CONTENTS

Number 1, July 1956

Effects of Trypsin and Certain Surface-Active Agents on Meningo-Pneumonitis Virus and on Normal Chorio-Allantoic Membrane Particulates. T. Timothy Crocker .................................................. 1

Growth of Histoplasma capsulatum in Normal, Superinfected and Immunized Mice. Donald A. Rowley and Margaret Huber ................................................................. 15

Immunologic Studies on Persons Residing in a Plague Endemic Area. Francis E. Payne, Joseph E. Smadel and Jean Courdurier ............................................................ 24

The Tuberculin Reaction. VI. Studies on the Effect of Tuberculin on Tissue Cultures of the Corneas of Tuberculin-Sensitive Guinea Pigs. Karl J. May and Russell S. Weiser ................... 34

Determination of Neutralizing Antibodies against Mumps Virus in HeLa Cell Cultures. Friedrich Dienhardt and Gertrude Henle ............................................................. 40

Suppressive Activity of Xerosin on Allergic and Other Inflammatory Reactions of the Skin in Guinea Pigs. Byron H. Waksman and Vincent Groupé .................................................. 47

A Quantitative Study of a Technique of Double Diffusion in Agar. John R. Preer, Jr. .................................................................................. 52

The Behavior in the Coombs Test of Anti-A and Anti-B Produced by Immunization with Various Blood Group A and B Substances and by Heterospecific Pregnancy. Frederic C. McDuffie and Elvin A. Kabat ............................................................................ 61

The Toxic Action of Preparations Containing the Oxygen-Labile Hemolysin of Streptococcus pyogenes. V. Mechanism of Refractoriness to the Lethal Effect of the Toxin. Robert Rowen and Alan W. Bernheimer ........................................... 72

Number 2, August 1956

Changes in Activity of Newcastle Disease Virus after Adaptation to Ehrlich Ascites Tissue Culture. Alice E. Moore and Leila C. Diamond ...................................................... 81

The Relationship between the Dose of Taiwan Cobra (Naja atra) and Taiwan Habu (Trimeresurus mucroestigmatus) Venom and Time of Death in Mice. Chau-Ching Lin .................... 87

Precipitin Production in Chickens. XIII. A Quantitative Study of the Effect of Simultaneous Injection of Two Antigens. Peter Abramoff and Harold R. Wolfe ........................................... 94

Use of Fallopian Tube as Source of Tissue in the Cultivation of Poliomyelitis Virus. Enriqueta Pizarro and Rodolfo Pérez-Rebelo .......................................................... 102

The Antigenicity of Polyvinyl Pyrrolidone. Paul H. Maurer ........................................................................ 105

A Study of Antigenic Relationships between Trichinella spiralis and Salmonella typhi. Lawrence M. Weiner and Stella Price ................................................................. 111

Effects of Heat on the Sensitizing and Shocking Properties of Hemophilus pertussis. Leon S. Kind .................................................................................. 115

Immunological Cross Reactions Studies by the Ouchterlony Gel Diffusion Technique. Theory and Practice. Leonhard Korngold ............................................................. 119

Number 3, September 1956

Studies of Chemotaxis in a Simple Chamber Including Observations Using Cells from Allergic Human Subjects and Their Allergens. Jeanne Montgomery Smith .................................................. 133

A Misleading “Reaction of Identity” in Agar Diffusion Precipitin Studies of Tetanus Antitoxin. Robert K. Jennings ........................................................................ 156

Antigenic Studies on the Psittacosis-Lymphogranuloma Venereum Group of Viruses. IV. Studies on Cutaneous Hypersensitivity in Chickens Infected with Ornithosis Virus. Albert A. Benedict and Clarence McFarland ................................................................. 165

Precipitin Production in Chickens. XIV. Effect of Dilution of Chicken Antisera on the Amount of Precipitation. Nazareth Gengozian and Harold R. Wolfe.. ............................................... 172
Behavior of the Rheumatoid Arthritis Agglutinating Factor with Immune Precipitates. John H. Vaughan

Serum Agar Measuring Aid (SAMA). W. G. Glenn

A Comparative Study of Methods Used for Analysis of Specific Precipitates in Quantitative Immunochrometry. F. C. McDuffie and E. A. Kabat

A Study of the Cellular Distribution of Forssman Antigen in Various Species. Nobuo Tanaka and Elizabeth H. Leduc

Number 4, October 1956

Poliomyelitis Virus in the Central Nervous Systems of Mice During Prolonged Incubation Periods. C. A. Evans and K. R. Cundy

A Comparative Study of Type 2 Poliomyelitis Viruses. II. Antigenic Differences Relating to 18 Type 2 Strains. Herbert A. Wenner, Paul Kamitsuka and Margaret Lenahan

Flocculation Tests for Brucellosis. Charles A. Hunter and Bernice Colbert

Experiments on Adsorption in vitro of Type II Poliomyelitis Virus on Red Cells. Gonzalo Bautista, Jr., Claus W. Jungeblut and Helen Kodza

Agglutinin Production in Normal, Sublethally Irradiated, and Lethally Irradiated Mice Treated with Mouse Bone Marrow. Takashi Makinoda, Nazareth Gengozian and Charles C. Congdon

Studies of the Immunochrometry of Leptospires. Nathaniel Rothstein and C. W. Hiatt

The Effect of Whole Body X-Irradiation of Mice on Immunity to Tetanus Toxoid. II. The Delayed Immune Response to Injections of Tetanus Toxoid. Myron S. Silverman and Paul H. Chin

Characteristics of the New Respiratory Viruses (Adenoviruses). I. Qualitative and Quantitative Aspects of the Neutralization Reaction. Harold S. Ginsberg

The Detection of Antibodies in Hayfever Sera by Means of Hemagglutination. Richard J. Feinberg, Joan D. Davison and John A. Flick

Number 5, November 1956

Purification of Kidney Components Capable of Neutralizing Kidney Localizing Anti-Rat Kidney Antibodies. Yasuo Yagi, Leonhard Kornegold and David Pressman

A Capillary-Tube Test for Antibody against Coxiella burnetii in Human, Guinea Pig, and Sheep Sera. Lauri Luoto

The Presence of Forssman Antigen in Inbred Mice. Kurt Stern and Israel Davidsohn

Neutralizing Antibodies to Arthropod-Borne Viruses in Human Beings and Animals in the Union of South Africa. R. H. Kokernot, K. C. Smithburn and M. P. Weinbren

Vaccination against Smallpox. I. Lyophilized Vaccinia Virus from Infected Chorio-Allantoic Membranes. Elizabeth B. Jackson, Anita C. Ley, Leonard N. Binn and Joseph E. Smadel

Vaccination against Smallpox. II. Jet Injection of Chorio-Allantoic Membrane Vaccine. Bennett L. Elisberg, Jack M. McCown and Joseph E. Smadel

Studies of Anti-Horse Crystalbumin Sera. II. The Inhibitory Effect of Excess Antigen in Heterologous Optimal Proportions Titrations. G. R. E. Naylor and M. E. Adair

The J Substance of Cattle. III. Seasonal Variation of the Naturally Occurring Isoantibodies for the J Substance. W. H. Stone

Number 6, December 1956

Heterogeneity in Extent of the Combining Regions of Human Antidextran. Elvin A. Kabat

Studies on Newcastle Disease Virus (Miyadera Strain). Masao Tokuda

Electrophoretic and Ultracentrifugal Studies of Rabbit Hemolysins. Peter Stefos

A "Hemolyisin" Associated with Leptospires. Catherine M. Russell

The Effect of Cobalt-60 Gamma Radiation on Tetanus Antitoxin Formation in Mice. William M. Hale and Richard D. Stoner
