CONTENTS

NUMBER 1, JANUARY 1955

The Immunologist and the Evil Spirits. Thomas P. Magill ...................................... 1

Studies on Antibacterial Factors in Mammalian Tissues and Fluids. I. A Serum Bactericidin for
Bacillus subtilis. Quentin N. Myrvik and Russell S. Weiser ..................................... 9

Studies on the Mechanism of the Immunological Paralysis Induced in Mice by Pneumococcal Poly-
saccharides. Lloyd D. Felton, Gladys Kauffmann, Benjamin Prescott and Barbara Ottinger. .... 17

A Study of Some Naturally Occurring Precipitins and Agglutinins of the Chicken: Reaction with

The Effects of PABA Derivatives on the Multiplication of Typhus Rickettsiae. Donald Greiff,
Hugh B. Donahoe, Masahiro Chiga and Henry Pinkerton ........................................ 32

Adaptation of Influenza Virus to Mice. II. Changes in the Growth Curve of an A Prime Strain of
Influenza Virus. B. A. Briody and William A. Cassel .............................................. 37

Adaptation of Influenza Virus to Mice. III. Development of Resistance to β Inhibitor. B. A. Briody,
William A. Cassel and Mary A. Medill .................................................................... 41

Tissue Tropism of a Strain of Influenza A Virus in Ferrets. John Y. Sugg and Daizo Nagaki ... 46

Quantitative Complement Fixation in Syphilis as a Statistically Controlled Assay. Otto G. Bier,
M. Siqueira and R. S. Furlanetto ........................................................................... 51

The Influence of Cortisone on Experimental Viral Infection. I. Prolongation of Survival Time and
Suppression of Inflammation in Chick Embryos Infected with Influenza B Virus. Edwin D.
Kilbourne ...................................................................................................................... 57

Strain-Specificity in Tissue Antigens of Mice. Frank L. Adler .................................. 63

The Effect of Gamma Globulin on Subclinical Infection in Familial Associates of Poliomyelitis
Cases. II. Serological Studies and Virus Isolations from Pharyngeal Secretions. Gordon C.
Brown, Alan S. Rabson and Jack S. Schieble ......................................................... 71

Production of Isohemagglutinins in Rabbits for the Determination of Normal Erythrocyte Survival
by Differential Hemagglutination. Claude-Starr Wright, Matthew C. Dodd, Bertha A.
Bouroncle and Alvinza E. Bunner ........................................................................... 81

NUMBER 2, FEBRUARY 1955

Antigenic Studies of Virus- and Trypsin-Treated Erythrocytes. John H. Wallace, Matt C. Dodd
and Claude-Starr Wright ......................................................................................... 89

Passive Cellular Transfer of Hypersensitivity to Serum Antigens in Rabbits. Mary M. Tremaine
and W. S. Jeter ........................................................................................................... 96

The Isolation and Characterization of Heat-Resistant Mutants of the Najarlan Strain of NDV.
Elise Cahn Goldman and Robert P. Hanson ............................................................. 101

Inactivation of Tobacco Mosaic Virus by Rabbit Antiserum. Irving Rappaport and Albert Siegel... 106

Development of Immunity in Mice after Vaccination with Inactivated Poliomyelitis Virus. Ulrich
Krech ............................................................................................................................ 117

Serological Relationships Between Fungi and Bacteria. I. Cross-Reactions of Sporotrichum schenckii
with Pneumococci. James M. Neill, Carlos G. Castillo and Alexander H. Pinkes .................. 120

Studies on Pneumococcal Polysaccharide. I. Biosynthesis of C¹⁴-Labeled Type I Pneumococcal
Polysaccharide. Orton K. Stark .................................................................................. 126

Studies on Pneumococcal Polysaccharide. II. Mechanism Involved in Production of "Immunological
Paralysis" by Type I Pneumococcal Polysaccharide. Orton K. Stark ............................. 130

Analysis of Pox-Virus Antigens by Means of Double Diffusion. A Method for Direct Serological
Differentiation of Cowpox. R. Gispen ......................................................................... 134

The Influence of X-Irradiation on the Passive Transfer of Tuberculin Hypersensitivity in the
Guinea Pig. Martin M. Cummings, Paul C. Hudgens, Robert A. Patnode and Solomon R.
Bersack .................................................................

Studies with Influenza Virus B of Recent Human Origin. II. Genetic Interaction with Mil Strain of Influenza B Virus. Nada Ledinko ....................................................... 380

Fall in Rectal Temperature as an Indication of Anaphylactic Shock in the Mouse. Leon S. Kind.. 387

The Interaction of Serum with Erythrocytes Modified by Newcastle Disease Virus. Alfred S. Evans ...................................................................................... 391

Immunoelectrophoretic Studies on Serum Proteins. II. Immune Sera: Antibody Distribution. Curtis A. Williams, Jr. and Pierre Grabar ................................................... 397

Immunoelectrophoretic Studies on Serum Proteins. III. Human Gamma Globulin. Curtis A. Williams, Jr. and Pierre Grabar .......................................................... 404

The Interaction of Bwamba Virus with Homologous Immune Serum. Francis L. Black and Delphine H. Clarke ......................................................................... 411

Specificity of the Secondary Response to Protein Antigens. Frank J. Dixon and Paul H. Maurer.. 418

Blood Group Factors in the Rabbit. Carl Cohen ........................................................................ 432

Influenza Virus Infection of Transplanted Tumors. II. The Relation of Host Immunity to Virus Action. Robert R. Wagner .................................................................. 439

Influenza Virus Infection of Transplanted Tumors. III. Effect of Passive Immunization on Infections of the Ehrlich Ascites Tumor. Robert R. Wagner ................................................... 446

Studies on the O Antigen of Salmonella typhosa. I. Purification of the Antigen. Marion E. Webster, Jerome F. Sagin, Maurice Landy and Arthur G. Johnson ............................................. 455

Studies on the O Antigen of Salmonella typhosa. II. Immunological Properties of the Purified Antigen. Maurice Landy, Arthur G. Johnson, Marion E. Webster and Jerome F. Sagin ............ 466

Effect of Estrogen and Cortisone on Immune Hemoantibodies in Mice of Inbred Strains. Kurt Stern and Israel Davidsohn ........................................................................ 479

Incidence of Antibodies to Salmonellae among the Population of the Bronx, N. Y. A. J. Weil and Ivan Saphra....................................................... 485

Antibodies to Shigellae in Normal Human Sera. Demonstration of Components of the Group Antigen of Shigella flexneri as the Antigens Involved. A. J. Weil and J. Felsen ................................................... 488

Mechanical Apparatus for Washing Tissue Cultures in Tubes. M. R. Hilleman and R. O. Taylor... 498

Studies on Immunization Against Plague. X. Specific Precipitation of Pasteurella pestis Antigens and Antibodies in Gels. T. H. Chen and K. F. Meyer .............................. 501
