
Dynamics and Quantitative Analysis of Passively Transferred Tuberculin Hypersensitivity. Joseph D. Feldman and John S. Najarian ........................................ 306

The Molecular Properties of Antibodies Synthesized in Response to Simple Haptens. D. C. Bauer ................................................................. 323

The Antigenic Composition of Rat Serum: An Electrophoretic Study. David C. Benjamin and Henry E. Wiemer .................................................. 331

The Molecular Ratio Between "Tissular" Antibodies and Released Histamine during the Anaphylactic Reaction in Isolated Guinea Pig Lung Preparations. P. Llaçopoulous, S. H. Stone and M. F. Perramant .................. 348

Isolation of Non-Dialyzable Allergens and Antigens from Low Ragweed Pollen (Ambrosia elatoir). Kenneth C. Robbins, Helen Wu, Peter Baram and Milton M. Mosko .......................................................... 354

Anti-Rabies Vaccine of Tissue Culture Origin. R. E. Kissling and D. R. Reese ........................................... 362

Differential Response to Allogeneic and Xenogeneic Skin Grafts by Sublethally Irradiated (670 Rad) and Nonirradiated Mice Sensitized by Various Means. Marvin L. Tyann and Leonard J. Cole ............................................. 396

Imunoochemical Identification and Genetics of Rabbit γ-Globulin Allotypes. Sheldon Dray, Glendowlynn O. Young and Leroy Gerald .................................................. 403

Biologic Characteristics of a Continuous Kidney Cell Line Derived from the African Green Monkey. Hope E. Hopps, Barbara C. Bernheim, Ananda Nisalak, Joe Hin Tjio and Joseph E. Smadel ............................................. 416

Primary and Secondary Antitoxin Responses in Thymectomized Mice. Max W. Hess, Hans Cottier, and Richard D. Stoner ............................................. 425
