimination from blood as an early manifestation of immune response, 243
—, antibody reactions in agar, 501
Antigenic composition of Cryptococcus neoformans, 109
Antigenicity of sarcomata undergoing atrophy in rats, 193
Antihemagglutinin in Newcastle disease, occurrence in human sera and its relationship to mumps virus, 529
Anti-kidney antibody, kidney-localizing, in vivo purification of, 15
—, liver-blood-vessel antibodies in the rat, in vivo localization of, 493
Antilymphocytic serum on circulating antibody levels, effect of, 57
Antimicrobial substances and enzyme inhibitors, effects on oxidation of glutamate by purified rickettsiae, 123
Antiviral properties of ehrlichin, an antibiotic produced by Streptomyces lavendulae, 471
Aptekman, P. M. See Lewis and Aptekman, 193
Attempts at a quantitative estimation of the second component of complement, 449
Aureomycin, chloramphenicol and terramycin in experimental Q fever infections in embryonated eggs, comparison of relative potencies, 437
BCG vaccination and chemotherapy, effect on experimental tuberculosis in mice, 137
Becker, E. L., Munoz, J., Lapesle, C. and Le Beau, L. J., 501
Berry, J. W. See Smith, Berry and Wood, 71
Bouroncle, B. A., Dodd, M. C. and Wright, C.-S., 265
Braesch, A. See Traub, Friedemann, Braach and Huber, 379
Breese, S. S., Jr. See Melnick, Rhian, Warren and Breese, 151
Briody, B. A. and Stannard, C., 403, 413, 423
Brownlee, K. A. See Hamre, Brownlee and Donovick, 305
Brucella infection, immunization of guinea pigs and mice by means of the “native antigen”, 1
Brucellosis, human, factors influencing agglutination titration in, 115
Bukantz, S. C. See Talmage, Dixon, Bukantz and Dammin, 243
Changes in properties of coagulase-reacting factor of plasma after separation from prothrombin by Seitz filtration, 63
Chemotherapy and BCG vaccination, effect on experimental tuberculosis in mice, 137
Chick embryo, development of hemagglutinating and infective particles in chorioallantois of, 403
—, effect of proflavine on growth of viruses in, 423
Membranes infected with Newcastle disease, electron microscopy of, 523

Chloramphenicol, aureomycin and terramycin in experimental Q fever infections in embryonated eggs, comparison of relative potencies of, 437

Chorioallantois of chick embryo, development of hemagglutinating and infective particles in, 403

Clostridia, proteolytic, serological group II of, 49

Coagulase-reacting factor of plasma after separation from prothrombin by Seitz filtration, changes in properties of, 63

Cohen, S., 339

Colburn, C. G. See Weinstein, Colburn, Seltser, Mallory and Waring, 173, 183, 189

Coleman, V. See Jawetz, Coleman and Alende, 197

Coliphage T5 and Salmonella phage PB, hybridization of, 313

Comparison by means of the complement-fixation test of relative potencies of chloramphenicol, aureomycin and terramycin in experimental Q fever in embryonated eggs, 437

— of effects of serial passage and alternate passage of Type B influenza virus in hamsters, 83

Complement, attempts at a quantitative estimation of the second component of, 449

—, pig, and its fractionation for production of reagents containing third component, 385

—, fixation test, comparison of relative potencies of chloramphenicol, aureomycin and terramycin in experimental Q fever in embryonated eggs, 437

—, fixing values, infectious endpoints, and death curves in experimental Coxiella burnetii infection, relationships among, 257

Concentration and purification of mouse encephalomyelitis virus by hemagglutination, 75

Concurrent infection with influenza A and B viruses in a single epidemic of influenza, 547

Coxiella burnetii infection, experimental, relationships among complement-fixing values, infectious endpoints and death curves in, 257

Coxsackie viruses and Lansing poliomyelitis virus determined by sedimentation and ultrafiltration, size of, 151

Cross reactions and immunological specificities in the vascular beds of liver, kidney and lung, 21

Cryptococcus neoformans, antigenic composition of, 109

Dammin, G. J. See Talmage, Dixon, Bukantz and Dammin, 243

Davenport, F. M., 83

Death curves, complement-fixing values, and infectious endpoints in experimental Coxiella burnetii infection, relationships among, 257

Determination of antibody through use of $I^{131}$ label, 339

Development of hemagglutinating and infective particles in chorioallantois of chick embryo, 403

Differences in degree of infectiousness of two related strains of poliomyelitis virus following their oral administration to monkeys, 219

Diffusion coefficients of antigen, elementary theory and determination of, 501

Diphtheria antitoxin, equine, experiments with, 339

Dixon, F. J. See Talmage, Dixon, Bukantz and Dammin, 243

Dodd, M. C. See Bouroncle, Dodd and Wright, 265

Donovick, R. See Hamre, Brownlee and Donovick, 305

Edsall, G., 167

Effect of antilymphocytic serum on circulating antibody levels, 57

— of BCG vaccination and chemotherapy on experimental tuberculosis in mice, 137

— of calcium hydroxide-calcium aluminate antibody purification procedure on physical properties of rabbit gamma globulin, 207

— of profavine on growth of viruses in chick embryo, 423

— of antimicrobial substances and enzyme inhibitors on oxidation of glutamate by purified rickettsiae, 123

Ehrlichin, an antibiotic produced by Streptomyces lavendulae, antiviral properties of, 471
Elberg, S., Herzberg, M., Schneider, P., Silverman, S. J. and Meyer, K. F., 1
Electron microscope, interaction of influenza virus and intact human erythrocytes observed by replica technique in the, 513
— microscopy of chick embryo membranes infected with Newcastle disease, 523
Electrons, high intensity, as a tool for preparation of vaccines, 379
Elementary theory and determination of diffusion coefficients of antigen, 501
Enzyme inhibitors and antimicrobial substances, effects on oxidation of glutamate by purified rickettsiae, 123
Erslev, A., 281
Erythrocytes, intact human, observed by replica technique in the electron microscope, interaction of influenza virus and, 513
Evans, A. S., 529
—. See Rhian, Evans and Melnick, 513
Evans, E. E. and Kessel, J. F. 109
Experimental streptococcal pneumonia, 173, 183, 189
Experiments with equine diphtheria antitoxin, 339

Factors influencing agglutination titration in human brucellosis, 115
Falco, E. A. See Thompson, Price, Minton, Falco and Hitchings, 483
Fate of mumps virus in mouse lung, 369
Feinberg, R. J. and Wright, G. G., 115
Forman, B. See Woodruff, Forman and Fraser, 57
Fractionation of pig complement for the production of reagents containing third component, 385
Frankel, J. W. See Groupé, Frankel, Lechevalier and Waksman, 471
Fraser, K. B. See Woodruff, Forman and Fraser, 57
Freeze-drying apparatus, portable, employing either mechanical or dry ice refrigeration, 163
Friedemann, U. See Traub, Friedemann, Brasch and Huber, 379

Gamma globulin of rabbit, effect of calcium hydroxide-calcium aluminate antibody purification procedure on physical properties of, 207
Ginsberg, H. S. and Horsfall, Jr., 369
Glutamate, effects of antimicrobial substances and enzyme inhibitors by purified rickettsiae on oxidation of, 123
Groupé, V., Frankel, J. W., Lechevalier, M. P. and Waksman, S. A., 471
Growth of viruses in chick embryo, effect of proflavine on, 423
Guinea pig serum, normal, neutralization of Vaccinia virus by, 413

Hahn, F. E. See Wisseman, Jackson, Hahn, Ley and Smadel, 123
Hall, H. M. See Warren, Kugler and Hall, 163
Hammon, W. M., Reeves, W. C. and Sather, G. E., 305
Hamre, D., Brownless, K. A. and Donovick, R., 305
Havens, W. P., Jr., Shaffer, J. M. and Hopke, C. J., Jr., 347
Heidelberger, M., Jonsen, J., Waksman, B. H. and Manski, W., 449
—. See Jonsen, Manski and Heidelberger, 385
Hemagglutinating and infective particles in chorioallantois of chick embryo, development of, 403
Hemagglutination, purification and concentration of mouse encephalomyelitis virus by, 75
Hemagglutinins, cold, for normal and trypsinized red blood cells in serum of normal individuals and of hemolytic anemias, 265
Hepatic disease, chronic, production of antibody by patients with, 347
Herpes simplex virus in newborn mice, 321
— virus possessing skin-reactive properties, soluble antigen of, 197
Hersberg, M. See Elberg, Herzberg, Schneider, Silverman and Meyer, 1
Heterologous strain immunity in experimental syphilis, 35
High intensity electrons as a tool for preparation of vaccines, 379
Hitchings, G. H. See Thompson, Price, Minton, Falco and Hitchings, 483
Hopke, C. J., Jr. See Havens, Shaffer and Hopke, 347
Horsfall, F. L., Jr. See Ginsberg and Horsfall, 369
—. See Kilbourne and Horsfall, 321, 431
—. See Kilbourne, Anderson and Horsfall, 547
Huber, W. See Traub, Friedemann, Brasch and Huber, 379
Hughes, L. E. See Larson, Philip, Wicht and Hughes, 289
Hybridization of coliphage T5 and Salmonella phage PB, 313

$^1$ITM label, determination of antibody through use of, 339
— protein label of rabbit antibody in guinea pigs as determined by quantitative precipitin reaction, in vivo stability of, 393

Immune response, antigen elimination from blood as an early manifestation of, 243

 Immunity following oral administration of poliomyelitis virus to monkeys, 213
Immunization of guinea pigs and mice to Brucella infection by means of the "native antigen", 1
— with GDVII mouse encephalomyelitis virus, resistance of mice to myositis and central nervous system infection following, 225

Immunological specificities and cross reactions in the vascular beds of liver, kidney and lung, 21

Immunology, what is it? 167

Increase in virulence of Lansing strain of poliomyelitis virus with passage in mice, 331

Infectious endpoints, complement-fixing values, and death curves in experimental Coxiella burnetii infection, 257

Infecive and hemagglutinating particles in chorionallantois of chick embryo, development of, 403

Influenza, concurrent infection with influenza A and B viruses in a single epidemic of, 547
— A and B viruses in a single epidemic of influenza, concurrent infection with, 547
— virus, effects of alternate and serial passage of, 83
— and intact human erythrocytes observed by replica technique in the electron microscope, interaction of, 513
— viruses not adapted to the mouse, neutralization in the mouse of, 431

Interaction of influenza virus and intact human erythrocytes observed by replica technique in the electron microscope, 513

Interference between mumps virus and pneumonia virus of mice (PVM), 369

In vivo localization of anti-liver-blood-vessel antibodies in the rat, 493
— — purification of kidney-localizing anti-kidney antibody, 15
— — stability of $^1$ITM protein label of rabbit antibody in guinea pigs as determined by quantitative precipitin reaction, 393

Isolation, fractionation and certain physical, chemical and serological properties, of specific soluble protein of Pasteurella pestis, 93

Jackson, E. B. See Wisseman, Jackson, Hahn, Ley and Smadel, 123
Jawetz, E., Coleman, V. and Allende, M. F., 197
Jonsen, J. See Heidelberger, Jonsen, Waksman and Manski, 449
—, Manski, W. and Heidelberger, M., 385
Kessel, J. F. See Evans and Kessel, 109
Kilbourne, E. D. and Horsfall, F. L., Jr., 321, 431
—, Anderson, H. C. and Horsfall, F. L., Jr., 547
Kilham, L., Morgan, C. and Wyckoff, R. W. G., 523
Korngold, L. See Pressman, Sherman and Korngold, 493
Kugler, H. See Warren, Kugler and Hall, 163

Lackman, D. B. See Ormsbee, Lackman and Pickens, 257
Lahelle, O. and Ward, T. G., 75
Lapresle, C. See Becker, Munoz, Lapresle and Le Beau, 501
Larson, C. L., Philip, C. B., Wicht, W. C. and Hughes, L. E., 289
Le Beau, L. J. See Becker, Munoz, Lapresle and Le Beau, 501
LeBlanc, T. See Rustigian, Pappenheimer and LeBlanc, 225
Lechevalier, M. P. See Groupé, Frankel, Lechevalier and Waksman, 471
Ledinko, N. See Briody, Ledinko and Stannard, 413
—, See Melnick and Ledinko, 213
Levine, L. and Stone, J. L., 235
Lewis, M. R. and Aptekman, P. M., 193
Ley, A. C. See Wisseman, Jackson, Hahn, Ley and Smadel, 123
Localization of antibodies, zone of, 15, 21, 493
Lodge, A. L. See Tager and Lodge, 63
Lymphocytes from hyperimmunized rabbits, antibody in, 281
Magnuson, H. J. and Thompson, F. A., Jr., 35
Mallory, G. K. See Weinstein, Colburn, Seltzer, Mallory and Waring, 173, 183, 189
Mandia, J. W., 49
Manski, W. See Heidelberger, Jonsen, Waksman and Manski, 449
—. See Jonsen, Manski and Heidelberger, 385
Masouredis, S. P. See Melcher and Masouredis, 393
McLeod, C. P. See Magnuson, Thompson and McLeod, 41
Melcher, L. R. and Masouredis, S. P., 393
Melnick, J. L. and Ledinko, N., 213, 219
—. Rhian, M., Warren, J. and Breese, S. S., Jr., 151
—. See Rhian, Evans and Melnick, 513
Metabolic studies of rickettsiae, 123
Meyer, K. F. See Elberg, Herzberg, Schneider, Silverman and Meyer, 1
Micro-test for measuring circulating antibodies against a virus (PVM), 539
Minton, S. A., Jr. See Thompson, Price, Minton, Falco and Hitchings, 483
Mirick, G. S. See Smith and Mirick, 539
Morgan, C. See Kilham, Morgan and Wyckoff, 523
Mouse-egg neutralization, 431
Mouse encephalomyelitis virus, GDVII, resistance of mice to myositis and central nervous system infection following immunization with, 225
— — —, purification and concentration by hemagglutination, 75
Mumps virus, occurrence of Newcastle disease antihemagglutinin in human sera and its relationship to, 529
— — — and pneumonia virus of mice (PVM), interference between, 369
— — — in mouse lung, fate of, 369
Munoz, J. See Becker, Munoz, Lapreale and Le Beau, 501
Myositis and central nervous system infection, resistance of mice following immunization with GDVII mouse encephalomyelitis virus, 225
Neutralization of Vaccinia virus by normal guinea pig serum, 413
— in mouse of influenza viruses not adapted to the mouse, 431
Newcastle disease, electron microscopy of chick embryo membranes infected with, 523
— — antihemagglutinin in human sera and its relationship to mumps virus, occurrence of, 529
Occurrence of Newcastle disease antihemagglutinin in human sera and its relationship to mumps virus, 529
Ormsbee, R. A. and Pickens, E. G., 437
—. Lackman, D. B. and Pickens, E. G., 257
Pappenheimer, A. M. See Rustigian, Pappenheimer and LeBlanc, 225
Pasteurella pestis, precipitin reactions with soluble antigens from suspensions of, 289
— — —, studies on specific soluble protein of, 93
Pathologic and bacteriologic features of untreated experimental streptococcal pneumonia, 173
Penicillin therapy, effect of, on pathologic and bacteriologic features of experimental streptococcal pneumonia, 183
Perry, W. D. See Smith, Perry, Berry and Wood, 71
Petermann, M. L. See Sternberger and Petermann, 207
Phagocytosis, surface, in vivo, 71
Phenoxythiouracils, protection of mice against vaccinia virus by administration of, 483
Philip, C. B. See Larson, Philip, Wicht and Hughes, 289
Pickens, E. G. See Ormsbee and Pickens, 437
—. See Ormsbee, Lackman and Pickens, 257
Pig complement and its fractionation for production of reagents containing third component, 385
Plague, precipitin reactions with soluble antigens from suspensions of Pasteurella pestis or from tissues of animals dead of, 289
Pneumonia virus of mice (PVM) and mumps virus, interference between, 369
Poliomyelitis virus, and Coxsackie viruses, size determined by sedimentation and ultrafiltration, 151
— —, differences in degree of infectiousness of two related strains following their oral administration to monkeys, 219
— —, immunity following oral administration to monkeys, 213
— —, increase in virulence with passage in mice of Lansing strain of, 331
— —, serological response of cotton rats and monkeys to, 463
Pollard, M., 463
Portable freeze-drying apparatus employing either mechanical or dry ice refrigeration, 163
Precipitin reaction, quantitative, in vivo stability of I\textsuperscript{111} protein label of rabbit antibody in guinea pigs as determined by, 393
— — with soluble antigens from suspensions of *Pasteurella pestis* or from tissues of animals dead of plague, 289
Preparation of rabies vaccine, 379
Pressman, D. and Sherman, B., 15, 21
—, Sherman, B. and Korngold, L., 493
Price, M. See Thompson, Price, Minton, Falco and Hitchings, 483
Production of antibody by patients with chronic hepatic disease, 347
Proflavine, effect on growth of viruses in chick embryo, 423
Protection of mice against vaccinia virus by administration of phenoxythiourea, 483
Protein label, I\textsuperscript{111}, of rabbit antibody in guinea pigs as determined by quantitative precipitin reaction, in vivo stability of, 393
Prothrombin, changes in properties of coagulase-reacting factor of plasma after separation by Seitz filtration from, 63
Purification and concentration of mouse encephalomyelitis virus by hemagglutination, 75
— of tetanus toxoid by ammonium sulfate fractionation, 235
PVM virus, micro-test for measuring circulating antibodies against, 539
Q fever, experimental, in embryonated eggs, comparison of relative potencies of chloramphenicol, aureomycin and terramycin in, 437
Rabies vaccine, preparation of, 379
Reeves, W. C. See Hammon, Reeves and Sather, 357
Relationship between treponemal immobilizing antibodies and acquired immunity in experimental syphilis, 41
Relationships among complement-fixing values, infectious endpoints, and death curves in experimental *Coxiella burnetii* infection, 257
Resistance of mice to myositis and central nervous system infection following immunization with GDVII mouse encephalomyelitis virus, 225
Rhian, M., Evans, A. S. and Melnick, J. L., 513
—. See Melnick, Rhian, Warren and Breese, 151
Rickettsiae, metabolic studies of, 123
—, purified, effects of antimicrobial substances and enzyme inhibitors on oxidation of glutamate by, 123
Rustigian, R., Pappenheimer, A. M. and LeBlanc, T., 225
Salmonella phage PB and coliphage T5, hybridization of, 313
Sarcomata undergoing atrophy in rats, antigenicity of, 193
Sather, G. E. See Hammon, Reeves and Sather, 357
Schneider, P. See Elberg, Herzberg, Schneider, Silverman and Meyer, 1
Schöttler, W. H. A., 299
Seal, S. C., 93
Sedimentation and ultrafiltration, size of Coxsackie viruses and Lansing poliomyelitis virus determined by, 151
Seltser, R. See Weinstein, Colburn, Seltser, Mallory and Waring, 173, 183, 189
Serological Group II of the proteolytic Clostridia, 49
— response of cotton rats and monkeys to poliomyelitis virus, 463
Shaffer, J. M. See Havens, Shaffer and Hopke, 347
Sherman, B. See Pressman and Sherman, 15, 21
—. See Pressman, Sherman and Korngold, 493
Siebenmann, C. O. 137
Silverman, S. J. See Elberg, Herzberg, Schneider, Silverman and Meyer, 1
Size of Coxsackie viruses and Lansing poliomyelitis virus determined by sedimentation and ultrafiltration, 151

Smadel, J. E. See Wiseman, Jackson, Hahn, Ley and Smadel, 123

Smith, J. M. and Mirek, G. S., 539

Smith, M. R., Perry, W. D., Berry, J. W. and Wood, W. B., Jr., 71

Snake venoms, desiccated, stability of, 209

Soluble antigen of herpes virus possessing skin-reactive properties, 197

Stability of desiccated snake venoms, 209

Stannard, C. See Brioni and Stannard, 403, 413, 423

Sternberger, L. A. and Petermann, M. L., 207

St. Louis and western equine encephalitis viruses in blood of experimentally infected wild birds and epidemiological implications of findings, 357

Stone, J. L. See Levine and Stone, 235

Streptococcal pneumonia, 173, 183, 189

Streptococci, dead, anatomical lesions produced by injection into the lung of, 189

Streptomyces lavendulae, antiviral properties of ehrlichin, an antibiotic produced by, 471

Studies on chemotherapy of vaccinia virus, 305

— of herpes simplex virus in newborn mice, 321

— on herpes simplex virus, 197

— on immunization of guinea pigs and mice to Brucella infection by means of "native antigen", 1

— on specific soluble protein of Pasteurella pestis and allied organisms, 93

— on Vaccinia virus, 403, 413

Study of cold hemagglutinins for normal and trypsinized red blood cells in serum of normal individuals and of hemolytic anemias, 265

Surface phagocytosis in vivo, 71

Syphilis, experimental, heterologous strain immunity in, 35

— —, relationship between treponemal immobilizing antibodies and acquired immunity in, 41

Tager, M. and Lodge, A. L., 63

Talmage, D. W., Dixon, F. J., Bukantz, S. C. and Dammin, G. J., 243

Terramycin, chloramphenicol and aureomycin in experimental Q fever infections in embryonated eggs, comparison of relative potencies of, 437

Tetanus toxoid, purification by ammonium sulfate fractionation, 235

Thiosemicarbazones, activity of, 305

Thompson, F. A., Jr. See Magnuson and Thompson; Magnuson, Thompson and McLeod, 35, 41

Thompson, R. L., Price, M., Minton, S. A., Jr., Falco, E. A. and Hitchings, G. H., 483

Traub, F. B., Friedemann, U., Brasch, A. and Huber, W., 379

Treponemal immobilizing antibodies and acquired immunity in experimental syphilis, relationship between, 41

Trypsinized and normal red blood cells in the serum of normal individuals and of hemolytic anemias, study of cold hemagglutinins for, 265

Tuberculosis, experimental in mice, effect of BCG vaccination and chemotherapy on, 137

Ultrafiltration and sedimentation, size of Coxsackie viruses and Lansing poliomyelitis virus determined by, 151

Vaccines, high intensity electrons as a tool for preparation of, 379

Vaccinia virus, neutralization by normal guinea pig serum, 413

— —, protection of mice by administration of phenoxythiouracils, against, 483

— —, studies on, 403, 413

— —, — — chemotherapy of, 305

Virulence of the Lansing strain of poliomyelitis virus with passage in mice, increase in, 331

Viruses, growth in chick embryo, effect of proflavine on, 423

Waksman, B. H. See Heidelberger, Jonsen, Waksman and Manski, 449

Waksman, S. A. See Groupe, Frankel, Lechevalier and Waksman, 471

Wark, T. G. See Lahelle and Ward, 75

Waring, G. W., Jr. See Weinstein, Colburn, Selser, Mallory and Waring, 173

Warren, J., Kugler, H. and Hall, H. M., 163

—. See Melnick, Rhian, Warren and Breese, 151
Weinstein, L., Colburn, C. G., Seltser, R., Mallory, G. K. and Waring, G. W., Jr., 173, 183, 189

Western equine and St. Louis encephalitis viruses in blood of experimentally infected wild birds and epidemiological implications of findings, 357

What is Immunology? 167
