# CONTENTS

**NUMBER 1, JANUARY, 1952**

- Inhibition of the Growth of Viruses in the Chick Embryo by Aromatic Diamidines. Monroe D. Eaton, Charlotte G. Levenson and Maude Perry .................................................. 1
- Protease Activation in Immune Reactions. Walton B. Geiger ........................................ 11
- Immunological Studies on Blood Groups. XII. Preparation of Blood Group Substances from Bovine Stomach Linings and a Comparison of their Chemical and Immunological Properties with those of Blood Group Substances from other Species. Sam M. Beiser and Elvin A. Kabat ................................... 19
- Studies on Conglutinin. I. Its Role in Erythrocytic Agglutination in Relation to the Application of the Lattice Theory. John A. Flick and Aida L. Villafane ............ 41
- Paradoxic Effect of Congo Red on the Toxicity of Streptolysin S for Mice. Kirsten Rosendal and Alan W. Bernheimer ..................................................... 53
- The Effect of Human Serum upon the Agglutination of Enzyme-Treated Erythrocytes. Robert E. Hoyt and Helen Zwicker ..................................... 61
- Hemagglutination by Tularemia Antisera: Further Observations on Agglutination of Polysaccharide-Treated Erythrocytes and its Inhibition by Polysaccharide. George G. Wright and Richard J. Feinberg ........................................ 65
- The Fate in Rabbits of Intravenously Injected I^{131} Iodoalbumin. Felix Haurowitz and Charles F. Crampton .................................................... 73
- The Susceptibility of Irradiated Mice to Infection as a Function of Post-Irradiation Time. I. L. Shechmeister, V. P. Bond and M. N. Swift ..................... 87
- The Effect of Trypsin on Hemagglutination by Murine Encephalomyelitis Virus (GDVII). Marion C. Morris ................................................... 97
- Immunization of Laboratory Workers with Purified Trivalent Equine Encephalomyelitis Vaccine. Fred D. Maurer, Kenneth L. Kuttler and Robert H. Yager .... 109

**NUMBER 2, FEBRUARY, 1952**

- Analysis of Immunity in Experimental Tsutsugamushi Disease. Tsuguo Kuwata ....... 115
- In Vivo and In Vitro Studies of Serological Specificity Among Viruses of the Prittacosis-Lymphogranuloma Venereum Group. M. R. Hilleman, D. A Haig and R. J. Helmdold .................................................. 121
- Studies on Immunization Against Plague. II. The Complement-Fixation Test. T. H. Chen, S. F. Quan and K. F. Meyer ........................................ 147
- The Cellular Transfer in Humans of Delayed Cutaneous Reactivity to Hemolytic Streptococci. H. Sherwood Lawrence ........................................... 159
- On the Chromatographic Behavior of the T Coliphages in Paper Strips. Charles C. Shepard ............................................................... 179
- The Interchangeability of the Complement Components of Different Animal Species. Christine E. Rice and Paul Boulanger ........................................ 197
- Antibody Response of Human Subjects to Epidemic Typhus Vaccine Three to Eight Years after Previous Immunization. Edward S. Murray, Avis Ofstrock and John C. Snyder .................................................. 207

**NUMBER 3, MARCH, 1952**

- Precipitin Production in Chickens. VII. The Relation Between Circulating Antibody and Anaphylactic Shock. Takashi Makinodan, Harold R. Wolfe, Morris Goodman and Royal Ruth .................................................. 219
The Effect of Total Body X Irradiation on the Susceptibility of Mice to Influenza A Virus Infection. Ernest Beutler and Horace M. Gezon .......................... 227

Studies of Antibody Distribution in the Serum Proteins of Several Rh Antisera. John R. Cann, Raymond A. Brown, John G. Kirkwood, Phillip Sturgeon and Donald W. Clarke .......................................................... 243

Metabolic Studies of Rickettsiae. II. Studies on the Pathway of Glutamate Oxidation by Purified Suspensions of Rickettsia mooseri. Charles L. Wiseman, Jr., Fred E. Hahn, Elizabeth B. Jackson, F. Marilyn Bozeman and Joseph E. Smadel .... 251

Studies on Acute Disseminated Encephalomyelitis Produced Experimentally in Rhesus Monkeys. Elvin A. Kabat, Abner Wolf and Ada E. Bezer ......................................................... 265

Studies on a “Complete” and an “Incomplete” Rh Antiserum with cDe/cde and -D/-D- Cells. I. The Native Sera. Phillip Sturgeon .......................................................... 277

Studies on a “Complete” and an “Incomplete” Rh Antiserum with cDe/cde and -D/-D- Cells. II. Fractions of the “Incomplete Serum”. Phillip Sturgeon and Raymond A. Brown ......................................................... 287

Complement Fixation Tests with Homologous and Heterologous Types of Coxsackie Virus in Man. Lisbeth M. Kraft and Joseph L. Melnick ......................................................... 297

Intranuclear Inclusion Bodies in Cultures of Human Tissue Inoculated with Varicella Vesicle Fluid. Thomas H. Weller and Marguerite B. Stoddard ......................................................... 311

Studies on the Mode of Action of Aromatic Diamidines on Influenza and Mumps Virus in Tissue Culture. Monroe D. Eaton, Maude E. Perry, Charlotte G. Levenson and Ila M. Gocke ......................................................... 321

NUMBER 4, APRIL, 1952

The Interaction of Erythrocytes and Antibodies with Synthetic Polymers and Some Other Substances. Winifred T. Frazer and Melvin Calvin ......................................................... 335

A Study of Infections Caused by Mumps and Newcastle Disease Viruses. I. Specific and Non-specific Serologic Relations. Herbert A. Wenner, Marian H. Jenson and Anne Monley ......................................................... 343

A Study of Infections Caused by Mumps and Newcastle Disease Viruses. II. Some Properties of Specific and Non-specific Serum Hemagglutination Inhibitor Components. Herbert A. Wenner, Anne Monley and Marian H. Jenson ............................ 357

The Response to the Intracutaneous Inoculation of BCG as an Index of Native Resistance to Tuberculosis. Max B. Lurie, Peter Zappasodi, Eugenia Cardona-Lynch and Arthur M. Dannenberg, Jr. ............................ 369

The Effect of ACTH and Cortisone on the Concentration of Circulating Diphtheria Antitoxin. W. Paul Havens, Jr., James M. Shaffer and Charles J. Hopke, Jr. ......................................................... 389

Blood Group Activity and Composition of Polysaccharides from Pancreatins. Ethel Verney and Aaron H. Stock ......................................................... 401

The Use of Chicken Antiserum in the Immunochemical Studies of Edestin. J. Munoz and Elmer L. Becker ......................................................... 405

The Tuberculin Reaction. V. The Antigenicity of Chloroform Soluble Tuberculoprotein Wax. Quentin Myrvik and Russell S. Weiser ......................................................... 413

The Effect of a Malaria Infection on the Titer of Complement and its Components in Ducks. R. Barclay McGhee ......................................................... 421

The Homogeneity of Purified Diphtheria Toxins and Toxoids as Investigated by the Semisolid Precipitin Technic. Harry E. Bowen ............................ 429

Studies on Certain Viruses Isolated in the Tropics of Africa and South America. Immunological Reactions as Determined by Cross-Complement-Fixation Tests. J. Austin Kerr ......................................................... 461
