

## INDEX

- Acid, periodic, effect on red cell Rh<sub>0</sub> (D) antigen, 233
- Adenovirus vaccine prepared by thermal inactivation of the infective moiety of the virus in magnesium ions, 283
- Adenoviruses, application of agar cell culture precipitation test to the study of, 151
- Adjuvant action of bacterial endotoxins on antibody formation, 266
- Aeromonas salmonicida*, antibodies against, 757
- Agar cell culture precipitation test, application to the study of vaccinia virus, adenoviruses and herpes simplex virus, 151
- Agglutinins, sheep erythrocyte, in infectious mononucleosis serum, 783
- Agglutininogen, relationship to other antigens of *Bordetella pertussis*, 107
- Allergens, isolation from ragweed pollen, 354
- Ambrosia elatior*, isolation of allergens and antigens from, 354
- Amkraut, Alfred A., 644
- Anamnesis, impaired, following x-ray, 29
- Anaphylaxis, passive cutaneous, elicitation by haptens, 644
- , —, with homologous antiserum, 859
- Anthrax, immunologic studies of, 431
- Antibodies against *Aeromonas salmonicida*, 757
- , chicken, complexes of, 257
- , —, synthesis of, 795
- , haptene, 323
- in infectious mononucleosis, 783
- , ragweed-binding, presence in  $\beta_{2A}$ -,  $\beta_{2M}$ - and  $\gamma$ -globulins of sensitive individuals, 83
- synthesized in response to simple haptens, 323
- , "tissular," and released histamine, molecular ratio between, 348
- Antibody activities of  $\gamma_{88}$ -,  $\gamma_{1A}$ - and  $\gamma_{1M}$ -globulins, 11
- antigen combination, rate of, 90
- assay, cytolytic, 625
- decline following x-ray, 29
- formation, adjuvant action of bacterial endotoxins on, 266
- — by transplanted bone marrow, spleen, lymph nodes and thymus cells in irradiated recipients, 185
- globulin, transplacental transfer of, 697
- levels in animals chemically protected against x-irradiation, 100
- , neutralizing, transfer by colostrum, 251
- production, characteristics of, 819
- response, primary, influence of endotoxin and 5-fluoro-2-deoxyuridine on, 266
- , specific, enhanced antitoxin responses in irradiated mice elicited by, 761
- technique, indirect fluorescent, for detection of rabies antibody, 721
- titer and immunity index, comparison after anthrax immunization, 431
- titers, effect of emulsified ragweed extract on, 197
- Anti-bovine serum albumin formation by transferred hyperimmune mouse spleen cells, 614
- Anti-Brucella antibody activities, distribution among  $\gamma_{88}$ -,  $\gamma_{1M}$ - and  $\gamma_{1A}$ -globulin fractions, 11
- Antidextrans, findings on, with 1,2- and 1,6 specificities, 633
- , rabbit, specificities of, 633
- Anti-diphtheria antibody activities, distribution among  $\gamma_{88}$ -,  $\gamma_{1M}$ - and  $\gamma_{1A}$ -globulin fractions, 11
- Antigen and antibody, specificity of, in the development of typing reagents, 123
- antibody complexes, soluble, 257
- — reactions, desensitization with, 859
- , Jensen's, serologic comparison with agglutininogen of *Staphylococcus aureus*, 777
- penetration into thymus, 840
- , protein, purified, influence of endotoxin and 5-fluoro-2-deoxyuridine on primary antibody response to, 266
- , —, tolerance to, 833
- , specificity of morphologic reaction to, 541
- , V and W, in *Pasteurella pestis*, 179
- Antigenic components of human erythrocytes, 683
- composition of rat serum, 331
- specificity, effect of molecular structure on, 536
- stimulus, fetal response to, 384
- Antigens, erythrocyte, 683
- , herpes, development of, 666
- , isolation from ragweed pollen, 354
- , protein, soluble, immunologic response of dogs to, 129
- , synthetic polypeptide, 273
- Antiglobulin, heat-labile, demonstration in normal human sera, 243
- in normal serum, 243
- Anti-*Pasteurella pestis* factor in the organs of normal mice and guinea pigs, 287
- Anti-rabies vaccine of tissue culture origin, 362
- Antisera, specific, for  $\gamma$ -globulins, 484
- , type IX, precipitation by isolichenin, 735
- , use in studies on structure of human 7 S  $\gamma$ -globulin, 730
- Antiserum, effects on skin graft rejection, 621
- , homologous, passive anaphylaxis with, 859
- Antitoxin responses, enhanced, in irradiated mice, 761

- — in thymectomized mice, 425  
 Arbesman, Carl E., 83  
 Arthus reaction, cutaneous and mucosal, 701  
 Ashe, Warren K., 658  
 Ashkenazi, Asaria, 604  
 Autoantibodies, thyroid, immunohistologic evaluation of, 204  
 Avrameas, Stratis, 683  
 Axelrod, A. E., 39, 46, 591

 Benson, Lois, 460  
 Benyesh-Melnick, Matilda, 709  
 Bernheim, Barbara C., 416  
 $\beta_{2A}$ -Globulins in normal serum, 438  
 — —, preparation of antisera specific for, 484  
 — —, quantitative determination in human serum, 597  
 Beutner, Ernst H., 204  
 Blood loss, influence on susceptibility to infection, 65  
 Bollet, Alfred J., 339  
 Bond, Victor P., 185  
 Bone marrow, transplanted, antibody formation by, 185  
*Bordetella pertussis*, relationship of agglutigen to other antigens of, 107  
 Borsos, Tibor, 826, 851  
 Bovine serum albumin and polyribonucleotides, interaction between, 528  
 Bowser, Robert T., 791  
 Boyd, William C., 641  
 Buckler, Charles E., 846  
 Bursectomy, effect on precipitin and natural hemagglutinin production in the chicken, 576
- Cancer cells, human, isoantibodies to, 469  
 — homotransplants, isoantibodies to human cancer cells in recipients of, 469  
 Carpenter, Robert R., 803  
 Cell line, kidney, continuous, 416  
 Cells, homologous bone marrow from hyperimmunized donors, protection of mice against irradiation and tetanus by, 1  
 —, immune lymphoid, destruction of, 693  
 —, inhibition of migration from adjuvant-immunized animals by protein antigens, 803  
 —, lymph node, synthesis of  $\gamma$ -globulin by, 163  
 —, marrow, transfer of, 1  
 —, virus transformed, immunity to, 604
- Cellular resistance, humoral factors in, 313  
 Chang, Walter W. Y., 129  
 Claman, Henry N., 29, 833  
 Cohen, M. W., 541  
 Cole, Leonard J., 396, 621  
 Colostrum antibody transfer, 251  
 Complement activity, hemolytic, inheritance of, 230  
 — effects, 339  
 —, first component of, separation and assay, 851  
 — fixation, inhibition of, 866  
 — levels in animals chemically protected against x-irradiation, 100  
 —, serum hemolytic, effect of endotoxins on, 748  
 Complexes, soluble, of chicken antibodies, 257  
 Connell, John T., 197  
 Coproantibody in human volunteers, 724  
 Cote, W. P., 576  
 Cottier, Hans, 425  
 Coxsackie B virus, influence of avoidance-learning stress on resistance to, 569  
 Cultures, cell, viral infections of, interference and interferon in, 145  
 Cytolysis, immune, of mouse thymic lymphocytes, 557  
 Cytomegalovirus, immunofluorescent study of, 709  
 Cytopepsis, effects of homologous and heterologous sera on, 313
- Dammin, Gustave J., 273  
 Dannenberg, Arthur M., Jr., 553  
 Datta, S. P., 369  
 Davidsohn, I., 783  
 David-West, Tamunoemi Sokari, 873  
 Davis, John S., 339  
 de Vaux St. Cyr, Christiane, 683  
 Dextrans, immunochemical studies on, 633  
 Digestion, tryptic, of injured cells, cytolytic antibody assay by, 625  
 Dixon, Frank J., 614  
 Donath-Landsteiner reaction, 11 S component in, 512  
 Dray, Sheldon, 403
- Eisler, Daniel M., 287, 498, 506  
 Encephalomyelitis viruses, Eastern and Western equine, hemolytic properties of, 76  
 Endotoxin and complement *in vivo*, 748  
 —, bacterial, adjuvant action on antibody formation, 266  
 —, influence on primary antibody response to a purified protein antigen, 266  
 —, systemic reactivity to, 39, 46  
 —, — — —, in pyridoxine-deficient guinea pigs, 46  
 Erdman, Robert L., 179  
 Erythrocytes, human, antigenic components of, 683  
 Evers, M. A., 210

# THE JOURNAL OF IMMUNOLOGY

## *Information for Contributors*

Manuscripts should be carefully revised and the original should be sent to

DR. JOHN Y. SUGG  
*Journal of Immunology*  
Cornell Medical College  
1300 York Ave.  
New York 21, N. Y.

Authors will be charged for space in excess of 10 printed pages and also for all illustrations and tabular or graphic matter in excess of 10 per cent of the pages in each article.

Author's alterations of type or illustrations on proof are charged to the author if in excess of an average of \$1.00 per printed page; correction of printer's errors are not charged to the author.

Reprints must be ordered in advance. A table showing cost of reprints, with an order slip is sent with proof. Orders for purchased reprints must be limited to 1,000 copies. The invoice for reprints will also include charges for illustrations, excess pages and tabular matter, if any.

## *Instructions for the Preparation of Manuscript*

Copy should be typed double-spaced on one side only of 8½ x 11 paper. Even material that is to be set in a type size smaller than that of the main text (footnotes, references, etc.) should be double-spaced.

The author should supply a short title for use as a running head. This should be typed on a separate sheet as the first page of manuscript. Type the complete title of the article on a second sheet, and the authors' names and affiliations on a third sheet. All material that is to be set in a type size different from that of the main text should be typed on separate sheets. This includes tabular matter, case histories, quotations, formulas and other subsidiary matter in the text, footnotes, bibliographies, and legends for illustrations. Displayed formulas which are to be built up to more than one line of type, even if they are the same size type as the text, should be on a separate page. Legends should not be attached to or written on the illustration copy. Positions for tables and figures in the text may be indicated in the margin of the text page.

Manuscripts that do not conform to these instructions will be cut and rearranged so that the matter to be set in different sizes of type can be separated.

*Galley proof.* Authors will receive galley proofs of their papers set separately as outlined above. Galleys will be arranged in the following order: tables, running heads, footnotes, figure legends, text, bibliography. All material that has been cut from the body of the text will be inserted in its proper place in the galleys. This includes formulas, quotations, case histories, and other subsidiary matter. Manuscript will be arranged in this order: formulas, tables, footnotes, figure legends, text inserts including bibliography, text.

*Illustrations.* Copy for illustrations should be unmounted glossy photographs clearly identified as to number, author's name, and top of figure in soft crayon on the back. Graphs should be in India ink on bluelined paper. If larger than 9 x 12, they must be accompanied by glossy photographs within this size.

## *Antisera and Antigens*

E. coli    Salmonella    Shigella    Klebsiella  
ENTEROPATHOGENIC

Bethesda-Ballerup

Proteus    Brucella    Tularensis  
RICKETTSIAL

Streptococci    Pneumococci    Meningococci

B. pertussis    C. albicans    Trichinella

H. influenzae    Leptospira

C. Protein Antiserum and Standard

Infectious Mononucleosis Antigens and Standards

Fluorescent Antibodies and Reagents
