CONTENTS

NUMBER 1, JULY 1961

A Quantitative Study of Cellular Immunity. G. D. Snell, H. J. Winn and A. A. Kandutsch ............ 1

The Interaction between Bovine Ribonuclease and Antibody: A Study of the Mechanism of Enzyme Inhibition by Antibody. M. Branster and B. Cinader .................................................. 18

Proposed Potency Testing of Smallpox Vaccine. II. Comparative Titration in Rabbits, Chick Embryos and Tissue Culture. V. J. Cabasso, I. F. Moore and M. R. Stebbins .............. 46

Inhibition of the Effect of Cortisone on Antibody Formation by Heterologous Spleen Cells. Astrid Fagraeus and Kaare Berglund ................................................................. 49

Chemical and Serological Characteristics of Blood Group Antibodies in the ABO and Rh Systems. M. Yokoyama, J. S. Finlayson, R. T. Suchinsky and N. E. Roberts ............................................. 56

Technical Factors Affecting the Preparation of Fluorescent Antibody Reagents. Leo Kaufman and William B. Cherry ........................................................................................... 72

A Comparison of Cytopathology Caused by Myxoviruses. II. Induced Resistance of Cells to the Cytopathic Action of Myxoviruses. John P. Bader and Herbert R. Morgan ......................... 89

Appearance of Persistently Cytopathic Eastern and Western Encephalitis Viruses after “Blind” Passage in Cultures of L Mouse Fibroblasts. Armand G. Eiring and William F. Scherer ... 96

Localization Properties of Radiolabeled Fragments of Antirat Kidney Antibody. Peter Stelos, Yasuo Yagi and David Pressman .............................................................. 106

The Opsonization of Bentonite Particles by γ-Globulin. Elizabeth V. Potter and Gene H. Stoller- man ....................................................................................... 110

NUMBER 2, AUGUST 1961

Intradermal Reactions in Man to Autologous Erythrocytes Sensitized with Tuberculin or Endotoxin. Stewart Sell and Abraham I. Braude ................................................................. 119

Laboratory and Field Investigations of Bovine Myxovirus Parainfluenza 3 Virus and Vaccine. I. Properties of the SF-4 (Shipping Fever) Strain of Virus. A. Ketler, V. V. Hamparian and M. R. Hilleman ............................................................................ 126

Laboratory and Field Investigations of Bovine Myxovirus Parainfluenza 3 Virus and Vaccine. II. Development and Appraisal of Potency of SF-4 (Shipping Fever) Virus Vaccine. L. McClelland, B. Hampil, V. V. Hamparian, L. Pohsah, A. Ketler and M. R. Hilleman ..................................................... 134

Laboratory and Field Investigations of Bovine Myxovirus Parainfluenza 3 Virus and Vaccine. III. Evaluation of an SF-4 (Shipping Fever) Virus Vaccine in Cattle. V. V. Hamparian, F. V. Washko, A. Ketler and M. R. Hilleman ............................................................................. 139

The Induction in Mice of Sensitization and Immunological Unresponsiveness by Neonatal Injection of Bovine γ-Globulin. G. J. Thorbecke, G. W. Siskind and N. Goldberger ....... 147

Effect of Antibiotics on Intracellular Salmonella typhosa. I. Demonstration by Phase Microscopy of Prompt Inhibition of Intracellular Multiplication. Jane L. Showacre, Hope E. Hopp, Herman G. Du Buy and Joseph E. Smadel................................................................. 153

Effect of Antibiotics on Intracellular Salmonella typhosa. II. Elimination of Infection by Prolonged Treatment. Hope E. Hopp, Joseph E. Smadel, Barbara C. Bernheim, Joseph X. Danauskas and Elizabeth B. Jackson ............................................................................ 162

Studies on the Nonspecific Precipitation of Basic Serum Proteins with γ-Glutamyl Polypeptides. C. Gomez Leonard and Curtis B. Thorne .............................................................. 175

Experimental Isoimmunization to Hemoantigens in Man. Kurt Stern, Harold S. Goodman and Maya Berger .............................................................................................................. 189
The Effect of Route of Inoculation upon Development of Antibody in Rabbits. James J. Parks, Howard M. I. Leibowitz and A. E. Maumenee .............................................. 199
Immunological Paralysis and Adoptive Immunity. Marcus S. Brooke and Morris J. Karnovsky .... 205
Immunogenicity of Spherule-Endospore Vaccines of Coccidioides immitis for Mice. H. B. Levine, James M. Cobb and C. E. Smith ........................................................... 218
Staining of Vaccinia-Infected L Cells with Brilliant Cresyl Blue. Leon Zebrowski, K. O. Smith and D. G. Sharp .............................................................. 228

NUMBER 3, SEPTEMBER 1961

Immunological Studies of Anthrax. I. An Index to Determine Quantitative Immunization. Ira A. DeArmon, Jr., Frederick Klein, Ralph E. Lincoln, Bill G. Mahlandt and Albert L. Fernelius ................................................................. 233
Allergenicity of Cow's Milk Protein. III. Effects of Irradiation on the Antigenicity of Cow's Milk as Studied by the Agar Diffusion Technique. Fred T. Grogan, Jr., and Lloyd W. Crawford .......................................................... 240
Quantitative Micro-Complement Fixation and Its Use in the Study of Antigenic Structure by Specific Antigen-Antibody Inhibition. Eleanor Wasserman and Lawrence Levine ........................................ 290
Preparation and Properties of Antibodies to Sheep Erythrocytes. Kenneth Amirian and Edward J. Leikhim .......................................................... 301
Studies on the Second Component of Complement. I. The Reaction between EAC'1,4 and C'2: Evidence on the Single Site Mechanism of Immune Hemolysis and Determination of C'2 on a Molecular Basis. Tibor Borsos, Herbert J. Rapp and Manfred M. Mayer .................................................. 310
Studies on the Second Component of Complement. II. The Nature of the Decay of EAC'1,4,2. Tibor Borsos, Herbert J. Rapp and Manfred M. Mayer ............................................... 326
Studies on the Second Component of Complement. III. Separation of the Second Component from Guinea Pig Serum by Chromatography on Cellulose Derivatives. Tibor Borsos, Herbert J. Rapp and Charles T. Cook ........................................ 330

NUMBER 4, OCTOBER 1961

Organ Specificity of the Heart. I. Animal Immunization with Heterologous Heart. Igal Gery and A. Michael Davies ............................................................. 351
Organ Specificity of the Heart. II. Immunization of Rabbits with Homologous Heart. Igal Gery and A. Michael Davies ............................................................. 357
Effect of Endotoxin on Antibody Production by Chicken Spleen Cells Transferred to Chick Chorioallantois. Louis R. Sibal ................................................................. 362
Studies on the Complement-Fixing Antigens of Poliomyelitis. III. Intracellular Development of Antigen. Yorio Hinuma and Klaus Hummeler .................................................. 367
M* a Blood Factor Common to the Antigenic Properties M and He. Alexander S. Wiener and Richard E. Rosenfield .............................................................. 376
The Role of Antibody in Recovery from Infection with Vaccinia Virus. Robert M. Friedman and Samuel Baron ................................................................. 379
Destruction of Lymphocytes in Vitro by Normal Serum from Common Laboratory Animals. Paul I. Terasaki, Marian L. Esall, Jack A. Cannon and William P. Longmire, Jr ................................................................. 383
Prophylactic Effectiveness of Live and Killed Tularemia Vaccines. I. Production of Vaccine and Evaluation in the White Mouse and Guinea Pig. Henry T. Eigelsbach and Cora M. Downs ................................................................. 415
Biological Activity of Aggregated γ-Globulin. IV. Mechanism of Complement Fixation. Teruko Ishizaka, Kimishige Ishizaka and Tibor Borsos ................................................................. 433
Study of Antibody-Producing Capacity of Single Cells by Bacterial Adherence and Immobilization. O. Mäkelä and G. J. V. Nossal ................................................................. 457
The Inactivation of Rinderpest Virus by β-Propiolactone and Its Effect on Homologous Complement-Fixing and Neutralizing Antibodies. S. S. Stone and P. D. DeLay ................................................................. 464
Interaction of Rickettsiae and Phagocytic Host Cells. II. Chemotactic Action of Typhus Rickettsiae on Human Polymorphonuclear Leukocytes in Vitro. Charles L. Wiseman, Jr ................................................................. 468
Antigenicity, Solubility and Chemical Stability of Renin Complexes. Erwin Haas and Harry Goldblatt ................................................................. 472
Antibodies to Denatured Desoxyribonucleic Acid in a Lupus Erythematosus Serum. David Stollar and Lawrence Levine ................................................................. 477
Endotoxin Susceptibility and Delayed Hypersensitivity in Experimental Histoplasmosis. Edith D. Box and Norman T. Briggs ................................................................. 485
Role of the Adrenals in Stress Induced Resistance to Anaphylactic Shock. Perry E. Treadwell and A. F. Rasmussen, Jr ................................................................. 492

Number 5, November 1961

The Beginnings of Immunofluorescence. Albert H. Coons ........................................................................ 499
Studies on ABH-like Antigens and “O-Cell Agglutinins” in Cattle, Sheep, Goat and Buffalo. H. M. Bhatia ........................................................................ 518
Studies in Experimental Eosinophilia. III. The Induction of Peritoneal Eosinophilia by the Passive Transfer of Serum Antibody. Mortimer Litt ................................................................. 522
A Comparison of the Yields of Infectious Ribonucleic Acid from Heated and Ultraviolet Irradiated Mouse Encephalomyelitis Virus (GDVII Strain). Massahiro Nakamura ........................................................................ 530
Suppression of Transferred Lymph Node Cells by Rabbit-Antirabbit Leukocyte Serum. T. N. Harris, Susanna Harris, and Miriam B. Farber ........................................................................ 536
**CONTENTS**

Molecular Bases of Passive Sensitization. I. Role of Disulfide Linkages in γ-Globulin Molecule. Kimishige Ishizaka, Teruko Ishizaka and Takao Sugahara .................................................. 548

Experimental Shigella Infections. IV. Fluorescent-Antibody Studies of an Infection in Guinea Pigs. Eugene H. Labrec and Samuel B. Formal ............................................ 562

Differences among Virus Populations Recovered from Mice Vaccinated with an Attenuated Strain of Venezuelan Equine Encephalomyelitis Virus. Henry J. Hearn, Jr. .......... 573

Induced and Spontaneous Recurrent Parasitemia in Chronic Infections with Avirulent Strains of Toxoplasma gondii. Jack S. Remington, Marjorie L. Melton and Leon Jacobs .......... 578

Heterotypic Antibody Responses by Rabbits Inoculated with Poliovirus. Eugene V. Barnett and Samuel Baron ......................................................... 582

Effect of Egg Passage on the Reaction between HVJ (Hemagglutinating Virus of Japan) and Chicken Erythrocytes. Toshisada Matsumoto, Nobuto Yamamoto and Koichiro Maeno .......... 590

Immunoenzyme Properties of the Cross-Reactions between Anti-BSA and Heterologous Albumins. William O. Weigle ........................................................................ 599

Characteristics of ECHO 4 (Shropshire) Virus Isolated during Epidemic of Aseptic Meningitis. Almen L. Barron and David T. Karzon ......................................................... 608

Requirement of Avian C1 for Fixation of Guinea Pig Complement by Avian Antibody-Antigen Complexes. Harold N. Benson, Helene P. Brunfield and Benjamin S. Pomeroy .......... 616

Typing of Echo Virus Isolates by Immune Serum Pools. The "Intersecting Serum Scheme." Nathalie J. Schmidt, Raymond W. Guenther and Edwin H. Lennette ................. 623

**NUMBER 6, DECEMBER 1961**

Some Immunologic Properties of Human and Dog Glomerular Basement Membranes. I. Isolation of Human Glomerular Basement Membrane; Similar or Identical Complement-Fixing Antigens in Human and Dog Glomerular Basement Membrane Preparations. Raymond William Steblay and Mark H. Lepper ............................... 627

Some Immunologic Properties of Human and Dog Glomerular Basement Membrane. II. Nephritis Produced in Dogs by Rabbit Antihuman Glomerular Basement Membrane Sera. Raymond William Steblay and Mark H. Lepper ........................................... 636

Fluorescent Microscopic Study of Sendai Incomplete Virus Production in Tissue Culture Cells. V. M. Zhdanov, A. G. Bukrinskaya and N. B. Azadova ........................................ 647

Studies of Mercaptoethanol-Dissociated Normal Human 19 S γ-Globulin and Pathologic Macroglobulins from Patients with Macroglobulinemia. Catherine A. Reisner and Edward C. Franklin .................................................. 654

The Effects of Pretreatment with X-Rays on the Pathogenesis of Lymphocytic Choriomeningitis in Mice. I. Host Survival, Virus Multiplication and Leukocytosis. John Hotchin and Heribert Weigand ...................................................... 675

The Effects of Pretreatment with X-Rays on the Pathogenesis of Lymphocytic Choriomeningitis in Mice. II. The Pathological History. Doris N. Collins, Heribert Weigand and John Hotchin ........................................................... 682

Influence of Magnesium and Calcium Ions on the Hemolytic Activity and Stability of Guinea Pig Complement. Earl H. Fife, Jr. and Louis H. Muench ........................................... 688

Protection of Chick Embryos against Newcastle Disease Virus by Trypan Blue and Other Compounds. Richard A. Finkelestein ............................................................ 707

Resistance of Hamsters in Infections with Histoplasma capsulatum. Elizabeth M. O’Hern ............................................................... 728

Spotted Fever Vaccine; Potency Assay by Direct Challenge of Vaccinated Mice with Toxin of Rickettsia rickettsi. E. John Bell and Herbert G. Stoennner ................. 737
Antigen Cross-Reactivity between 7 S and 19 S Rabbit γ-Globulin. G. Jeannette Thorbecke and Edward C. Franklin.......................................................... 753
THE JOURNAL OF IMMUNOLOGY

Information for Contributors

Manuscripts should be carefully revised and the original should be sent to

DR. JOHN Y. SUGG
Journal of Immunology
Cornell Medical College
1300 York Ave.
New York 21, N. Y.

Authors will be charged for space in excess of 10 printed pages and also for all illustrations and tabular or graphic matter in excess of 10 per cent of the pages in each article.

Author's alterations of type or illustrations on proof are charged to the author if in excess of an average of $1.00 per printed page; correction of printer's errors are not charged to the author.

Reprints must be ordered in advance. A table showing cost of reprints, with an order slip, is sent with proof. Orders for purchased reprints must be limited to 1,000 copies. The invoice for reprints will also include charges for illustrations, excess pages and tabular matter, if any.

Instructions for the Preparation of Manuscript

Copy should be typed double-spaced on one side only of 8½ x 11 paper. Even material that is to be set in a type size smaller than that of the main text (footnotes, references, etc.) should be double-spaced.

The author should supply a short title for use as a running head. This should be typed on a separate sheet as the first page of manuscript. Type the complete title of the article on a second sheet, and the authors' names and affiliations on a third sheet. All material that is to be set in a type size different from that of the main text should be typed on separate sheets. This includes tabular matter, case histories, quotations, formulas and other subsidiary matter in the text, footnotes, bibliographies, and legends for illustrations. Displayed formulas which are to be built up to more than one line of type, even if they are the same size type as the text, should be on a separate page. Legends should not be attached to or written on the illustration copy. Positions for tables and figures in the text may be indicated in the margin of the text page.

Manuscripts that do not conform to these instructions will be cut and rearranged so that the matter to be set in different sizes of type can be separated.

Galley proof. Authors will receive galley proofs of their papers set separately as outlined above. Galleys will be arranged in the following order: tables, running heads, footnotes, figure legends, text, bibliography. All material that has been cut from the body of the text will be inserted in its proper place in the galleys. This includes formulas, quotations, case histories, and other subsidiary matter. Manuscript will be arranged in this order: formulas, tables, footnotes, figure legends, text inserts including bibliography, text.

Illustrations. Copy for illustrations should be unmounted glossy photographs clearly identified as to number, author's name, and top of figure in soft crayon on the back. Graphs should be in India ink on bluelined paper. If larger than 9 x 12", they must be accompanied by glossy photographs within this size.
IMMUNOLOGY

Official Journal of the BRITISH SOCIETY FOR IMMUNOLOGY

Editor: J. R. MARRACK

VOL. IV, NO. 3 CONTENTS JULY, 1961

An Antigenic Relationship Between the Viruses of Bovine Rinderpest and Canine Distemper. G. WHITE, RUTH M. SIMPSON AND G. R. SCOTT
Production of Lymphocytes and Plasma Cells in the Rat Following Immunization with Human Serum Albumin. E. H. COOPER
The Adsorption of Antibody and Antigen by Spleen Cells in vitro. Some Further Experiments. STEPHEN V. BOYDEN AND ERNST SORKIN
Soluble Antigens of Trypanosoma vivax and of Other Trypanosomes. A. R. GRAY
Immunological Studies on a Freeze-Substitution Method of Preparing Tissue for Fluorescent Antibody Staining. BRIGID M. Balfour
Antigenic Structure of Rabbit gamma Globulin. S. DUBISKI, ANNA DUBISKA, DANUTA SKALBA AND A. KELUS

Book Reviews

The Subscription price in the United States and Canada is $13.50 for the annual volume of four parts (Single copies $4 each)

BLACKWELL SCIENTIFIC PUBLICATIONS
24-25 BROAD STREET, OXFORD, ENGLAND

THE JOURNAL OF IMMUNOLOGY

Information for Subscribers

Published monthly, beginning January, 1929. (From 1916–1925, and in 1928 Volumes I-X, inclusive, and Vol. XV published bi-monthly.)

The subscription price is $18.00 per year in U.S.A.; $18.50 in Canada; $19.50 elsewhere. Single copies, when available, are $2.25 in U.S.A.; $2.50 elsewhere. The subscriptions of members of the American Association of Immunologists are included in the membership dues and are handled by the Association’s Treasurer, Dr. Calderon Howe, Columbia University College of Physicians and Surgeons, New York, N. Y. All other subscriptions should be sent to the publishers.

Change of address: Publisher must be notified 60 days in advance. Journals undeliverable because of incorrect address will be destroyed. Duplicates can be obtained (if available) from the publisher at the regular price of single issues.

New subscriptions and renewals are entered to begin with the first volume of the year when subscription is received. Should any issue of the current volume be out of print at the time the subscription order is received, the pro-rata value of such numbers will be refunded to the subscriber.

Subscriptions should be renewed promptly: To avoid a break in your series, subscriptions should be renewed promptly. The publishers cannot guarantee to supply back issues on belated renewals.

Correspondence concerning all business matters should be addressed to

THE WILLIAMS & WILKINS COMPANY
Publishers of Scientific Books and Periodicals
Baltimore 2, Maryland, U. S. A.
