INDEX

Absence of in vivo multiplication of poliomyelitis virus types I and II after intratesticular inoculation of monkeys and other laboratory animals, 348
Action of fat-acids on Trichomonas vaginalis, 191
Agglutinins, natural and immune, in inbred mice, for sheep and chicken red cells, 209, 216
Albumins and gamma globulins of different species, cross reaction between, 119
Allantoic fluid, normal, and human urine; separation of hemagglutination inhibitors for GDVII and influenza viruses in, 424
Anamnestic antibody responses to heterologous serum protein antigens, 179
Anaphylactic shock, fatal, in mice; inhibition of, with cortisone, 177
— — following Cobalt-60 gamma radiation, increased susceptibility of mice to, 419
Anomalies of complement function, apparent, 187
Anslow, R. O., 224
Anthrax, studies on immunity in, 263
Antibodies, neutralizing, against certain viruses in sera of residents of India, 248
—, specific, separation of inhibitors of hemagglutination and, for influenza viruses by starch zone electrophoresis, 494
— and proteins, micromethods for the study of, 360, 368
Antibody, anti-virus; studies following induced infection of man with West Nile, Ilhéus and other viruses, 446
—, appearance of, in recipients of lymph node cells, 148
— concentration, circulating, relation to localization of labeled antigen, 131
— production; cellular changes in spleen during, 39
— —, site of, in chickens, 45
— responses, primary and anamnestic, to heterologous antigens, 179
Antigen, anthrax, elaboration of, in a chemically-defined, non-protein medium, 263
— labeled, relation of circulating antibody concentration to localization of, 131
Antigenic relationships among certain arthropod-borne viruses revealed by neutralization tests, 376
— stimuli, genetic control of response to, 52
Antigens, heterologous serum protein; primary and anamnestic antibody responses to, 179
Antiphosphatase and substrate, competition for phosphatase, 1
Antiserum and living attenuated virus, in protection of animals against street strain of rabies virus, 85
Antitoxin, equine diphtheria, quantitative precipitin reaction of, 112
Anti-virus antibody studies following induced infection of man with West Nile, Ilhéus and other viruses, 446
Arthritis, rheumatoid; hemagglutination test for, 66
Arthropod-borne viruses, antigenic relationships among, as revealed by neutralization tests, 376
Attenuated rabies virus and antiserum; in protection of animals against street strain of rabies virus, 85
Bachrach, H. L., 30
—, (correction), 340
Bactericidal action, normal, of rabbit serum following X-irradiation; serological aspects of suppression of, 203
Bacteriophage T2, kinetics of neutralization of, by specific antiserum, 465
Bergdoll, M. S., 398
Black, J., 79, 85, 94, 503
Bowen, H. E., 112
Branham, Sara E., 478
Bronfenbrenner, Jacques Jacob, an appreciation, 195
Brumfield, Helene P., 393, 489
Byatt, Pamela H., 348
Calcium and magnesium reaction steps in action of complement on sensitized erythrocytes, 511
Campbell, D. H., 131
Cann, John R., 270, 465
Cellular changes in spleen during antibody production in chickens, 39
Chambers, Velma C., 348
Changes in pathogenic properties of rabies virus following prolonged cultivation in developing chick embryos, 94
Chemotherapy, experimental, of influenza viruses, 139
Chen, T. H., 282
Chick in titration of diphtheria antitoxin, use of, 478
Chick-embryo-adapted rabies virus, studies on, 79, 85, 94, 503
Ciaccio, G., 299
Clark, Eugene W., 465
Cobalt-60 gamma radiation, increased susceptibility of animals against street strain of rabies virus, 85
...
bility of mice to anaphylactic shock following, 419
Comparative characteristics of two Coxsackie viruses in tissue culture, 107
Competition between substrate and antiphosphatase, 1
Complement, a factor of, inactivated by histamine or ethylenediamine, 393
—, magnesium and calcium reaction steps in action of, on sensitized erythrocytes, 511
— function, apparent anomalies of, 187
Concentration on precipitate formation with chicken serum; effects of variation in ionic species and, 440
Cortisone, inhibition of fatal anaphylactic shock in mice with, 177
Coxsackie viruses in tissue culture, comparative characteristics of two, 107
Cross reactions between albumins and gamma globulins of different species, 119
Cytopathogenic agent from infant with disease resembling Roseola infantum, isolation of, 315
— agents isolated from patients during unusual epidemic exanthem, 307
Dack, G. M., 398
Davenport, F. M., 485
Davidsohn, I., 209, 216
Deicbmillcr, Maria P., 179
Diphtheria antitoxin, equine, quantitative precipitin reaction of, 112
—, use of chick in titration of, 478
— toxoid, effect of, on tetanus toxoid, 258
Distribution of sensitizing antibody in human serum proteins fractionated by electrophoresis-convection, 270,
Dixon, F. J., 179
Donaldson, D. M., 203
Donor system, manipulation of, in lymph node transfer of antibodies, 161
Double diffusion precipitin analysis, rapid, 411
Effect of synthetic lysine polypeptide upon velocity of precipitation of tobacco mosaic virus by its antisemum, 435
Effects of vital dyes upon experimental foot and mouth virus infection of guinea pigs, 299
— vitamin deficiencies on some physiological factors important in resistance to infection, 196
Eidam, C. R., 107
Electron microscopic identification of infectious particle of Lansing poliomyelitis virus, 30
Electrophoresis, starch zone; separation of inhibitors of hemagglutination and specific antibodies for influenza viruses by, 494
Electrophoresis-convection, distribution of sensitizing antibody in human serum proteins fractionated by, 270
Encephalitogenic factor, studies on removal of, from rabies vaccine, 236
Enders, J. F., 307, 315
Enterotoxin, staphylococcal; neutralization by rabbit antiserum, 398
Equine diphtheria antitoxin, quantitative precipitin reaction of, 112
Ercoli, N., 290
Erythrocyte lysin, sheep, found in guinea pig serum, 489
Erythrocytes, sensitized; terminal process which follows calcium and magnesium reaction steps in action of complement on, 511
Escherichia coli K suspensions, presence of H antigen in, 389
Ethylenediamine, a factor of complement inactivated by, 393
Evans, C. A., 348, 333
Ewing, W. H., 404
Exanthem, unusual epidemic; cytopathogenic agents isolated from patients during, 307
Experimental chemotherapy of influenza viruses, 139
Extraneural tissues, growth of neurotropic viruses in, 348, 353
Factor of complement inactivated by Histamine or Ethylenediamine, 393
Factors affecting the efficiency of combined prophylactics, 258
Farber, Miriam B., 148, 161
Fastier, Lyle B., 341
Fat-acids, action of, on Trichomonas vaginalis, 191
Foot and mouth virus infection of guinea pigs, experimental, effects of vital dyes upon, 299
Fraction II (gamma globulin), human, influence on hemagglutination test for arthritis reaction, 66
Frank, H. G., 191
Gajdusek, C., 224
Gamma globulin, influence of, on hemagglutination test for rheumatoid arthritis, 66
— and albumins of different species, cross reaction between, 119
Garvey, Justine S., 131
Gasparini, G., 299
Gatne, P. B., 248
GDVII and influenza viruses in normal allantoic fluid and human urine; separation of hemagglutination inhibitors for, 424
Genetic control of response to antigenic stimuli, 52
Ginsberg, Harold S., 24
Goldberg, R., 440
INDEX

Goodman, M., 440
Granoff, Allan, 322, 329
Growth of neurotropic viruses in extraneural tissues, 348, 353

H antigen in Escherichia coli K suspensions, presence of, 389
Hale, W. M., 419
Harris, Susanna, 148, 161
Harris, T. N., 148, 161
Hartman, E., 172
Hedberg, M. A., 263
Heller, Goerge, 66
Hemagglutinating components, large and small, of Newcastle disease virus, interaction of with red cells, 329
Hemagglutination and hemagglutination-inhibition reactions with tannic acid and protein-treated red blood cells, procedure and general applications of, 390
--- specific applications of, 386
--- specific antibodies for influenza viruses, separation of inhibitors of by starch zone electrophoresis, 494
--- inhibitors for GDVII and influenza viruses in normal allantoic fluid and human urine, separation of, 419
--- test for rheumatoid arthritis; influence of gamma globulin on reaction, 66
Hemagglutination-inhibition test for diagnosis of influenza, use of RDE to improve sensitivity of, 229
Hemolysins, immune, in inbred mice, for sheep and chicken red cells, 216
Hemolysis, immune; kinetic studies on, 511, 516
---, role in rickettsial toxemia of rabbits and rats, 12
Hemolytic activity of Newcastle disease virus, studies on, 322
Henle, Werner, 322, 329
Heterohemoantibodies in inbred strains of mice, 209, 216
Heterologous serum protein antigens; antibody response to, 179
Histamine, a factor of complement inactivated by, 393
Hottle, G. A., 236
Huang, Jane, 112
Hubbell, Elizabeth J., 224

--- of guinea pigs and potency control test with chick-embryo-adapted rabies virus, 79
Immunological responses of animals to vaccination with high egg passage Flury strain rabies virus, 503
Immunology and serology of Trichomonas vaginalis and T. foetus, 172
Increased susceptibility of mice to anaphylactic shock following Cobalt-60 gamma radiation, 419
India, sera of residents of; neutralizing antibodies against certain viruses in, 248
Inequality of potential in influenza virus for adaptation to mice, 485
Infection and immunity, serologic comparison of virulent and avirulent strains of plague, 282
--- in plague, studies on, 282
--- of man, induced, with West Nile, Ilhéus, and other viruses, 446
Infectivity titrations of viruses of Western equine encephalomyelitis and Newcastle disease by tissue culture methods, 341
Influenza, serologic diagnosis of, use of RDE, 229
--- and GDVII viruses in normal allantoic fluid and human urine; separation of hemagglutination inhibitors for, 424
--- virus for adaptation to mice, inequality of potential in, 485
--- viruses, experimental chemotherapy of, 139
---, production of pulmonary lesions in immunized mice, 24
---, separation of inhibitors of hemagglutination and specific antibodies for; by starch zone electrophoresis, 494
Inherent immunizability to tetanus toxoid, based on studies in pure inbred mice, 243
Inhibition of fatal anaphylactic shock in mice with cortisone, 177
Inhibitors of hemagglutination and specific antibodies for influenza viruses, separation of, by starch zone electrophoresis, 494
Interaction of large and small hemagglutinating components of Newcastle disease virus with red cells, 329
Intratesticular inoculation of monkeys and other laboratory animals; absence of in vivo multiplication of poliomyelitis virus types I and II after, 348
Ionic species and concentration of precipitate formation effects of variation in, in chicken serum, 440
Ipsen, Jr., J., 243
Isolation of cytopathogenic agent, from infant with disease resembling Roseola infantum, 315

Jacobson, A. S., 66
Jennings, R. K., 411
INDEX

Jordan, Jr., W. S., 229
Kammerer, W. H., 66
Kerr, J. A., 248
Kinetic studies on immune hemolysis, 511, 516
Kinetics of neutralization of bacteriophage T2 by specific antiserum, 463
Kolodny, M. H., 66
Koprowski, H., 79, 85, 94, 503
Lansing poliomyelitis virus, purification studies on; correction, 340
Levine, Lawrence, 258, 511, 516
Li, C. P., 123
Localization of labeled antigen, relation of circulating antibody concentration to, 131
Loveless, Mary H., 270
Lymph node cells, transfer of antibody by, 148, 161
Lysin, sheep erythrocyte, found in guinea pig serum, 489
Lysine polypeptide, the effect of synthetic, upon velocity of precipitation of tobacco mosaic virus by its antiserum, 435
Magnesium and calcium reaction steps in action of complement on sensitized erythrocytes, 511
—— terminal reaction steps, rate determination of, in immune hemolysis, 516
Makinodan, T., 39, 45
Malone, Frances, 411
Manipulation of donor system in lymph node transfer of antibodies, 161
Mannitol negative varieties of Shigella flexneri serotypes, 404
Marcus, S., 203
Matthews, R. E. F., 435
Maurer, P. H., 119, 179
Mayer, Manfred M., 511, 516
Medium, a chemically-defined, non-protein; elaboration of protective anthrax antigen in, 263
Menelasino, N. J., 172
Meyer, K. F., 282
Mice, heterohemoantibodies in, 209, 216
—— immunized, pulmonary lesions from influenza virus, 24
—— increased susceptibility of, to anaphylactic shock following Cobalt-60 gamma radiation, 419
—— inequality of potential in influenza virus for adaptation to, 485
—— pure inbred, inherent immunizability to tetanus toxoid in, 243
—— and tissue culture, serum neutralisation tests against three types of poliomyelitis virus, 123
Micromethods for study of proteins and antibodies, 360, 368
Miller, Ruth E., 1
MM and Western equine encephalitis viruses in cultures of rhesus testicular tissue, 353
Monkeys, absence of in vivo multiplication of poliomyelitis virus types I and II, after intratesticular inoculation of, 348
Moore, Alice E., 446
Mouse, fatal anaphylactic shock in; inhibition of with cortisone, 177
Nelsen, Doris J., 94
Neurotropic viruses, growth of, in extraneural tissues, 348, 353
Neutralization by rabbit antiserum; staphylococcal enterotoxin, 398
—— bacteriophage T2 by specific antiserum, kinetics of, 463
——— antigenic relationships among viruses as revealed by, 376
—— in mice and in tissue culture against poliomyelitis virus, 123
Neutralizing antibodies against certain viruses in sera of residents of India, 248
Neva, F. A., 307, 315
Newcastle disease, infectivity titrations of the virus by tissue culture methods, 341
—— virus, hemolytic activity of, 322
Newcomb, Melva D., 1
O'Leary, W. M., 196
Oseasohn, R. O., 229
Paterson, P. Y., 12
Pathogenic properties, changes in, following prolonged cultivation of rabies virus in developing chick embryo, 94
Peers, J. H., 236
Pertussis vaccine, effect of, on tetanus toxoid, 258
Phosphatase-Antiphosphatase reaction, 1
Physiological factors important in resistance, effects of vitamin deficiencies on, 196
Plague, studies on immunisation against, 282
Poliomyelitis virus, Lansing; purification studies on, 30
—— three types; serum neutralisation tests in mice and tissue culture, 123
Polley, Barbara A., 112
Potency control test, with chick-embryo-adapted rabies virus in guinea pigs, 79
Precipitate formation; effects of variation in ionic species and concentration on; in chicken serum, 440
Precipitation of tobacco mosaic virus by its antiserum, effect of synthetic lysine polypeptide upon velocity of, 435
Precipitin analysis, rapid double diffusion, 411
— production in chickens, 39, 45, 440
— reaction of equine diphtheria antitoxin, 112
Presence of H antigen in Escherichia coli K suspensions, 389
Primary and specific anamnestic antibody responses of rabbits to heterologous serum proteins, 179
Prophylactics, combined, factors affecting the efficiency of, 258
Protection of animals with antisera and attenuated virus after exposure to street strain of rabies virus, 85
Proteins and antibodies, micromethods for the study of, 360, 368
Pulmonary lesions, from influenza virus in immunized mice, 24
Purification studies on Lansing poliomyelitis virus, correction, 340
— — — — — —; electron microscopic identification of infectious particle, 30
Quantitative precipitin reaction of equine diphtheria antitoxin, 112
Rabies vaccine, studies on removal of encephalitogenic factor from, 236
— virus, chick-embryo-adapted, studies on, 79, 85, 94
— —, street strain; protection of animals with antisera and attenuated virus, 85
Rapid double diffusion precipitin analysis, 411
Rate determination of Magnesium and terminal reaction steps in immune hemolysis, 516
RDE, use of, to improve sensitivity of hemagglutination-inhibition test for diagnosis of influenza, 229
Reaction steps, terminal; rate determination of magnesium and, in immune hemolysis, 516
Red cells, sheep and chicken agglutinins and hemolysins for, in inbred mice, 209, 216
Reiner, L., 191
Relation of circulating antibody concentration to localization of labeled antigen, 131
Removal of encephalitogenic factor from rabies vaccine, 236
Resistance to infections, effects of vitamin deficiencies on physiological factors important in, 196
Rhesus testicular tissue, growth of neurotropic viruses in, 353
Rheumatoid arthritis, hemagglutination test for, 66
Rickettsial Toxins, role of hemolysis in fatal toxemia of rabbits and rats, 12
Robbins, Mary L., 139
Roseola infantum, isolation of a cytopathogenic agent from infant with disease resembling, 315
Ross, J. D., 489
Ruth, R. F., 39, 45
Sang, J. H., 52
Schaeffer, M., 123
Schapira, Ruth, 107
Schwerdt, G. E., 30
Schwerdt, G. E. (correction), 340
Sensitizing antibody, distribution of, in human serum proteins fractionated by electrophoresis-convection, 270
Separation of hemagglutination inhibitors for GDVII and influenza viruses in normal alantoic fluid and human urine, 424
— — inhibitors of hemagglutination and specific antibodies for influenza viruses by starch zone electrophoresis, 494
Sera of residents of India, neutralizing antibodies against certain viruses in, 248
Serologic comparison of virulent and avirulent strains of plague, 282
— diagnosis of influenza, use of RDE to improve sensitivity, 229
Serological aspects of suppression of normal bactericidal action of rabbit serum following whole body X-irradiation, 203
Sero- and Immunology of Trichomonas vaginalis and T. foetus, 172
Serum, serological aspects of suppression of normal bactericidal action of following X-irradiation, 203
— protein antigens, heterologous, primary and anamnestic antibody responses to, 179
— — fractionated by electrophoresis-convection, distribution of sensitizing antibody in, 270
Sevag, M. G., 1
Sheep erythrocyte lysin found in guinea pig serum, 489
Shigella flexneri serotypes, mannitol negative varieties of, 404
Slein, J. B., 263
Smadel, J. E., 12
Smith, L. W., 196

Smithburn, K. C., 248, 376
Sobey, W. R., 52
Solotorovsky, M., 177
Southam, C. M., 446
Spleen, cellular changes in, during antibody production, 39
Stahmann, M. A., 435
Staphylococcal enterotoxin: neutralization by rabbit antiserum, 398
Stavitsky, Abram B., 360, 368
Stern, Kurt, 209, 216
Stone, J. L., 258
Stoner, R. D., 419
Structure of plague bacterial cell, relation to infection and immunity, 282
Stulberg, C. S., 107
Substrate and antiphosphatase, competition for phosphatase, 1
Surgalla, M. J., 398
Takemoto, K. K., 139
Tamm, Igor, 424
Terminal process which follows calcium and magnesium reaction steps in action of complement on sensitized erythrocytes, 511
Testicular tissue, rhesus, growth of neurotropic virus in, 353
Tetanus toxoid, effect of diphtheria toxoid and pertussis vaccine on, 258
— —, inherent immunizability to, in pure inbred mice, 243
Tissue culture, comparative characteristics of two Coxsackie viruses in, 107
— — and mice, serum neutralization tests against poliomyelitis virus in, 123
— — studies of Venezuelan equine encephalomyelitis virus, 224
Titration of diphtheria antitoxin; use of chick in, 478
Tobacco mosaic virus, effect of synthetic lysine polypeptide upon velocity of precipitation of, by its antiserum, 435
Toxemia, Rickettsial, in rabbits and rats, role of hemolysis in, 12
Transfer of antibody by lymph node cells, 148, 161
Trichomonas vaginalis, action of fat-acids on, 191
— — and T. foetus, immunology and serology of, 172
Tyrrell, D. A. J., 424, 494
Uterine tissue, propagation of Venezuelan equine encephalomyelitis virus in, 224
Vaccination with high egg passage Flury strain rabies virus, immunological responses of animals to, 503
Vaccine, rabies, removal of encephalitogenic factor from, 236
Venezuelan equine encephalomyelitis virus, human tissue culture studies of, 224
Villanueva, Regina, 389
Viruses in sera of residents of India, neutralizing antibodies against, 248
Vitamin deficiencies, effect of, on factors in resistance, 196
Wertman, K., 196
West Nile, Ilhéus, and other viruses; anti-virus antibody studies following induced infection of man with, 446
Western equine encephalitis and MM virus in cultures of rhesus testicular tissue, 353
— — encephalomyelitis, infectivity titrations of the virus by tissue culture methods, 341
