CONTENTS

NUMBER 1, JANUARY 1958

The Isolation in Tissue Culture, Chick Embryo and Suckling Mice of Filtrable Agents from Healthy Dairy Cattle. Calvin M. Kunin and Elva Minuse ................................................................. 1

Tissue Culture Studies of Cellular Hypersensitivity in Rheumatic Fever. I. The Response of Human White Blood Cells to Streptococci and to Crude Filtrates of Streptococcal Cultures. Lloyd Florio, Gertrud Weiss and Gladys K. Lewis .......................................................... 12

Tissue Culture Studies of Cellular Hypersensitivity in Rheumatic Fever. II. The Response of Fibroblasts from Human Skin and Heart to Disintegrated Streptococci and to Crude Filtrates of Streptococcal Cultures. Gertrud Weiss, Lloyd Florio and Gladys K. Lewis ............................................. 26

Tissue Culture Studies of Cellular Hypersensitivity in Rheumatic Fever. III. A Reexamination of Tuberculin Hypersensitivity in Tissue Culture by a Study of the Response to Old Tuberculin of Human White Blood Cells and Fibroblasts from Human and Guinea-pig Skin. Lloyd Florio, Gladys K. Lewis, Gertrud Weiss and Howard Olson .................................................. 32

Factors Influencing Host-Virus Interactions. III. Further Studies on the Alteration of Coxsackie Virus Infection in Adult Mice by Environmental Temperature. Duard L. Walker and William D. Boring .............................................................. 39

Adsorption, Multiplication and Cytopathogenicity of Enteroviruses (Poliomyelitis, Coxsackie and Echo Groups) in Susceptible and Resistant Monkey Kidney Cells. G. D. Hsiung and Joseph L. Melnick .......................................................... 45

Antigenic Analyses of Influenza Viruses by Complement Fixation. I. The Production of Antibodies to the Soluble Antigen in Guinea Pigs. Florence S. Lief, Akinyele Fabiyi and Werner Henle......................................................... 53

The Effects of Antibiotics on Enterobacterial Lipopolysaccharides (Endotoxins), Hemagglutination and Hemolysis. E. Neter, E. A. Gorzynski, O. Westphal and O. Lüderitz .............................................. 66

Influences upon the Agglutinability of Rabbit Erythrocytes in the Presence of Iso-Antibody: Genetic Factors. Carl Cohen ........................................................................ 73

NUMBER 2, FEBRUARY 1958

Inhibition of Rh(D) Antibody by Eluates from Rh(D) Erythrocytes Treated with Mumps Virus or the Periodate Ion. Nancy J. Bigley, Robert W. Chandler and Matthew C. Dodd .......................................................................................................................... 85

A Passive Hemagglutination Reaction for Psittacosis. Albert A. Benedict and Edith O’Brien ......................................................... 94

The Reversible and Irreversible Toxic Effects of Anti-HeLa Cell Rabbit Serum upon Human Cell Lines in Tissue Culture. Gerald Goldstein and Quentin N. Myrvik ....................................................... 100

Epidemiologic Implications of the Distribution by Age of Antibody Response to Experimental Influenza Virus Vaccines. Albert V. Hennessy and Fred M. Davenport .................................................. 114

Staining of Complement and Modifications of Fluorescent Antibody Procedures. R. A. Goldwasser and C. C. Shepard .............................................................................................................. 122

In Vitro and in Vivo Studies on a Tissue Culture Cell Line Derived from Normal Monkey Heart. L. L. Coriell, R. M. McAllister, A. Greene, W. Flagg, M. Tall and B. Wagner ........................................................................ 142

NUMBER 3, MARCH 1958

The “Protection” of Sensitized A and B Red Cell Antigens by Water-Soluble A and B Substances. G. H. Vos and R. L. Kirk ........................................................................................................ 149

The Demonstration of Two Systems Affecting Blood Leukocytes in the Hypersensitive State with Associated Inflammation. John D. Hartman ......................................................... 159

The In Vitro Quantitative Relationship between Two Systems Affecting Blood Leukocytes in Inflammatory Hypersensitivity Reactions Resulting from Different Antigens. John D. Hartman and Kenneth M. Schreck
The Reaction of Dog Intestinal Phosphatase with Its Antibodies in the Region of Excess Antibody. Max Schlamowitz

On Goldberg's Theory of the Precipitin Reaction. G. S. Watson

Studies on Hemagglutination with Herpes Simplex Virus. I. Adsorption Studies as Evidence that the Antigen-Antibody Reaction is Specific and the Neutralizing and Hemagglutinating Antibodies are Identical. Frances G. Felton and L. Vernon Scott

Relation of Primary Antigen Injection to Time of Irradiation on Antibody Production in Mice. Nazareth Gengozian and Takashi Makinodan

Antigenicity of Combined β-Propiolactone and Ultraviolet Inactivated Virus Vaccines. Gerald A. LoGrippo

Effects of Certain Antirheumatic Antigens on Experimental Malaria and Trypanosomiasis in Mice. Frans C. Goble, James L. Boyd and Ira Singer

The Neutralization of Animal Viruses. II. A Critical Comparison of Hypotheses. S. Fazekas de St. Groth and A. F. Reid

Effect of Formalin on in Vitro and in Vivo Antigenicity of Clostridium perfringens Type D β-Toxin. L. F. Schuchardt, J. Munoz and W. F. Verwey

Heat Labile Tissue α-Globulin and Its Relationship to the Latex Fixation Test. J. D. Gray, Carl Tupper and J. A. Rowse

Inactivation of Complement by Egg Albumin—Rabbit Antiegg Albumin. I. Differences Depending upon the Species of Complement. G. Cavallo, O. J. Plescia and M. Heidelberger

Immunologic Studies of Heart Tissue. I. Production in Rabbits of Antibodies Reactive with an Autologous Myocardial Antigen following Immunization with Heterologous Heart Tissue. Melvin H. Kaplan

Immunologic Studies of Heart Tissue. II. Differentiation of a Myocardial Sarcoplasmic Antigen and Cardiolipin. Melvin H. Kaplan

Treatment of Poliomyelitis in Monkeys with Hyperimmune Rabbit Γ-Globulin. Lloyd G. Colio, Benjamin R. Criley and Lewis L. Coriell

Effect of Sodium Bicarbonate Concentration on Plaque Formation of Virulent and Attenuated Polioviruses. G. D. Hsiung and Joseph L. Melnick

The Use of Antigen-Coated Glass as a Specific Adsorbent for Antibody. G. Bonar Sutherland and Dan H. Campbell

Studies on the Transfer of Lymph Node Cells. IX. The Use of Dialysates of Shigella-Trypsin Filtrates for in Vitro Incubation with Lymph Node Cells. T. N. Harris, Susanna Harris, Clifton A. Ogburn and Miriam B. Farber

Studies on the Transfer of Lymph Node Cells. X. Estimation of Amounts of Shigella-Trypsin Antigen Associated with the Lymph Node Cells during in Vitro Incubation. Susanna Harris and T. N. Harris

Interaction of Nuclei and Globulin from Lupus Erythematosus Serum Demonstrated with Fluorescent Antibody. George J. Friou, Stuart C. Finch and Katherine D. Detre

Effect of Formalin on in Vitro and in Vivo Antigenicity of Clostridium perfringens Type D β-Toxin. L. F. Schuchardt, J. Munoz and W. F. Verwey

Heat Labile Tissue α-Globulin and Its Relationship to the Latex Fixation Test. J. D. Gray, Carl Tupper and J. A. Rowse

Inactivation of Complement by Egg Albumin—Rabbit Antiegg Albumin. I. Differences Depending upon the Species of Complement. G. Cavallo, O. J. Plescia and M. Heidelberger

Immunologic Studies of Heart Tissue. I. Production in Rabbits of Antibodies Reactive with an Autologous Myocardial Antigen following Immunization with Heterologous Heart Tissue. Melvin H. Kaplan

Immunologic Studies of Heart Tissue. II. Differentiation of a Myocardial Sarcoplasmic Antigen and Cardiolipin. Melvin H. Kaplan

Treatment of Poliomyelitis in Monkeys with Hyperimmune Rabbit Γ-Globulin. Lloyd G. Colio, Benjamin R. Criley and Lewis L. Coriell

Effect of Sodium Bicarbonate Concentration on Plaque Formation of Virulent and Attenuated Polioviruses. G. D. Hsiung and Joseph L. Melnick

The Use of Antigen-Coated Glass as a Specific Adsorbent for Antibody. G. Bonar Sutherland and Dan H. Campbell

Studies on the Transfer of Lymph Node Cells. IX. The Use of Dialysates of Shigella-Trypsin Filtrates for in Vitro Incubation with Lymph Node Cells. T. N. Harris, Susanna Harris, Clifton A. Ogburn and Miriam B. Farber

Studies on the Transfer of Lymph Node Cells. X. Estimation of Amounts of Shigella-Trypsin Antigen Associated with the Lymph Node Cells during in Vitro Incubation. Susanna Harris and T. N. Harris

Interaction of Nuclei and Globulin from Lupus Erythematosus Serum Demonstrated with Fluorescent Antibody. George J. Friou, Stuart C. Finch and Katherine D. Detre

In Vitro uptake by Rat-Tissue Homogenates of Radioiodinated Purified Antirat-Organ Serum. Richard Moore

Studies of the Inactivation of Phage by the Properdin System. I. Evidence for Complement, Properdin and Magnesium Requirements. James L. Barlow, Helen Van Unaklis and Lawrence Levine

Studies of the Inactivation of Phage by the Properdin System. II. Quantitative Assay of Phage-Neutralizing Activity. James L. Barlow, Helen Van Unaklis and Lawrence Levine

A Comparative Study of the Growth of Vesicular Stomatitis Virus in Five Tissue Culture Systems. Mary E. McClain and Adeline J. Hackett
Leukocytic Transfer of Delayed Sensitivity to Normal Guinea Pigs from Rats Infected with *Mycobacterium lepraemurium*. John H. Wallace .................................................. 362

Development of Tetanus in Parabiotic Rats. Diana B. Schellenberg and Howard A. Matzke .......... 367

Aspects of the Immune Hemolytic Reaction. IV. Inhibition of Hemolysis by the Reaction Products. O. J. Plescia, G. Cavallo, K. Amiraian and M. Heidelberger ........................................ 374

Inactivation of Complement by Egg Albumin-Rabbit Antiegg Albumin. II. Inhibition by Serum Constituents. G. Cavallo, O. J. Plescia and M. Heidelberger ................................ 382

Imunochemical Studies of Poliovirus: II. Kinetics of the Formation of Infectious and Noninfectious Type I Poliovirus in Three Cell Strains of Human Derivation. Bernard Roizman, Walter Hopken and Manfred M. Mayer ................. 386

Hemagglutination tests with *Ascaris* Antigens. Irving G. Kagan ................................ 396

**NUMBER 6, JUNE 1958**

Louis Pillemer, 1908–1957 ...................................................................... 415

Heterogeneity and Average Combining Constants of Antibodies from Individual Rabbits. Alfred Nisonoff and David Pressman ........................................................ 417

The Effect of Feeding Simple Chemical Allergens to Pregnant Guinea Pigs upon Sensitizability of Their Offspring. Rudolf L. Baer, Stanley A. Rosenthal and Blanka Hagel ........................................ 429

Purification of the Toxin of *Pasteurella Pestis* by Continuous-Flow Paper Electrophoresis. Martin L. Spivack and Arthur Karler ................................................... 441

An Intra cellular Mortality-Enhancing Material from *Malleomyces pseudomallei*. Monica Lusby and H. B. Levine .............................................................................. 446

Elimination of Nonspecific Components from Viral Antigens by Fluorocarbon. Vincent V. Hamparian, Ferdinand Müller and Klaus Hummeler ........................................ 468

Identification of the Nuclear Component of the Interaction of Lupus Erythematosis Globulin and Nuclei. George J. Friou ................................................................. 476
