THE JOURNAL OF IMMUNOLOGY

Information for Contributors

Manuscripts should be carefully revised and the original should be sent to

Dr. John Y. Sugg
Journal of Immunology
Cornell Medical College
1300 York Ave.
New York 21, N. Y.

Authors will be charged for space in excess of 10 printed pages and also for all illustrations and tabular or graphic matter in excess of 10 per cent of the pages in each article.

Reprints must be ordered in advance. A table showing cost of reprints, with an order slip, is sent with proof. Orders for purchased reprints must be limited to 1,000 copies. The invoice for reprints will also include charges for illustrations, excess pages and tabular matter, if any.

Instructions for the Preparation of Manuscript

Copy should be typed double-spaced on one side only of 8½ x 11 paper. Even material that is to be set in a type size smaller than that of the main text (footnotes, references, etc.) should be double-spaced.

The author should supply a short title for use as a running head. This should be typed on a separate sheet as the first page of manuscript. Type the complete title of the article on a second sheet, and the authors' names and affiliations on a third sheet. All material that is to be set in a type size different from that of the main text should be typed on separate sheets. This includes tabular matter, case histories, quotations, formulas and other subsidiary matter in the text, footnotes, bibliographies, and legends for illustrations. Displayed formulas which are to be built up to more than one line of type, even if they are the same size type as the text, should be on a separate page. Legends should not be attached to or written on the illustration copy. Positions for tables and figures in the text may be indicated in the margin of the text page.

Manuscripts that do not conform to these instructions will be cut and rearranged so that the matter to be set in different sizes of type can be separated.

Galley proof. Authors will receive galley proofs of their papers set separately as outlined above. Galleys will be arranged in the following order: tables, running heads, footnotes, figure legends, text, bibliography. All material that has been cut from the body of the text will be inserted in its proper place in the galleys. This includes formulas, quotations, case histories, and other subsidiary matter. Manuscript will be arranged in this order: formulas, tables, footnotes, figure legends, text inserts including bibliography, text.

Illustrations. Copy for illustrations should be unmounted glossy photographs clearly identified as to number, author's name, and top of figure in soft crayon on the back. Graphs should be in India ink on bluelined paper. If larger than 9 x 12", they must be accompanied by glossy photographs within this size.
How Today's Busy Physicians Can Help to Prevent and Control Infectious Diseases

Just Published! New 4th Edition
Top COMMUNICABLE AND INFECTIONous DISEASES

Diagnosis * Prevention * Treatment

A few years ago many physicians believed that they would never again hear a statement like "Hospitals are dangerous places to go." They thought that because medical research had discovered antibiotics, vaccinations and inoculations for many of the communicable and infectious diseases, final conquest was nearly in sight. From the rising menace of staphylococcus in hospitals, and the recent, milder yet nonetheless serious outbreaks of Asian flu and other viral infections in many parts of the country, they know the job is not yet done.

How, as a practical matter, can today's overworked physician prevent communicable and infectious diseases? What can he do to treat and control them?

Medicine is at a crossroads today. Many noted physicians like Franklin H. Top, M.D. and other specialists in this field are going back to the fundamentals to develop a better understanding of the nature and the principles of control of contagion.

You can review these fundamentals and learn the most modern methods of diagnosis, prevention and treatment from Dr. Top and his 21 eminent collaborators in the completely revised and modernized new 4th edition of their book, COMMUNICABLE AND INFECTIOUS DISEASES.

Reflecting the remarkable changes that have occurred in this field during the past five years, this new 4th edition is comprehensive and is not limited to a few common communicable or infectious diseases; it stresses all the clinical, nursing and control measures. Furthermore, this book has been completely redesigned and rewritten. It has a new taller page format and more legible typography which contribute much to making this comprehensive reference a more practical and usable volume. The first section discusses principles of immunity, host resistance, epidemiology, preventive methods and the use of antibiotics and chemotherapy, including management of communicable diseases in the home and hospital. The second section describes diagnosis, prevention, control and management of 67 diseases, including those of childhood, and groups them by portals of entry. The book contains an up-to-date glossary, excellent bibliography and probably the most complete index of any book in the field.

The C. V. MOSBY Company
3207 Washington Boulevard, St. Louis 3, Missouri

Please send me on 10 Day Approval a copy of Top, COMMUNICABLE AND INFECTIOUS DISEASES, priced at $20.00. I understand that if I am not completely satisfied I can return it within 10 days with no charge or obligation. I realize that if I enclose remittance with this order, I'll save the mailing charges.
