CONTENTS

NUMBER 1, JANUARY, 1952

Inhibition of the Growth of Viruses in the Chick Embryo by Aromatic Diamidines. Monroe D. Eaton, Charlotte G. Levenson and Maude Perry ..................... 1

Protease Activation in Immune Reactions. Walton B. Geiger .................... 11

Immunological Studies on Blood Groups. XII. Preparation of Blood Group Substances from Bovine Stomach Linings and a Comparison of their Chemical and Immunological Properties with those of Blood Group Substances from other Species. Sam M. Beiser and Elvin A. Kabat .......................... 19

Studies on Conglutinin. I. Its Role in Erythrocytic Agglutination in Relation to the Application of the Latent Theory. John A. Flick and Aida L. Villafane ...... 41

Paradoxical Effect of Congo Red on the Toxicity of Streptolysin S for Mice. Kirsten Rosendal and Alan W. Bernheimer ............................................. 53

The Effect of Human Serum upon the Agglutination of Enzyme-Treated Erythrocytes. Robert E. Hoyt and Helen Zwicker ..................................... 61

Hemagglutination by Tularemia Antisera: Further Observations on Agglutination of Polysaccharide-Treated Erythrocytes and its Inhibition by Polysaccharide. George G. Wright and Richard J. Feinberg ............................. 65

The Fate in Rabbits of Intravenously Injected I125 Iodoalbumin. Felix Haurowitz and Charles F. Crampton ................................................. 73

The Susceptibility of Irradiated Mice to Infection as a Function of Post-Irradiation Time. I. L. Shechmeister, V. P. Bond and M. N. Swift ......................... 87

The Effect of Trypsin on Hemagglutination by Murine Encephalomyelitis Virus (GDVII). Marion C. Morris ................................................... 97

Immunization of Laboratory Workers with Purified Trivalent Equine Encephalomyelitis Vaccine. Fred D. Maurer, Kenneth L. Kuttler and Robert H. Yager .... 109

NUMBER 2, FEBRUARY, 1952

Analysis of Immunity in Experimental Tsutsugamushi Disease. Tsuguo Kuwata ...... 115

In Vivo and In Vitro Studies of Serological Specificity Among Viruses of the Psittacosis-Lymphogranuloma Venereum Group. M. R. Hilleman, D. A Haig and R. J. Helmold ....................................................... 121

Studies on Immunization Against Plague. II. The Complement-Fixation Test. T. H. Chen, S. F. Quan and K. F. Meyer ............................................... 147

The Cellular Transfer in Humans of Delayed Cutaneous Reactivity to Hemolytic Streptococci. H. Sherwood Lawrence ........................................... 159

On the Chromatographic Behavior of the T Coliphages in Paper Strips. Charles C. Shepard ................................................................. 179

The Interchangeability of the Complement Components of Different Animal Species. Christine E. Rice and Paul Boulanger ............................................. 197

Antibody Response of Human Subjects to Epidemic Typhus Vaccine Three to Eight Years after Previous Immunization. Edward S. Murray, Avis Ofstrock and John C. Snyder ............................................................ 207

NUMBER 3, MARCH, 1952

Precipitin Production in Chickens. VII. The Relation Between Circulating Antibody and Anaphylactic Shock. Takashi Makinodan, Harold R. Wolfe, Morris Goodman and Royal Ruth .......................... 219

### CONTENTS

**Number 5, May, 1952**

The Growth of Mouse Encephalomyelitis Virus (Theiler's FA Strain) in Embryonated Eggs. Robert B. Lawson ................................................................. 495

Studies of Toxin of Clostridium botulinum Type D. Daniel A. Boroff, Marcel Raynaud and André R. Prévote ................................................................. 503

Rh Antigens of Human and Monkey Blood. John Murray ................................................................. 513

The Effect of Certain Chemical Compounds on the Multiplication of \( T_2 \) Bacteriophage. Jerald G. Woolsey, Marie K. Murphy, Howard W. Bond and Theodore D. Perrine ................................................................. 523

Toxic Manifestations in Rabbits and Mice Associated with the Virus of Western Equine Encephalomyelitis. Lyle B. Fastier ................................................... 531

Individual Variation in the Hemagglutinin Content of Yellowfin Tuna and Skipjack Bloods. John E. Cushing ................................................................. 543

Postnatal Immunity in Mouse Encephalomyelitis. Donald J. Dean ................................................................. 549

Vaccination Against Paratuberculosis (John's Disease). Björn Sigurdsson ................................................................. 559

Stimulating Effect of Tuberculirn Upon Production of Circulating Antibodies in Guinea Pigs Infected with Tubercle Bacilli. Stephen V. Boyden and W. Emanuel Suter ................................................................. 577

**Number 6, June, 1952**

Inoculation of Cynomolgus Monkeys with Coxsackie Virus Alone, Combined, or with Poliomyelitis Virus. Beatrice F. Howitt and Velma J. Nichols ................................................................. 599

The Effect of Chemical Substances in Mice Infected with St. Louis Encephalitis, PRS Strain of Influenza, or the Lansing Strain of Poliomyelitis Virus. Jerald G. Woolsey, Howard W. Bond and Theodore D. Perrine ................................................................. 621

Studies on Hemagglutination by Columbia-SK Virus. Beni Horvath and Claus W. Jungeblut ................................................................. 627

Studies on Herpes Simplex Virus. III. The Neutralization of Egg-Adapted Herpes Virus by Human Sera in ovo. Ernest Jawetz and Virginia R. Coleman ................................................................. 645

Studies on Herpes Simplex Virus. IV. The Level of Neutralizing Antibodies in Human Sera. Ernest Jawetz, M. P. Allende and Virginia R. Coleman ................................................................. 655

Evaluation of Serological Methods for Demonstrating Antibody Responses to Group A Coxsackie (Herpangina) Viruses. Edward A. Beamian and Robert J. Huester ................................................................. 663

Parallel Studies of Complement and Blood Coagulation. VII. The Effect of Ethionine. Christine E. Rice, Paul Boulanger, P. J. G. Plummer and E. Annau ................................................................. 673

Differences in the Capacity of Human Serums to Neutralize Herpes Simplex Virus. Harry M. Rose ................................................................. 687

Radiosensitive and Radioresistant Phases in the Antibody Response. Frank J. Dixon, David W. Talmage and Paul H. Maurer ................................................................. 693
