Concise, simple guide to diagnosis ...

Davey: Blacklock and Southwell's GUIDE TO HUMAN PARASITOLOGY 6th ed.

Intended for the practitioner who from time to time must make a diagnosis in diseases caused by animal parasites. Particularly helpful for those whose laboratory facilities are limited. "... completely revised for the 1958 edition and very informative. The book has one hundred and nineteen illustrations, and some of them are most unusual. When general practitioners take a post-graduate course in human parasitology they usually become so overwhelmed by the abundance of new names and details that they fail to grasp the knowledge in sheer self defense. The reason for this book is to show the general practitioner in a rather unorthodox but, nevertheless, far more expressive manner what he should really know."—Gen. Pract.

Revised by T. H. Davey, O.B.E., M.D., D.T.M., Professor of Tropical Hygiene, Liverpool School of Tropical Medicine, the University of Liverpool

230 pp., 119 figs., 3 col. pls. (1958) • $7.00

Staff Research Immunochemist

With its new Research Center now being occupied, Miles Laboratories is measurably expanding its activities in the field of pharmaceutical research and development. These growing programs require the immediate addition of a Staff Research Immunochemist of outstanding professional competence to our scientific staff.

The able individual we are seeking to fill this important position will be responsible for developing, through immunochemical techniques, a series of simple, reliable and standardized tests for the diagnosis of specific disease processes. Qualified applicants should possess an M.D. or Ph.D. (immunochemistry, immunology or biochemistry) and several years direct experience, or at least close contact, with the various aspects of clinical immunology.

Direct your communications in complete confidence to:
Dr. R. G. McCracken Coordinator of Management Recruitment
Personal discussions can be arranged at your convenience, including Saturdays, in Elkhart, Indiana.

MILES Laboratories, Inc. and AMES Company, Inc.*

1127 Myrtle Street, Elkhart, Indiana

An Equal Opportunity Employer

* Ames Company, Inc. is an ethical pharmaceutical division of Miles Laboratories, Inc.
Diagnostic Reagents for the Determination of

ANTISTREPTOLYSIN TITERS

Bacto-Streptolysin O Reagent is a standardized reagent recommended as an aid in the diagnosis of Rheumatic Fever, Glomerulonephritis and other diseases associated with Group A streptococcal infections.

SENSITIVITY TESTS

The significance of determining bacterial sensitivity is accentuated by the discovery of increasing numbers of antibiotics, sulfonamides, and other chemotherapeutic agents and the development of resistant organisms to one or more of these compounds. Sensitivity or resistance is easily determined with Bacto-Sensitivity Disks.

HETEROPHILE ANTIBODIES

The differential diagnosis of Infectious Mononucleosis requires the use of standardized heterophile reagents:

- Bacto-Guinea Pig Kidney Antigen, Desiccated and Suspension
- Bacto-Beef Cell Antigen, Desiccated and Suspension

BLOOD COAGULATION

Prothrombin determinations require accurately prepared interstandardized reagents:

- Bacto-Thromboplastin
- Bacto-Prothrombin 2 Stage Reagent
- Bacto-Prothrombin Free Beef Plasma
- Bacto-Prothrombin Free Rabbit Plasma

- Bacto-AC Globulin
- Bacto-Sodium Chloride 0.85 Per Cent
- Bacto-Sodium Oxalate Solution 0.1 Molar
- Bacto-Calcium Chloride Solution 0.02 Molar

LIVER DISEASE

Differential diagnosis of hepatic disturbances is aided by standardized reagents:

- Bacto-Cephalin Cholesterol Antigen
- Bacto-Thymol Turbidity Reagent
- Bacto-Thromboplastin and other Prothrombin Reagents

RENAL FUNCTION

Phenolsulfonphthalein Ampules, Difco is a carefully prepared injectable recommended for use in determining renal excretion rate.

HEMAGGLUTINATION OF RED BLOOD CELLS

Accurately determined by the use of:

- Bacto-Trypsin 1% for Hemagglutination
- Bacto-Hemagglutination Buffer
- Bacto-Phytohemagglutinin
