The Journal of Immunology is published twice each month by The American Association of Immunologists, Inc., 1451 Rockville Pike, Suite 650, Rockville, MD 20852 All rights reserved. Print ISSN: 0022-1767 Online ISSN: 1550-6606.
CONTENTS

NUMBER 1, JANUARY, 1957

Serial Determinations of Serum Glycoproteins Following Antigen Injection into Previously Immunized Animals. Henry E. Weimer, Jean Redlich-Moshin, Frances A. Quinn and Eric L. Nelson ................................................................. 1

Antigen-Antibody Reactions in Agar. III. Rate of Change of Band Migration with Antigen Concentration. J. C. Neff and Elmer L. Becker ......................................................... 5

Immunologic Differences Between the 19 S and 7 S Components of Normal Human γ-Globulin. E. C. Franklin and H. G. Kunkel ................................................................. 11

Quantitative Studies of Lipid-Soluble Tissue Antigens as Exemplified by the Wassermann Antigen-Antibody System. I. Estimation of the Wassermann Antibody in Absolute Weight Units. Abraham G. Osler and Eleanor A. Knipp ................................................................. 19

Quantitative Studies of Lipid-Soluble Tissue Antigens as Exemplified by the Wassermann Antigen-Antibody System. II. Comparative Studies with Mammalian and Plant Tissue Phospholipids. Abraham G. Osler and Eleanor A. Knipp ................................................................. 30

Comparison of Antibody Responses Associated with the Transfer of Rabbit Lymph-Node, Peritoneal Exudate and Thymus Cells. Frank J. Dixon, William O. Weigle and James C. Roberta ................................................................. 56

Behavior of Monkeys After Inoculation of Virus Derived from Patients with Measles and Propagated in Tissue Culture Together with Observations on Spontaneous Infections of These Animals by an Agent Exhibiting Similar Antigenic Properties. Thomas C. Peebles, Kevin McCarthy, John F. Enders and Ann Holloway ................................................................. 63

NUMBER 2, FEBRUARY, 1957

Localizing Properties of Anti-Placenta Serum. David Pressman and Leonhard Kornegold ................................................................. 75

The Cytotoxic Activity of Rabbit Immune Globulin Prepared from Tissue Cultures of Human Skin and Whole Human Placenta. C. Andrew Bassett, Dan H. Campbell, Virginia J. Evans and Wilton R. Earle ................................................................. 79

Intracellular Localization of Tobacco Mosaic Virus in Mouse Liver. John O. Erickson, Thomas J. Hensley, Max Fields and Raymond L. Libby ................................................................. 94

Antiviral Activity of Dicarbonyls and Related Compounds in Embryonated Eggs. William F. McLimans, G. E. Underwood, E. A. Slater, E. V. Davis and R. A. Siem ................................................................. 104

The Influence of Colostrum on Antibody Response in Baby Pigs. Alvin B. Hoerlein ................................................................. 112

Studies of Complement-Fixing and Neutralizing Antibodies Against Certain Adenoviruses. Sidney Katz, William S. Jordan, Jr., George F. Badger and John H. Dingle ................................................................. 118

Effects of Roentgen Radiation and Cortisone on Susceptibility of Mice to Candida albicans. F. J. Roth, Jr., Jack Friedman and J. T. Syverton ................................................................. 122

Morphologic Characteristics of Plaques Produced on Monkey Kidney Monolayer Cultures by Enteric Viruses (Poliomyelitis, Coxsackie and Echo Groups). G. D. Hsiung and Joseph L. Melnick ................................................................. 128

Comparative Susceptibility of Kidney Cells from Different Monkey Species to Enteric Viruses (Poliomyelitis, Coxsackie and Echo Groups). G. D. Hsiung and Joseph L. Melnick ................................................................. 137

NUMBER 3, MARCH, 1957

Aspects of the Immune Hemolytic Reaction. I. Dependence of the Extent of Hemolysis on Concentrations of Reactants. O. J. Plescia, K. Amiraian and M. Heidelberger ................................................................. 147

Aspects of the Immune Hemolytic Reaction. II. Effect of Composition of C′ on Concentration Dependence in Immune Hemolysis. O. J. Plescia, K. Amiraian and M. Heidelberger ................................................................. 151

In vitro Bactericidal Activity of Blood for Pasteurella tularensis. William G. Stanziola ................................................................. 156

Microscopic Characteristics of Colonies of Shigella flexneri 2a and 2b and their Relation to Antigenic Composition, Mouse Virulence and Immunogenicity. Merlin L. Cooper, Helen M. Keller and Edward W. Walters ................................................................. 160

The Effect of the Antigen’s Molecular Weight on the Curvature of the Precipitin Line in the Ouchterlony Technic. Leonhard Kornegold and Gerda van Leeuwen ................................................................. 172
The Quantitative Precipitin Reaction of Type 19 M Protein Antigen of Group A Streptococci and Antistreptococcal Rabbit Sera. Willard C. Schmidt ........................................ 178
Studies of Anti-Horse Crystalbumin Sera. III. The Heterologous Reactions with Human Serum Albumin and Bovine Serum Albumin. G. R. E. Naylor and M. E. Adair ....................... 185
The Number of Allantoic Cells in the Chick Embryo. H. J. F. Cairns and S. Fazekas de St. Groth. 191
Antibody Formation after Injection of Heterologous Immune Globulin. II. Competition of Antigens. Frank L. Adler ........................................................................ 201
Hemaggulutination with Herpes Simplex Virus. L. Vernon Scott, Frances G. Felton and Jack A. Barney ................................................................. 211

NUMBER 4, APRIL, 1957

Hemaggulutinins in Extracts of Israeli Plants. U. Bachrach, J. Gurevitch and D. Zaitschek........ 229
The Behavior of Influenza Viruses in Various Tissue Culture Systems. Irving J. Green, Melvin Lieberman and William J. Mogabgab. 233
The Antibody-Antigen Reaction. An Hypothesis to Account for the Presence of Uncombined Antigenic Sites in the Presence of Excess Antigen. Irving Rappaport. 246
The Kinetics of Antibody Inactivation of Tobacco Mosaic Virus. Irving Rappaport. 256
Immunization Studies on Listeriosis in Mice. John W. Osebold and Mary T. Sawyer 262
An Indirect Hemaggulutination Test for Hydatid Disease. Garabed A. Garabedian, Robert M. Matossian and Aida Y. Djanian 269
Influence of Normal Animal Sera on Influenza Viruses in Cultures of Trypsin-Dispersed Monkey Kidney Cells. Claudia Henry and J. S. Youngner 273
Thermal Inactivation Studies with Different Strains of Poliovirus. J. S. Youngner 282
Observations on a Qualitative Difference Between the Antibody of Primary and Secondary Response. W. D. Foster 291
The Preparation and Properties of Purified Anti-Hapten Antibody. Fred Karush and Robert Marks 296

NUMBER 5, MAY, 1957

The Early Phase of the Antibody Response. John M. McKenna and Kingsley M. Stevens...... 311
The Measurement of the Response of Immunized Mice to Infection with Mycobacterium Tuberculosis var. moffinisi. Guy P. Youmans and Anne S. Youmans. 318
Studies with Measles Virus. I. Propagation in Different Tissue Culture Systems. Gisela Ruckle 330
Studies with Measles Virus. II. Isolation of Virus and Immunologic Studies in Persons Who Have Had the Natural Disease. Gisela Ruckle and Kenneth D. Rogers 341
Serologic Comparisons with Lines of Influenza Virus Isolated and Serially Transferred in Different Experimental Hosts. Keith E. Jensen, Elva Minuse and Thomas Francis, Jr. 356
Comparative Measurements of Antigenic Differences among Human and Swine Influenza Viruses. Keith E. Jensen and Ward D. Peterson, Jr. 365
Immunologic Significance of Antigenic Differences among Strains of Influenza A Isolated during the Same Epidemic. Keith E. Jensen 373
Indirect Hemaggulutination Studies on Salmonellosis of Chickens. John McNiel Sieburth 380
Homologous and Heterologous Resistance in Mice Given Bacterial Endotoxins. Robert S. Abernathy 387
Integration of Human Serum and Serum Fraction Diffusion Patterns. A Study of Zonal Characteristics and Complex Reactions. William G. Glenn and Anna C. Garner .......................... 395
Precipitin Production in Chickens. XV. The Effect of Aging of the Antisera on Precipitate Formation. Nazareth Gengozian and Harold R. Wolfe ........................................... 401
Interaction between Internally Labeled Complement and Specific Precipitates. Nathan Penn, Felix Haurowitz and Mutahhar Yenson .................................................. 409
Studies on the Hemagglutinin of Infectious Canine Hepatitis Virus. Lyle B. Fastier ........ 413
Cross Reactions of Polyglucoses in Antipneumococcal Sera. III. Reactions in Horse Sera. Michael Heidelberger, Hans Jahrmärker, Bertil Björklund and John Adams ....... 419
Cross Reactions of Polyglucoses in Antipneumococcal Sera. IV. Precipitation in Rabbit Antisera to Type IX and Type XII Pneumococcus. Michael Heidelberger, Hans Jahrmärker and Felix Cordoba ................................................................. 427
The Purification of Poliomyelitis Virus as Studied by Complement Fixation. Manfred M. Mayer, Herbert J. Rapp, Bernard Roizman, S. Wayne Klein, Keith M. Cowan and David Lukens ...... 435
Reactivity of Influenza A and B Viruses Propagated in Cultures of Human Embryo Tissues and in the Chick Embryo. Georgie I. Simpson and William J. Mogabgab .......... 456
Demonstration of Antigenic Relationship between Mumps Virus and Hemagglutinating Virus of Japan. Joseph L. DeMeio and Duard L. Walker ............................... 465
A Study of Experimental Encephalomyelitis Employing Mammalian and Nonmammalian Nervous Tissues. Philip Y. Paterson .......................................................... 472
Effective Passive Immunization of Mice Twelve Days after Intracerebral Inoculation of Type 2 Poliovirus. C. A. Evans, Velma C. Chambers, Susumu Hotta and E. M. Wood ............ 476
