Over the years, products are known by the company they keep. Through these past 20 years, the Rockland customer list reads like a "Who's Who" in American research.

To achieve such a reputation requires consistent formulation of highest quality ingredients, blended to prescription accuracy, combined with rigid quality control procedures. Assay before release assures complete freedom from antibiotic activity and Diethylstilbestrol.

For the investigator or breeder who demands superior quality in his working materials, Rockland Laboratory Animal Stock Diets is the only choice.

THE JOURNAL OF IMMUNOLOGY

Information for Subscribers

Published monthly, beginning January, 1929. (From 1916-1925, and in 1928 Volumes I-X, inclusive, and Vol. XV published bi-monthly.)

The subscription price is $15.00 per year. For countries outside the U. S., add $1.50 per year for additional postage, except Canada. Canadian postage: add $.50 per year. Single copies, when available, are $1.50, plus $.25 postage outside U. S. A. The subscriptions of members of the American Association of Immunologists are included in the membership dues and are handled by the Association's Treasurer, Dr. Calderon Howe, Columbia University College of Physicians and Surgeons, New York, N.Y. All other subscriptions should be sent to the publishers.

Change of address: Publisher must be notified 60 days in advance. Journals undeliverable because of incorrect address will be destroyed. Duplicates can be obtained (if available) from the publisher at the regular price of single issues.

New subscriptions and renewals are entered to begin with the first volume of the year when subscription is received. Should any issue of the current volume be out of print at the time the subscription order is received, the pro-rata value of such numbers will be refunded to the subscriber.

Subscriptions should be renewed promptly: To avoid a break in your series, subscriptions should be renewed promptly. The publishers cannot guarantee to supply back issues on belated renewals.

Correspondence concerning all business matters should be addressed to

BALTIMORE 2, MARYLAND, U. S. A.
"A number of diseases resulting from bacterial or viral infection can now be prevented by means of vaccines and toxoids, and the problem of administering these to the best advantage, and with the least inconvenience to the recipients, has become complex and difficult. The time has come to assess all the evidence which has accumulated, and to attempt to reach agreement on certain basic principles which must be observed in all inoculation schedules. The Symposium was organized with this object in view.

"Taking part in the Symposium were representatives of all sections of the profession interested in the subject—medical officers of health, school medical officers, general practitioners, pediatricians, epidemiologists, statisticians, representatives from infectious diseases hospitals, from the laboratories, from interested departments overseas....

"The first session was devoted to consideration of the complications and side-effects which occasionally result from one or other of the immunization processes, such as provocation poliomyelitis, encephalopathy occurring after the administration of pertussis vaccine, and generalized vaccinia and encephalitis resulting from smallpox vaccination....

"In subsequent sessions, dealing with the different procedures which are now recommended and commonly practiced, opening and supporting papers were presented by those having special and in many cases unique experience.

"In the end... it was unanimously agreed to recommend the modified schedules (of immunization), a recommendation which, in view of the status of those who took part in the Symposium, must be regarded as giving authoritative guidance to those concerned.

"A final recommendation, well worthy of implementation, was that a representative body be set up to keep the problems of immunization under review and to make from time to time such recommendations as might be rendered necessary by advancing knowledge."—From the Foreword by Brigadier Sir John Boyd, O.B.E., F.R.S.
