THE JOURNAL OF IMMUNOLOGY

Information for Contributors

Manuscripts should be carefully revised and the original should be sent to

Dr. John Y. Sugg
Journal of Immunology
Cornell Medical College
1300 York Ave.
New York 21, N. Y.

Authors will be charged for space in excess of 10 printed pages and also for all illustrations and tabular or graphic matter in excess of 10 per cent of the pages in each article.

Author's alterations of type or illustrations on proof are charged to the author if in excess of an average of $1.00 per printed page; correction of printer's errors are not charged to the author.

Reprints must be ordered in advance. A table showing cost of reprints, with an order slip is sent with proof. Orders for purchased reprints must be limited to 1,000 copies. The invoice or reprints will also include charges for illustrations, excess pages and tabular matter, if any.

Instructions for the Preparation of Manuscript

Copy should be typed double-spaced on one side only of 8½ x 11 paper. Even material that is to be set in a type size smaller than that of the main text (footnotes, references, etc.) should be double-spaced.

The author should supply a short title for use as a running head. This should be typed on a separate sheet as the first page of manuscript. Type the complete title of the article on a second sheet, and the authors' names and affiliations on a third sheet. All material that is to be set in a type size different from that of the main text should be typed on separate sheets. This includes tabular matter, case histories, quotations, formulas and other subsidiary matter in the text, footnotes, bibliographies, and legends for illustrations. Displayed formulas which are to be built up to more than one line of type, even if they are the same size type as the text, should be on a separate page. Legends should not be attached to or written on the illustration copy. Positions for tables and figures in the text may be indicated in the margin of the text page.

Manuscripts that do not conform to these instructions will be cut and rearranged so that the matter to be set in different sizes of type can be separated.

Galley proof. Authors will receive galley proofs of their papers set separately as outlined above. Galleys will be arranged in the following order: tables, running heads, footnotes, figure legends, text, bibliography. All material that has been cut from the body of the text will be inserted in its proper place in the galleys. This includes formulas, quotations, case histories, and other subsidiary matter. Manuscript will be arranged in this order: formulas, tables, footnotes, figure legends, text inserts including bibliography, text.

Illustrations. Copy for illustrations should be unmounted glossy photographs clearly identified as to number, author's name, and top of figure in soft crayon on the back. Graphs should be in India ink on bluelined paper. If larger than 9 x 12, they must be accompanied by glossy photographs within this size.
Davey: BLACKLOCK & SOUTHWELL'S GUIDE TO HUMAN PARASITOLOGY, 7th Edition

"This book is intended for the practitioner who, from time to time, will certainly require to make a diagnosis in diseases caused by animal parasites. In it we have endeavoured more particularly to meet requirements of those who have no laboratory near them at which parasitological diagnosis is undertaken.

"There exists, in our experience, a demand on the part of practitioners, for a book in which the salient characters of the common pathogenic parasites of man, in any climate, are set out in a simple and concise way and in which the methods of diagnosis are rapid and easily learned."—From the Preface to the First Edition

Revised by T. H. Davey, O.B.E., M.D. (Belf.), D.T.M. (Livr.); Professor of Tropical Hygiene, Liverpool School of Tropical Medicine, University of Liverpool; formerly Professor of Tropical Diseases of Africa; and Director of the Sir Alfred Jones Laboratory Freetown, Sierra Leone, West Africa.

THE JOURNAL OF IMMUNOLOGY

Information for Subscribers

Published monthly, beginning January, 1929. (From 1916-1925, and in 1928 Volumes I-X, inclusive, and Vol. XV published bi-monthly.)

The subscription price is $21.00 per year in U.S.A.; $21.75 in Canada; $22.50 elsewhere. Single copies, when available, are $2.50 in U.S.A.; $2.75 elsewhere. The subscriptions of members of the American Association of Immunologists are included in the membership dues and are handled by the Association's Treasurer, Dr. Byron H. Waksman, Massachusetts General Hospital, Boston 14, Mass. All other subscriptions should be sent to the publishers.

Change of address: Publisher must be notified 60 days in advance. Journals undeliverable because of incorrect address will be destroyed. Duplicates can be obtained (if available) from the publisher at the regular price of single issues.

New subscriptions and renewals are entered to begin with the first volume of the year when subscription is received. Should any issue of the current volume be out of print at the time the subscription order is received, the pro-rata value of such numbers will be refunded to the subscriber.

Subscriptions should be renewed promptly: To avoid a break in your series, subscriptions should be renewed promptly. The publishers cannot guarantee to supply back issues on belated renewals.

Correspondence concerning all business matters should be addressed to

HUMAN PLASMA PROTEIN FRACTIONS
All preparations are made by methods other than alcohol fractionation. Some fractions such as 7S gamma globulin and albumin [not recrystallized] are 100% pure electrophoretically and are native protein.

PRECIPITATING ANTISERA
Prepared against human protein fractions. Not diluted and are suitable for immunoelectrophoresis or Ouchterlony.

IMMUNOHISTOCHEMICAL REAGENTS
Total serum globulins from various species either labelled or unlabelled with fluorescent dyes.

TISSUE CULTURE PRODUCTS AND ACETONE POWDERS
Also fresh frozen or lyophilized animal organs.

FLUORESCENT LABELLED ANTISERA
Antisera listed can be furnished labelled with fluorescein isothiocyanate or rhodamine B 200. Also with isolation of antibody protein when desired by the investigator.

ANIMAL BLOOD FRACTIONS
Pure 7S gamma fractions from various animals as well as other fractions can be furnished.

DIAGNOSTIC KITS AND REAGENTS
LDH Isoenzyme Test Kit for isolation of various isoenzyme fractions. Lupus Erythematosus Spot Test Kit, uses fluorescent antibody spot test with an inexpensive long wavelength ultraviolet lamp. Also other kits and reagents.

MISCELLANEOUS
Blood detection sera, Normal animal sera, Antisera to animal blood fractions.
