The influence of Avoidance-Learning Stress on Resistance to Coxsackie B Virus in Mice. Torsten Johnsson, John F. Lavender, Eskil Hultin and A. F. Rasmussen, Jr. ................................................................. 569

The Effect of Bursectomy at Different Ages on Precipitin and Natural Hemagglutinin Production in the Chicken. M. A. Graefter, W. P. Cote and H. R. Wolfe ................................................................. 576

Studies on Delayed Hypersensitivity to Proteins and Protein Conjugates. Anthony C. Trakatellis, Warren R. Steinbring and A. E. Axelrod ................................................................. 591

Quantitative Determination of 6.6 S γ-Globulins, β₂-Globulins and γ₁-Macroglobulins in Human Serum. John L. Farhey and Mary E. Lawrence ................................................................. 597

Immunity in Hamsters to Cells Transformed in Vitro and in Vivo by SV40. Tests for Antigenic Relationship Among the Papovaviruses. Kundan S. Khra, Asaria Ashkenazi, Fred Rapp and Joseph L. Melnick ................................................................. 604

Anti-Bovine Serum Albumin Formation by Transferred Hyperimmune Mouse Spleen Cells. Raymond Mark and Frank J. Dixon ................................................................. 614

Cytolytic Antibody Assay by Tryptic Digestion of Injured Cells and Electronic Counting. Arthur A. Hirata ................................................................. 625

Immunochromic Studies on Dextrans. III. The Specificities of Rabbit Antidextrans. Further Findings on Antidextrans with 1,2- and 1,6-Specificities. Rose G. Mage and Elvin A. Karpat .............. 633

Alteration of the Specificity of Lectin by Chemical Modification. Shoji Matsubara and William C. Boyd ................................................................. 641

Elicitation of PCA by Univalent and Divalent Haptens. Alfred A. Amerhart, Leon T. Rosenberg and Sidney Raffel ................................................................. 644

Studies on Immediate Cutaneous Hypersensitivity in Mice. I. Active Cutaneous Hypersensitivity. Joan McCamish and Albert A. Benedict ................................................................. 651

Antigenic Analysis of Herpes Simplex Virus by Neutralization Kinetics. Warren K. Ashe and Henry W. Scherp ................................................................. 658

The Development of Infectivity, Antigens and Particles in Herpes Infected Cells. E. Gold, P. Wildy and D. H. Watson ................................................................. 666

Antigenic Relationship between Two Types of 7 S Guinea Pig γ-Globulins. G. Jeanette Thorbecke, Baruï Benacerraf and Zoltan Ovary ................................................................. 670

Influenza Vaccine Prepared by Photodynamic Inactivation of Virus. Craig Wallis, Nuncio Sakurada and Joseph L. Melnick ................................................................. 677

Antigenic Components of Human Erythrocytes. Calderon Howe, Stratis Avgameas, Christiane de Vaux St. Cyr, Pierre Grabar and Lucille T. Lee ................................................................. 683

 Destruction of Immune Lymphoid Cells in Transplantation Immunity. Charles F. McKhann ................................................................. 693

The Immunologic Behavior of Baby Pigs. III. Transplacental Transfer of Antibody Globulin in Swine. Walter L. Myers and Diego Storer ................................................................. 697

A Comparison of the Cutaneous and Mucoal Arthus Reaction in the Guinea Pig and Hamster. Herbert M. Hyman and Bernard J. Zeldow ................................................................. 701

The Immunofluorescent Focus Technique in Studying the Replication of Cytomegalovirus. Fred Rapp, Lucille E. Rasmussen and Matilda Bentesh-Melnick ................................................................. 709
