This information is current as of March 31, 2017.
Growth of Virulent and Attenuated Ectromelia Virus in Cultured Macrophages from Normal and Ectromelia-immune Mice. J. A. ROBERTS .......................................................... 837
Radioimmunoelectrophoresis of Thyroid Antigens and Anti-thyroglobulin Antibodies in Clinical and Experimental Thyroiditis. HOWARD C. GOODMAN, E. DUBOIS EXUM AND JACOB ROBBINS ..................................................... 843
Use of Dried Whole Blood Collected on Filter Paper Disks in Adenovirus Complement Fixation and Measles Hemagglutination Inhibition Tests. JACOB A. BRODY, ROBERT MCAULIFFE, RUTH HASELEY AND PAULINE LEE .............................................................. 854
Relation of Physiologic Conditions to Variations in Susceptibility of Mother Mice to Foot-and-mouth Disease Virus. CHARLES H. CAMPBELL .......................................................... 858
Agglutinins of the Red Kidney Bean (Phaseolus vulgaris): A New Cytoagglutinin Distinct from Hemagglutinin. MARVIN TUNIS .......................................................... 864
The Influence of Degree of Aggregation and Virus Quality on the Plaque Titer of Aggregated Vaccinia Virus. G. J. GALASSO, JOHN SHARP AND D. G. SHARP .......................................................... 870
Antigenicity of Lipid-adsorbed Diphtheria and Tetanus Toxoids. J. S. YOUNGNER AND VELMA AXELROD .......................................................... 879
Role of the Sulfhydryl Group in the Denaturation of Human γ-Globulin. DONALD A. GERBER .......................................................... 885
Multiplication of Poliovirus Type I in Preparations of Human Leukocytes and Its Inhibition by Interferon. I. GRESSER AND C. CHANY .......................................................... 889
Separation and Purification of β-Lysin from Normal Serum. DAVID M. DONALDSON, BARBARA ELLSWORTH AND AUDRIA MATHESON .......................................................... 896
Segregation of an Avirulent Variant of Rinderpest Virus by the Terminal Dilution Technique in Tissue Culture. C. J. DE BOER AND T. L. BARBER .......................................................... 902
The Nature of the Antigenic Relationship between Trichinella spiralis and Salmonella typhi. LAWRENCE M. WEINER AND JOANN NEELY .......................................................... 908
Immunity to Transplantable Tumors following Viral Oureolysis. I. Mechanism of Immunity to Ehrlich Ascites Tumor. J. LANDENMANN .......................................................... 912
The Production of Anaphylactic Antibody in the Rat. RUBEN A. BINAGHI AND BARUI BENACERRAF .......................................................... 920
Properties of Rat Anaphylactic Antibody. RUBEN A. BINAGHI, BARUI BENACERRAF, KURT J. BLOCH AND FRANCOIS M. ROULILSKY .......................................................... 927
Heterotypic Hemagglutination-Inhibition Antibody Responses in Volunteers Inoculated with Adenovirus Types 26 and 27. JULIUS A. KASEL, VERNON KNIGHT AND DAVID W. ALLING .......................................................... 934
Aggregation and Activity of Forssman Hapten in Dilute Aqueous Solutions. EULA C. MEGLI AND M. F. MALLETTE .......................................................... 941
The Measurement of Second Component of Human Complement (C2a) by Its Interaction with EAC’lagp, 4sp Cells. K. FRANK AUSSEN AND FRANCOIS BEER .......................................................... 946
Mycoplasma Species Identification Based upon Growth Inhibition by Specific Antibodies. WALLACE A. CLYDE, JR. .......................................................... 958
Studies on “Cross-reacting” Isoagglutinins. M. YOKOYAMA AND H. H. FUDENBERG .......................................................... 966
The Effect of Sodium Dodecylsulfate on Intact and Insoluble Papain Hydrolyzed Immune Globulin. JOHN J. CEBRA .......................................................... 977
The Reductive Dissociation of Rabbit Immune Globulin in Sodium Dodecylsulfate. H. JAQUET, B. BLOOM AND JOHN J. CEBRA .......................................................... 991
