

NEW **Microtiter*** SAVES TIME AND REAGENTS

Now eight times as many serological and other dilutions may be performed with the same amount of reagents formerly used.

Our Microtiter kit uses individually calibrated spiral loops which are non-magnetic and rust proof. Used with pipette droppers, you get fast, accurate titrations. Loop handles are tapered so that eight may be used simultaneously.

Sixteen plates, half conical bottoms and half radial bottoms—or sixteen of either type—are supplied with each Microtiter kit at the same price. The two types of plates permit complement fixation, hemagglutination, hemagglutination inhibition, and metabolic inhibition tests.

Versatility, durability and simplicity and ease of cleaning make the Microtiter kit ready for use any time, anywhere in the world without ancillary equipment. The storage case is heat and acid resistant, and each half may be used as a wash rack for the plates and cleaning solutions.

*Conclusions and recommendations
from an important symposium...*

Cannon et al.: PROCEEDINGS OF A SYMPOSIUM ON IMMUNIZATION IN CHILDHOOD

"A number of diseases resulting from bacterial or viral infection can now be prevented by means of vaccines and toxoids, and the problem of administering these to the best advantage, and with the least inconvenience to the recipients, has become complex and difficult. The time has come to assess all the evidence which has accumulated, and to attempt to reach agreement on certain basic principles which must be observed in all inoculation schedules. The Symposium was organized with this object in view."—*From the Foreword*

*Edited by D. A. CANNON, Medical Adviser, Wellcome Research Laboratories, Kent;
W. C. COCKBURN, Director, Epidemiological Research Laboratory, Central Public Health Laboratory, London;
D. G. EVANS, Director, Biological Standards Control Laboratories, Medical Research Council, London;
and H. J. PARRISH, Clinical Research Director, Wellcome Research Laboratories, Kent.*

PROBLEM:
count 6,000 cells per second

SOLUTION:
 ONLY SOLUTION:
the Coulter Counter®

Patented in U.S.A., Great Britain,
 France, Germany, Japan, Brazil and throughout the world.

NON-OPTIC!

Electronically counts, sizes red or white blood
 cells, tissue cultures, bacteria, protozoa . . . 1 by 1!

Speed: unprecedented. **Accuracy and reliability:** unparalleled.

Economy: substantial. **Customary "count"**

tedium: eliminated. A few reasons why the Coulter Counter is
 standard in over 1500 hospitals and research centers.

*Learn why the Coulter Counter
 is accepted as a major breakthrough
 in cell analysis. Write today

An important new tool in bacteriology . . .

Skerman's A GUIDE TO THE
 IDENTIFICATION OF THE
 GENERA OF BACTERIA—*With*
Methods and Digests of Generic
Characteristics

“The Key to the Genera of Bacteria has been compiled with the aim of placing in the hands of research workers, teachers and students, a volume in which general directives for the identification of bacteria are supported by a complete list of the techniques needed for the purpose. In addition, a Digest of data published for the various species in the seventh edition of *Bergey's Manual of Determinative Bacteriology* and in several original papers has been included. The publication of the Key and Methods in the one book should encourage a more general application of common procedures for the description of bacteria. The main purpose of the digests is to draw attention in a more definite way to the deficiencies in descriptions within the various genera in the hope that steps may be taken to rectify them. A Guide to Study has been provided to ease the burden associated with the assimilation of knowledge over this varied field of science.

“The volume is intended as a supplement to the *Manual* itself, and it is hoped that its use will contribute materially to the development of future editions of the *Manual*.”—*Preface*

By V. B. D. SKERMAN, *Reader in Bacteriology and Head of the Department of Bacteriology, University of Queensland, Brisbane, Australia*

THE JOURNAL OF IMMUNOLOGY

Information for Subscribers

Published monthly, beginning January, 1929. (From 1916-1925, and in 1928 Volumes I-X, inclusive, and Vol. XV published bi-monthly.)

The subscription price is \$18.00 per year in U.S.A.; \$18.75 in Canada; \$19.50 elsewhere. Single copies, when available, are \$2.25 in U.S.A.; \$2.50 elsewhere. The subscriptions of members of the American Association of Immunologists are included in the membership dues and are handled by the Association's Treasurer, Dr. Byron H. Waksman, Massachusetts General Hospital, Boston 14, Mass. All other subscriptions should be sent to the publishers.

Change of address: Publisher must be notified 60 days in advance. Journals undeliverable because of incorrect address will be destroyed. Duplicates can be obtained (if available) from the publisher at the regular price of single issues.

New subscriptions and renewals are entered to begin with the first volume of the year when subscription is received. Should any issue of the current volume be out of print at the time the subscription order is received, the pro-rata value of such numbers will be refunded to the subscriber.

Subscriptions should be renewed promptly: To avoid a break in your series, subscriptions should be renewed promptly. The publishers cannot guarantee to supply back issues on belated renewals.

Correspondence concerning all business matters should be addressed to
