CONTENTS

NUMBER 1, JANUARY, 1954

Phosphatase-Antiphosphatase Reaction. Competition Between the Specific Substrate and Anti-
phosphatase for Phosphatase. M.G. Sevag, Melva Derrick Newcomb and Ruth E. Miller... 1
Studies of Rickettsial Toxins. I. Role of Hemolysis in Fatal Toxemia of Rabbits and Rats. Philip
Y. Paterson, Charles L. Wiseman, Jr. and Joseph E. Smadel ......................... 12
Production of Pulmonary Lesions by Influenza Viruses in Immunized Mice. Harold S. Ginsberg... 24
Purification Studies on Lansing Poliomyelitis Virus. II. Analytical Electron Microscopic Identifi-
cation of the Infectious Particle in Preparations of High Specific Infectivity. H.L. Bach-
rach and C. E. Schwertd ................................................................. 30
Precipitin Production in Chickens
X. Cellular Changes in the Spleen During Antibody Production. Takashi Makinodan, Royal
F. Ruth and Harold R. Wolfe ......................................................... 39
XI. Site of Antibody Production. Takashi Makinodan, Royal F. Ruth and Harold R. Wolfe. 45
The Genetic Control of Response to Antigenic Stimuli. J.H. Sang and W.R. Sobey ........................ 52
The Hemagglutination Test for Rheumatoid Arthritis. II. The Influence of Human Plasma Fra-
tion II (Gamma Globulin) on the Reaction. George Heller, Abraham S. Jacobson, Maxwell H.
Koldony and William H. Kammerer ........................................................ 66
Studies on Chick-Embryo-Adapted Rabies Virus
IV. Immunization of Guinea Pigs and Description of a Potency Control Test. Hilary Koprow-
ski and Jack Black ................................................................................. 79
V. Protection of Animals with Antiserum and Living Attenuated Virus after Exposure to
Street Strain of Rabies Virus. Hilary Koprowski and Jack Black .............. 85
VI. Further Changes in Pathogenic Properties Following Prolonged Cultivation in the De-
veloping Chick Embryo. Hilary Koprowski, Jack Black and Doris J. Nelsen .... 94
Comparative Characteristics of Two Coxsackie Viruses in Tissue Culture. Cyril S. Stulberg, Ruth
Schapira and C. Richard Eidam ........................................................... 107
The Quantitative Precipitin Reaction of Equine Diphtheria Antitoxin. Harry E. Bowen, Barbara
A. Polley and Jane Huang .................................................................. 112

NUMBER 2, FEBRUARY, 1954

The Cross Reactions Between Albumins of Different Species and Gamma Globulins of Different
Species. Paul H. Maurer ......................................................................... 119
Serum Neutralization Tests in Mice and in Tissue Culture Against Three Types of Poliomyelitis
Virus. C.P. Li and Morris Schaeffer ......................................................... 123
The Relation of Circulating Antibody Concentration to Localization of Labeled (3H) Antigen.
Justine S. Garvey and Dan H. Campbell ..................................................... 131
The Experimental Chemotherapy of Influenza Viruses. Kenneth K. Takemoto, Mary Louise Rob-
bins and Paul K. Smith ........................................................................... 139
Studies on the Transfer of Lymph Node Cells.
I. Appearance of Antibody in Recipients of Cells From Donor Rabbits Injected With Antigen.
Susanna Harris, T.N. Harris and Miriam B. Farber .................................. 148
II. Effects of Experimental Manipulation of the Donor System. T.N. Harris, Susanna Harris
and Miriam B. Farber .............................................................................. 161
Immunology and Serology of Some Parasitic Protozoan Flagellates. I. Trichomonas vaginalis and
Trichomonas foetus. Nicholas J. Menolasino and Ernest Hartman .................. 172
Inhibition of Fatal Anaphylactic Shock in the Mouse With Cortisone. Morris Solotorovsky and
Seymour Winsten ................................................................................. 177
Primary and Specific Anamnestic Antibody Responses of Rabbits to Heterologous Serum Protein
Antigens. Frank J. Dixon, Paul H. Maurer and Maria P. Deichmiller ............ 179
M. Silverstein ....................................................................................... 187
Jacques Jacob Bronfenbrenner (1883–1953): An Appreciation

The Effects of Vitamin Deficiencies on Some Physiological Factors of Importance in Resistance to Infection. Kenneth Wartman, Lee W. Smith and William M. O’Leary

Serological Aspects of the Suppression of Normal Bactericidal Action of Rabbit Serum Following Whole Body X-Irradiation. D. M. Donaldson and Stanley Marcus

Heterohemagglutinins in Inbred Strains of Mice. I. Natural Agglutinins for Sheep and Chicken Red Cells. Kurt Stern and Israel Davidsohn. II. Immune Agglutinins and Hemolysins for Sheep and Chicken Red Cells. Israel Davidsohn and Kurt Stern

The Use of RDE to Improve the Sensitivity of the Hemagglutination-Inhibition Test for the Serologic Diagnosis of Influenza. W. S. Jordan, Jr. and R. O. Oseasohn

Inherent Immunizability to Tetanus Toxoid, Based on Studies in Pure Inbred Mice. Johannes Ipen, Jr.

Factors Affecting The Efficiency of Combined Prophylactics. I. Effect of Diphtheria Toxoid and Pertussis Vaccine on Tetanus Toxoid. Leo Levine and Joseph L. Stone

Studies on Immunity in Anthrax. III. Elaboration of Protective Antigen in a Chemically-Defined, Non-Protein Medium. G. G. Wright, M. A. Hedberg and J. B. Stein

Distribution of Sensitizing Antibody in Human Serum Proteins Fractionated by Electrophoresis-Convection. J. R. Cann and Mary H. Loveless

Studies on Immunization Against Plague. VII. A Serologic Comparison of Virulent and Avirulent Strains with Observations on the Structure of the Bacterial Cells and Its Relationship to Infection and Immunity. T. H. Chen and K. F. Meyer

The Effects of Vital Dyes Upon Experimental Foot and Mouth Virus Infection of Guinea Pigs. Giacinto Ciaccio, Giuseppe Gasparini and N. Ercoli

Cytopathogenic Agents Isolated From Patients During an Unusual Epidemic Exanthem. Franklin A. Neva and John F. Enders

Isolation of a Cytopathogenic Agent From an Infant With a Disease in Certain Respects Resembling Roseola Infantum. F. A. Neva and J. F. Enders

Studies on the Hemolytic Activity of Newcastle Disease Virus (NDV). Allan Granoff and Werner Henle

Studies on the Interaction of the Large and Small Hemagglutinating Components of Newcastle Disease Virus With Red Cells. Allan Granoff and Werner Henle

Correction

Infectivity Titrations of the Viruses of Western Equine Encephalomyelitis and Newcastle Disease by Tissue Culture Methods. Lyle B. Fastier

Growth of Neurotropic Viruses in Extraneural Tissues. VI. Absence of In Vivo Multiplication of Poliomyelitis Virus. Types I and II, After Intratesticular Incubation of Monkeys and Other Laboratory Animals. C. A. Evans, Pamela H. Byatt, Velma C. Chambers and Wayne M. Smith

Growth of Neurotropic Viruses in Extraneural Tissues. VII. Cultivation of MM and Western Equine Encephalitis Viruses in Cultures of Rhesus Testicular Tissue. W. M. Smith and C. A. Evans

Micromethods For the Study of Proteins and Antibodies. I. Procedure and General Applications of Hemagglutination and Hemagglutination-Inhibition Reactions with Tannic Acid and Protein-Treated Red Blood Cells. Abram B. Stavitsky
Micromethods For the Study of Proteins and Antibodies. II. Specific Applications of Hemagglutination and Hemagglutination-Inhibition Reactions with Tannic Acid and Protein-Treated Red Blood Cells. Abram B. Stavitsky ..................................................... 368

Antigenic Relationships Among Certain Arthropod-Borne Viruses as Revealed by Neutralization Tests. K. C. Smithburn ................................................................... 376

The Presence of H Antigen in *Escherichia coli* K Suspensions. Joyce Wright and Regina Villanueva 389

A Factor of Complement Inactivated by Histamine or Ethylenediamine. Helene P. Brumfield... 393

Staphylococcal Enterotoxin: Neutralization by Rabbit Antiserum. M. J. Surgalla, M. S. Bergdoll and G. M. Dack .......................................................... 398

Mannitol Negative Varieties of *Shigella flexneri* Serotypes. W. H. Ewing ........................ 404

Rapid Double Diffusion Precipitin Analysis. Robert K. Jennings and Frances Malone ........... 411

Increased Susceptibility of Mice to Anaphylactic Shock Following Cobalt-60 Gamma Radiation. Richard D. Stoner and Wm. M. Hale ....................................................... 419

Separation of Hemagglutination Inhibitors for GDVII and Influenza Viruses in Normal Allantoic Fluid and Human Urine. Igor Tamm and David A. J. Tyrrell .............................. 424

**NUMBER 6, JUNE, 1954**

The Effect of a Synthetic Lysine Polypeptide upon the Velocity of Precipitation of Tobacco Mosaic Virus by Its Antiserum. M. A. Stahmann and R. E. F. Matthews ........................... 435

Precipitin Production in Chickens. XII. The Effects of Variation in Ionic Species and Concentration on Precipitate Formation. Morris Goodman, Harold R. Wolfe and Richard Goldberg 440

Anti-Virus Antibody Studies Following Induced Infection of Man with West Nile, Ilhéus and Other Viruses. Chester M. Southam and Alice E. Moore ........................... 446

On the Kinetics of Neutralization of Bacteriophage T2 by Specific Antiserum. John R. Cann and Eugene W. Clark .......................................................................... 463

The Use of the Chick in Titration of Diphtheria Antitoxin. Sara E. Branham and Marion F. Wormald .................................................................................. 478

The Inequality of Potential in Influenza Virus for Adaptation to Mice. Fred M. Davenport 485

A Sheep Erythrocyte Lysin Found in Guinea Pig Serum. Helene P. Brumfield and John D. Ross 489

Separation of Inhibitors of Hemagglutination and Specific Antibodies for Influenza Viruses by Starch Zone Electrophoresis. David A. J. Tyrrell .............................. 494

Studies on Chick-Embryo-Adapted Rabies Virus. VII. Immunological Responses of Animals to Vaccination with High Egg Passage Flury Strain. Hilary Koprowski and Jack Black 503

Kinetic Studies on Immune Hemolysis. III. Description of a Terminal Process Which Follows the Ca++ and Mg++ Reaction Steps in the Action of Complement on Sensitized Erythrocytes. Manfred M. Mayer and Lawrence Levine .............................. 511

Kinetic Studies on Immune Hemolysis. IV. Rate Determination of the Mg++ and Terminal Reaction Steps. Manfred M. Mayer and Lawrence Levine .............................. 516

Index .......................................................................................... 531
