Pharmacologists now, more than ever, are developing drugs, and conducting studies with them in all the biomedical fields. More and more researchers and clinicians, biochemists, cancer investigators, microbiologists and immunologists, pharmaceutical chemists, pathologists, endocrinologists, toxicologists—are turning to this journal for information vital to their work.

RECENT ARTICLES FOR MICROBIOLOGISTS AND IMMUNOLOGISTS:

Dustin, Pierre, Jr. New aspects of the pharmacology of antimitotic agents.

Gale, E. F. Mechanisms of antibiotic action.

Quarterly, one volume a year beginning March, Volume 16 current in 1964. Per year $12.50
BACTO-TRYPSIN 1% for Hemagglutination
BACTO-HEMAGGLUTINATION BUFFER

The use of trypsinized red cells in Rh determinations has improved both the sensitivity and specificity of the test making the direct procedure as reliable as the more involved indirect antiglobulin tests. Trypsin treated erythrocytes favorably influence the determinations of the A, B, S, Le\textsuperscript{a}, Le\textsuperscript{b} and P factors as well as providing a more sensitive cell suspension for virus hemagglutination studies.

**Bacto-Trypsin 1% for Hemagglutination**

is a carefully standardized soluble Trypsin for conditioning erythrocytes for Rh determinations and other hemagglutination tests. Bacto-Trypsin 1% for Hemagglutination is reconstituted by the addition of Bacto-Hemagglutination Buffer solution, yielding a sparklingly clear solution equivalent in tryptic activity to a 1 per cent solution of Trypsin, Difco 1:250.

**Bacto-Hemagglutination Buffer**

rehydrated with distilled water is recommended for the preparation of isotonic buffered saline for use in hemagglutination studies, especially for reconstituting Bacto-Trypsin 1% for Hemagglutination and for suspending and washing erythrocytes preparatory for hemagglutination.

**These reagents** are supplied in companion packages containing 6 vials (10 ml.) of Bacto-Trypsin 1% and 6 vials of Bacto-Hemagglutination Buffer each sufficient for preparing 1000 ml. of buffered saline.

**THE DIFCO MANUAL, NINTH EDITION,**
**including descriptions of these media and their use,**
**is available on request.**
