CONTENTS

NUMBER 1, JANUARY 1961

A Biologic Comparison of Two Strains of Herpesvirus hominis. T. F. McNeil. Scott, D. L. McLeod and T. Tokumaru .......................................................... 1

Mortality Patterns and Antibody Response in Chicks Inoculated with Eastern Equine Encephalomyelitis Virus. Robert J. Byrne and Mary Louise Robbins ....................... 13

Precipitins against Pasteurella pestis in Normal and Antibacterial Sera. Daniel M. Eisler and Eleanor von Metz ............................................................... 17

Dissociation of Infective Poliomyelitis Virus from Neutralizing Antibody by Fluorocarbon. Albert Ketler, Yorio Hinuma and Klaus Hummeler ...................... 22

Immunization of Mice with Viable Coccioides immitis. D. Pappagianis, H. B. Levine, C. E. Smith, R. J. Berman and G. S. Kobayashi ...................... 28

Specific Anion Effects with Antibenzolate Antibody. David Pressman, Alfred Nisonoff and Gerald Radsinski .......................................................... 35

Studies on Hemagglutination with Herpes Simplex Virus. II. The Factors Involved in the Technique. Frances G. Felton and L. Vernon Scott ......................... 42

Changes in Immunity and Antitoxin Level Immediately after Secondary Stimulus with Tetanus Toxid in Rabbits. Johannes Ipen .............. 50

Antigenic Relationships between Polymorphic and Monomorphic Strains of the Brucella Group Trypanosomes. R. S. Desowitz .......................................................... 69

The Effect of Zymosan on the Phagocytosis of Foreign Erythrocytes. John L. Cutler ...... 73

In Vivo Detection of Ferritin in the Normal Guinea Pig by Passive Cutaneous Anaphylaxis. Zoltan Ovary and Aaron Janoff .......................................................... 79

Fractionation of the Antigens from Dwarf Ragweed Pollen. A. R. Goldfarb and O. H. Callaghan ..., 83

Studies on the Mechanism of Action of Emulsified Vaccines. Robert W. McKinney and Fred M. Davenport .......................................................... 81

Antibody Synthesis in Relation to Levels of Humoral and Cell-fixed Antibodies in Rabbits. Ernest Sorkin, Joan M. Rhodes and Stephen V. Boyd .... 101

NUMBER 2, FEBRUARY 1961

Transplantation of Antibody-Forming Cells in Lethally Irradiated Mice. N. Gengosian, T. Makinodan and I. C. Shekarchi .......................................................... 113

Species-Specific Antigens from the Cell Walls of the Agents of Meningopneumonitis and Feline Pneumonitis. Howard M. Jenkin, Martin R. Ross and James W. Moulder .......................................................... 123

Studies on Pulmonary Alveolar Macrophages from the Normal Rabbit: A Technique to Procure Them in a High State of Purity. Quentin N. Myrvik, Eva Soto Leake and Bruce Fariss ... 128

Lysozyme Content of Alveolar and Peritoneal Macrophages from the Rabbit. Quentin N. Myrvik, Eva Soto Leake and Bruce Fariss .......................................................... 133

Studies on the Immunologic Mechanism of Anaphylaxis. II. Sensitizing and Combining Capacity in Vivo of Fractions Separated from Papain Digests of Antihapten Antibody. Zoltan Ovary and Fred Karush .......................................................... 146

Immunologic Properties of Weak Histocompatibility Genes. Charles F. McKhann and James H. Berrian .......................................................... 170

Isologous and Homologous Lymphoid Transplants. I. The Transfer of Tuberculin Hypersensitivity in Inbred Guinea Pigs. Joseph A. Bauer, Jr. and Sanford H. Stone .......................................................... 177
Studies on the Combining Sites of the Protein Antigen Silk Fibroin. I. Characterization of the Fibroin-Rabbit Antifibroin System. John J. Cebra ........................................... 190
Studies on the Combining Sites of the Protein Antigen Silk Fibroin. II. Isolation and Characteriza-
tion of Peptides from Chymotryptic Hydrolysate of Silk Fibroin (Bombyx mori). John J.
Cebra .......................................................................................... 197
Studies on the Combining Sites of the Protein Antigen Silk Fibroin. III. Inhibition of the Silk
Fibroin-antifibroin System by Peptides Derived from the Antigen. John J. Cebra ............. 205
Restoration of Serum Bactericidal Activity and Prevention of Its Loss in X-irradiated
Mice. Lottie Kornfeld and C. Phillip Miller ........................................ 215
Biological Activity of Aggregated -globulin. III. Production of Arthus-like Reactions. Kimishige
Ishizaka, Teruko Ishizaka and Takao Sugahara ........................................ 220
Immune Mechanisms in Homotransplantation. II. Quantitative Assay of the Immunologic Ac-
tivity of Lymphoid Cells Stimulated by Tumor Homografts. Henry J. Winn ....................... 228

NUMBER 3, MARCH 1961

An Adenovirus Vaccine Potency Test. Howard Tint and Joseph Stone .............................. 253
Observations on the Neutralizing Antibody Response to Group B Coxsackie Viruses in Patients
with Central Nervous System Disease. Edwin H. Lennette, Tak T. Shinomoto, Nathalie J.
Schmidt and Robert L. Magoffin ..................................................... 257
The Effects of Anti-Cornea and Anti-Heart Serum on Cultured Cells of Rabbit Cornea and Other
Tissues. G. Ehrlich and S. P. Halbert ............................................. 267
The Multiplication of Foot-and-Mouth Disease Virus in Trypsinized Calf Kidney and Tongue
Cells and Its Use as Immunizing and Complement-Fixing Antigens. Carl J. de Boer and
Howard L. Bachrach ................................................................. 282
Studies on the Role of Serotonin and Mast Cells in Anaphylaxis of the Mouse Produced with Soluble
Antigen-Antibody Complexes. Seikichi Tokuda and Russell S. Weiser ......................... 292
Circulating Antibody and Anaphylaxis in Mice. Richard Rothberg and David W. Talmage .. 302
Passive Transfer of Bone Marrow Homotransplantation Immunity with Specific Antisera.
Richard M. Garver and Leonard J. Cole ........................................... 307
A Progressive Immunization Reaction in the Actively Sensitized Rabbit Eye. Arthur M. Silver-
stein, Sylvia Welter and Lorenz E. Zimmerman .................................... 312
Reduction of the Anaphylaxis Enhancing and Adjuvant Effects of Bordetella Pertussis by a Prior
Injection of B. Pertussis. Leon S. Kind and Suzanne K. Roffler ......................... 324
Authoradiographic Observations of Plasma Cell Formation. John C. Schooley .................. 331
The Mechanism of Particulate Carrier Reactions. I. Adsorption of Human -globulin to Poly-
styrene Latex Particles. Irwin Oreskes and Jacques M. Singer .......................... 338
Antigenic Activity of Various Tissues in Transplantation Immunity. Charles F. McKhann and
James H. Berrian ........................................................................ 345
Studies on Allegedly Non-Complement-Fixing Immune Systems. I. A Heat Labile Serum Factor
Requirement for a Bovine Antibody Complement-Fixing System. Gerald J. Knight and
Keith M. Cowan ........................................................................ 354

NUMBER 4, APRIL 1961

Enhanced Immunological Sensitization of Mice by the Simultaneous Injection of Antigen and
Specific Antiserum. I. Effect of Varying the Amount of Antigen Used Relative to the Anti-
serum. Geronimo Terres and William Wolins .......................................... 361
The Release of Histamine from Rabbit Platelets by Means of Antigen-Antibody Precipitates. I.
The Participation of the Immune Complex in Histamine Release. J. F. Barbaro ......... 369
The Release of Histamine from Rabbit Platelets by Means of Antigen-Antibody Precipitates.
II. The Role of Plasma in the Release of Histamine. J. F. Barbaro ................. 377
Effect of Antiserum and Antibiotics on Persistent Infection of HeLa Cells with Meningopneu-
monitis Virus. G. J. Galasso and A. P. Manire .................................... 382
Inhibition of Immune Phagocytosis of Diplococcus pneumoniae by Human Neutrophiles with
Antibody against Complement. W. S. Jeter, Albert P. McKee and Rachel J. Mason ....... 386
Studies of Lymphocytic Choriomeningitis in Mice. I. The Relationship between Age at Inocula-
tion and Outcome of Infection. John Hotchin and Heribert Weigand ................. 392
CONTENTS

Studies of Lymphocytic Choriomeningitis in Mice. II. A Comparison of the Immune Status of Newborn and Adult Mice Surviving Inoculation. Heribert Weigand and John Hotchin ........ 401

Delayed Corneal Hypersensitivity in Guinea Pigs following Homotransplantation of Skin. Robert F. Smith and Russell S. Weiser ............................................................. 407

The Persistent Production of Small Quantities of Infectious Newcastle Disease Virus in Grossly Unaltered L and U2 Strain Cells. Earl J. Mason and Nathan Kaufman 413

Significance of the Blocking Antibody in Experimental Brucellosis. Harry Glencur, Horace H. Zinneman and Wendell H. Hall .......................................................... 421

A Precipitation Reaction between Human Serum and a Soluble Tissue Component. Thomas B. Tomasi ................................................................................. 427

Properties of Specifically Purified Kidney Localizing Antikidney Antibody. Yasuo Yagi and David Pressman ........................................................................... 431

In Vitro Formation of 7S and 19S γ-Globulins by Tissues from Normal Subjects and Patients with Rheumatoid Arthritis. Howard I. Levene, Edward C. Franklin and G. Jeanette Thorbecke 440

Experimental Allergic Encephalomyelitis in the Chicken. Murray M. Lipton and Alex J. Steigman. 445

Retention of Rabbit Antibody Activity during Acetylation. David Pressman, Peter Stelos and Allan Grossberg. 452

Studies on Immunity in Anthrax. VIII. Relationship of Complement-Fixing Activity to Protective Activity of Culture Filtrates. Virginia G. McGann, Roebert L. Stearman and George G. Wright 458

Immunological Studies on African Swine Fever Virus. I. Elimination of the Procomplementary Activity of Swine Serum with Formalin. Keith M. Cowan 465

Immune-Adherence with Leptospira Antigens. II. Studies on Hyperimmune, Convalescent and Normal Sera. William D. Linscott 480

Nature of the Active Site of Antibenzoate Antibodies: Further Evidence for the Presence of Tyrosine. David Pressman, Alfred Nisonoff, Gerald Radzimski and Anita Shaw 489

The in Vivo Production of Penicillinase by Hemolytic Staphylococcus aureus. Peter Dineen 496

Effect of Eperythrozoon coccoides upon Lymphocytic Choriomeningitis in Mice. John Seamer, A. W. Gledhill, James L. Barlow and John Hotchin 512

Platelet Agglutination by Immune Complexes and Its Possible Role in Hypersensitivity. Maria Siqueira and Robert A. Nelson, Jr. 516

Cellular Factors in Resistance to Acute Bacterial Infection. Fred Miya, Stanley Marcus and Eugene H. Perkins 526

Agglutinin Response, a Function of Cell Number. Eugene H. Perkins, M. A. Robinson and T. Makinodan 533

The Vi Antigens of the Enterobacteriaceae. V. Serologic Differences of Vi Antigens Revealed by Deacetylation. Roberta E. Whiteside and Eugene E. Baker 538

Enhancement of the Mouse Virulence of a Non-Vi Variant of Salmonella typhosa by Vi Antigen. Sidney Gaines, Joseph G. Tully and William D. Tigertt 543

Certain Biological Characteristics of Adenovirus Types 5, 6, 7 and 14. Floyd W. Denny, Jr., and Harold S. Ginsberg 567

Studies on Hemagglutinins in California Wild Flower Seeds. Laura Brilliantine and Nancy K. Allen 575

Agar Precipitation Reactions between Human Serum Albumin and Hemoglobin in Human Tissue Extracts. Richard S. Metzgar and James T. Grace, Jr. 578
CONTENTS

Biological Activity of Soluble Antigen-Antibody Complexes. VI. Complexes in Equivalence and in Excess Antibody. Kimishige Ishizaka, Teruko Ishizaka and Takao Sugahara .................................................. 590
Lowered Resistance to Influenza Infection of Mice following Immunization with Mercurial Inactivated Influenza Virus. K. Ogasawara, M. Aida and I. Nagata .................................................. 599
An Investigation into the Use of 6-Mercaptopurine to Induce Immunological Tolerance. Kong-oo Goh, Daniel G. Miller and Henry D. Diamond .................................................. 606
Studies on Rickettsial Toxins. V. Dissimilarity between the Action of Rickettsial Mouse Lethal Toxin and Bacterial Endotoxin in Mice. Charles L. Wiseman, Jr., Lawrence Pazourek, Anthony Boccuti, Herbert James and Michael B. A. Oldstone .................................................. 613
Permeability Changes Produced in Mice by Bordetella pertussis. J. Munoz .................................................. 618
Effects of Pneumococcus Capsular Polysaccharides on the Degradation of Rabbit Antibodies in Mice. David Gitlin, Fernando Mönckeberg and Charles A. Janeway .................................................. 627
Plaque Formation with Echo Virus Types 15 to 24. John Maisel and Carlo Moscovici .................................................. 635
A New Model to Study Hematopoietic Transplantation Antigens. Franco Celada and T. Maikodan .................................................. 638
A Sensitive and Accurate Plate Assay for Poliovirus Neutralizing Antibody. Avril M. Burt and P. D. Cooper .................................................. 646
Effect of Humoral Factors on in Vitro Phagocytic and Cytopeptic Activities of Normal and "Immune" Phagocytes. Fred Miya and Stanley Marcus .................................................. 652
A Mortality Enhancing Extract Isolated from Listeria monocytogenes. Sidney J. Silverman, Lynn Elwell and Donald A. Kautter .................................................. 669
Complement Fixation and Ionic Strength. Lawrence Levine, Eleanor Wasserman and Stanley Mills .................................................. 675
Development and Application of New Parental Adjuvants. V. Comparative Potencies of Influenza Vaccines Emulsified in Various Oils. Allen F. Woodhour, Keith E. Jenson and Joel Warren .................................................. 681
The Immunologic Response of Rabbits to Homologous and Heterologous Corneal and Uveal Tissue. Waldon B. Wacker and Matt C. Dodd .................................................. 690
