Over the years, products are known by the company they keep. Through these past 20 years, the Rockland customer list reads like a "Who's Who" in American research.

To achieve such a reputation requires consistent formulation of highest quality ingredients, blended to prescription accuracy, combined with rigid quality control procedures. Assay before release assures complete freedom from antibiotic activity and Diethylstilbestroh.

For the investigator or breeder who demands superior quality in his working materials, Rockland Laboratory Animal Stock Diets is the only choice.
