74 (4)

J Immunol 1955; 74:255-328; ;
http://www.jimmunol.org/content/74/4.citation

This information is current as of January 14, 2018.

Why The JI?

• Rapid Reviews! 30 days* from submission to initial decision

• No Triage! Every submission reviewed by practicing scientists

• Speedy Publication! 4 weeks from acceptance to publication

*average

CONTENTS

NUMBER 1, JANUARY 1955

The Immunologist and the Evil Spirits. Thomas P. Magill ...................................... 1

Studies on Antibacterial Factors in Mammalian Tissues and Fluids. I. A Serum Bactericidin for Bacillus subtilis. Quentin N. Myrvik and Russell S. Weiser ................................ 9

Studies on the Mechanism of the Immunological Paralysis Induced in Mice by Pneumococcal Polysaccharides. Lloyd D. Felton, Gladys Kaufmann, Benjamin Prescott and Barbara Ottinger. 17

The Effects of PABA Derivatives on the Multiplication of Typhus Rickettsiae. Donald Greif, Hugh B. Donahoe, Masahiro Chiga and Henry Pinkerton .................. 32

Adaptation of Influenza Virus to Mice. II. Changes in the Growth Curve of an A Prime Strain of Influenza Virus. B. A. Briody and William A. Cassel .................. 37

Adaptation of Influenza Virus to Mice. III. Development of Resistance to ~ Inhibitor. B. A. Briody, William A. Cassel and Mary A. Medill .............................. 41

Tissue Tropism of a Strain of Influenza A Virus in Ferrets. John Y. Sugg and Daizo Nagaki .......................... 46

Quantitative Complement Fixation in Syphilis as a Statistically Controlled Assay. Otto G. Bier, M. Siqueira and R. S. Furlanetto ................................. 51

The Influence of Cortisone on Experimental Viral Infection. I. Prolongation of Survival Time and Suppression of Inflammation in Chick Embryos Infected with Influenza B Virus. Edwin D. Kilbourne ................................. 57

Strain-Specificity in Tissue Antigens of Mice. Frank L. Adler .................................. 63

The Isolation and Characterization of Heat-Resistant Mutants of the Najarlan Strain of NDV. Elise Cahn Goldman and Robert P. Hanson ................................. 101

Inactivation of Tobacco Mosaic Virus by Rabbit Antiserum. Irving Rappaport and Albert Siegel .......................... 106

Development of Immunity in Mice after Vaccination with Inactivated Poliomyelitis Virus. Ulrich Krech .......................... 117

Studies on Pneumococcal Polysaccharide. II. Mechanism Involved in Production of “Immunological Paralysis” by Type I Pneumococcal Polysaccharide. Orton K. Stark .......................... 130

The Influence of X-Irradiation on the Passive Transfer of Tuberculin Hypersensitivity in the Guinea Pig. Martin M. Cummings, Paul C. Hudgens, Robert A. Patnode and Solomon R. Bersack .................................................. 142

Studies of Rickettsial Toxins. II. Altered Vascular Physiology in Rickettsial Toxemia of Mice. L. W. Wattenberg, B. L. Elsberg, C. L. Wiseman, Jr. and J. E. Smadel .......................... 147

The Viral Range in Vitro of a Malignant Human Epithelial Cell (Strain HeLa, Gey). IV. The Cytopathogenicity of C Viruses. Richard L. Crowell and Jerome T. Syvertson .......................... 169

NUMBER 2, FEBRUARY 1955

Antigenic Studies of Virus- and Trypsin-Treated Erythrocytes. John H. Wallace, Matt C. Dodd and Claude-Starr Wright .................................................. 89

Passive Cellular Transfer of Hypersensitivity to Serum Antigens in Rabbits. Mary M. Tremaine and W. S. Jeter .................................................. 96

The Isolation and Characterization of Heat-Resistant Mutants of the Najarlan Strain of NDV. Elise Cahn Goldman and Robert P. Hanson ................................. 101

Inactivation of Tobacco Mosaic Virus by Rabbit Antiserum. Irving Rappaport and Albert Siegel .......................... 106

Development of Immunity in Mice after Vaccination with Inactivated Poliomyelitis Virus. Ulrich Krech .......................... 117

Studies on Pneumococcal Polysaccharide. II. Mechanism Involved in Production of “Immunological Paralysis” by Type I Pneumococcal Polysaccharide. Orton K. Stark .......................... 130

The Influence of X-Irradiation on the Passive Transfer of Tuberculin Hypersensitivity in the Guinea Pig. Martin M. Cummings, Paul C. Hudgens, Robert A. Patnode and Solomon R. Bersack .................................................. 142

Studies of Rickettsial Toxins. II. Altered Vascular Physiology in Rickettsial Toxemia of Mice. L. W. Wattenberg, B. L. Elsberg, C. L. Wiseman, Jr. and J. E. Smadel .......................... 147

The Viral Range in Vitro of a Malignant Human Epithelial Cell (Strain HeLa, Gey). IV. The Cytopathogenicity of C Viruses. Richard L. Crowell and Jerome T. Syvertson .......................... 169
### CONTENTS

**NUMBER 3, MARCH 1955**

- Immunologic Activity of Pneumococcal Polysaccharide Fixed in the Tissues of the Mouse. Frank J. Dixon, Paul H. Maurer and William O. Weigle. .................................................. 188
- Pneumococcal Antigenic Polysaccharide Substances from Animal Tissues. Lloyd D. Felton, Benjamin Prescott, Gladys Kauffmann and Barbara Ottinger. ................................... 205
- Resistance to Reinfection in Experimental Histoplasmosis. S. B. Salvin. ................................................................. 214
- An Agglutination Test for Bovine Q Fever Performed on Milk Samples. Lauri Luoto and Donald M. Mason. 222
- Genetic Control of Serological Specificity in Bacteriophage. Andrew R. Fodor and Mark H. Adams. ................................................................. 228
- Comparative Effects of Infection and of Immunization on Serum Glycoprotein Concentrations. Henry E. Weimer, Jean Redlich-Moshin and Eric L. Nelson. 243
- Modification of the Neurotropic Effect of Influenza Virus in Mice by Xerosin. Vincent Groupé and Ernest C. Herrmann, Jr. ................................................................. 249

**NUMBER 4, APRIL 1955**

- Donald Thomas Fraser (1888-1954) ................................................................. 255
- Effects of Antisera on Tyrosinase in Glomerella Extracts. Ray D. Owen and Clement L. Markert. ................................................................. 257
- Antibody Production by Spleen in Vitro. I. Influence of Cortisone and Other Chemicals. Isabel Morgan Mountain. ................................................................. 270
- Antibody Production by Spleen in Vitro. II. Correlation of Weight of Rabbit, Weight of Spleen, and Level of Antibody Produced in Vitro. Isabel Morgan Mountain. ................................................................. 278
- Effect of Oxytetracycline (Terramycin) on Agglutinin Titers in Guinea Pigs with Experimental Brucellosis. Charles M. Carpenter, Eric L. Nelson, Sidney J. Klein, Bruce E. Rawlings, Ruth A. Boak and Henry E. Weimer. ................................................................. 281
- An Immunogenic Antigen of Low Toxicity Derived from *Shigella sonnei*. Richard B. Johnson. ................................................................. 286
- New Tissue Culture Systems for Influenza, Newcastle Disease and Vaccinia Viruses. David A. J. Tyrrell. ................................................................. 293
- Micromethods for the Study of Proteins and Antibodies. III. Procedure and Applications of Hemagglutination and Hemagglutination-Inhibition Reactions with Bis-Diazoxy Benzidine and Protein-Conjugated Red Blood Cells. Abram B. Stavitaky and Edward R. Arquilla. ................................................................. 306
- The Preparation and Properties of Fractions of Pig Complement. II. Myron A. Leon, Otto J. Plescia and Michael Heidelberger. ................................................................. 313
- Studies on the Transfer of Lymph Node Cells. V. Transfer of Cells Incubated in Vitro with Suspensions of *Shigella paradysenteriae*. Susanna Harris and T. N. Harris. ................................................................. 318

**NUMBER 5, MAY 1955**

- Distribution of “Blocking” Antibody in Human Serum Proteins Fractionated by Electrophoresis-Convection. Mary Hewitt Loveless and John R. Cann. ................................................................. 329
- Studies of *Bacterium tularense* Antigens. I. The Isolation, Purification, and Biologic Activity of Antigen Preparations from *Bacterium tularense*. Richard A. Ormsbee, J. Frederick Bell and Carl L. Larson. ................................................................. 351
- Studies on *Bacterium tularense* Antigens. II. Chemical and Physical Characteristics of Protective Antigen Preparations. Richard A. Ormsbee and Carl L. Larson. ................................................................. 359
- Studies with Influenza Virus B of Recent Human Origin. I. Adaptation to the Mouse Lung. Nada Ledinko and Beverley Perry. ................................................................. 371
