THE JOURNAL OF IMMUNOLOGY

Information for Contributors

Manuscripts should be carefully revised and the original should be sent to

DR. JOHN Y. SUGG
Journal of Immunology
Cornell Medical College
1300 York Ave.
New York, N. Y. 10021

Authors will be charged for space in excess of 10 printed pages and also for all illustrations and tabular or graphic matter in excess of 10 per cent of the pages in each article.

Author's alterations of type or illustrations on proof are charged to the author if in excess of an average of $1.00 per printed page; correction of printer's errors are not charged to the author.

Reprints must be ordered in advance. A table showing cost of reprints, with an order slip is sent with proof. Orders for purchased reprints must be limited to 1,000 copies. The invoice or reprints will also include charges for illustrations, excess pages and tabular matter, if any

Instructions for the Preparation of Manuscript

Copy should be typed double-spaced on one side only of 8½ x 11 paper. Even material that is to be set in a type size smaller than that of the main text (footnotes, references, etc.) should be double-spaced.

The author should supply a short title for use as a running head. This should be typed on a separate sheet as the first page of manuscript. Type the complete title of the article on a second sheet, and the authors' names and affiliations on a third sheet. All material that is to be set in a type size different from that of the main text should be typed on separate sheets. This includes tabular matter, case histories, quotations, formulas and other subsidiary matter in the text, footnotes, bibliographies, and legends for illustrations. Displayed formulas which are to be built up to more than one line of type, even if they are the same size type as the text, should be on a separate page. Legends should not be attached to or written on the illustration copy. Positions for tables and figures in the text may be indicated in the margin of the text page.

Manuscripts that do not conform to these instructions will be cut and rearranged so that the matter to be set in different sizes of type can be separated.

Galley proof. Authors will receive galley proofs of their papers set separately as outlined above. Galleys will be arranged in the following order: tables, running heads, footnotes, figure legends, text, bibliography. All material that has been cut from the body of the text will be inserted in its proper place in the galleys. This includes formulas, quotations, case histories, and other subsidiary matter. Manuscript will be arranged in this order: formulas, tables, footnotes, figure legends, text inserts including bibliography, text.

Illustrations. Copy for illustrations should be unmounted glossy photographs clearly identified as to number, author's name, and top of figure in soft crayon on the back. Graphs should be in India ink on bluelined paper. If larger than 9 x 12, they must be accompanied by glossy photographs within this size.
Vol. 1 Progress in Immunobiological Standardization

Proceedings of the 8th International Congress for Microbiological Standardization, Bern 1962

Edited by

XVI + 268 p., 37 fig., 58 tab., 1964. US $ 15.–

From the Contents

Antibiogram and its Reagents Used – L’antibiogramme et ses réactifs
Diagnostic Methods in Rheumatic Diseases – Méthodes de diagnostic pour les affections rhumatismales
Reagents in Virology – Réactifs en virologie
Microbial Antigens – Antigènes microbiens
Sterility Tests – Tests de stérilité
Control of Biological Products Performed by Official Laboratories – Contrôle des produits biologiques par les contrôleurs d’Etat
Reagents in Allergy – Réactifs en allergie
Enzymes in Immunology – Enzymes en immunologie
Methods of Desinfection – Méthodes de désinfection
Problems Concerned with Live Poliomyelitis Virus Vaccine – Problèmes reliés aux vaccins poliomyélitiques constitués par des germes vivants
Summary of the Subjects, Conclusions and Resolutions – Résumé des thèmes, conclusions et résolutions

The Permanent Section of Microbiological Standardization, a section of the International Association of Microbiological Societies, has been organizing international Meetings since 1956. Until now the Proceedings of these meetings had been printed by the countries organizing these meetings. Henceforth the Proceedings will form a series called “Progress in Immunobiological Standardization”. The work of the Section prepares or completes that of the World Health Organization. It studies the methods of application of international standards and compares the most recent steps in research in the field of sera, vaccines, allergens, enzymes and other immunobiological products. Volume 1 contains the original findings, resolutions and conclusions of the Congress held in Bern in 1962. It commences with an introduction on the aims of the publication, followed by a table of the matter of the first seven meetings. At the end of the volume there is a summary in English and French of the topics presented, giving a quick guidance on the contents of the four principal subjects and of the six round table meetings. One of the main interests in these meetings of the Section rests in the collaboration between official controllers, producers and independent researchers.

Besides the international Meetings, the Section organizes symposia (eleven until now) on selective themes. Some of these Proceedings have been published. Their regrouping in the new series of “Progress in Immunobiological Standardization” is in consideration.

THE JOURNAL OF IMMUNOLOGY

Information for Subscribers

Published monthly, beginning January, 1929. (From 1916-1925, and in 1928 Volumes I-X, inclusive, and Vol. XV published bi-monthly.)

The Subscription price is $28.00 per year in U.S.A.; $29.25 in Canada; $30.00 elsewhere. Single copies, when available, are $2.75 in U.S.A.; $3.00 elsewhere. The subscriptions of members of the American Association of Immunologists are included in the membership dues and are handled by the Association's Treasurer, Dr. Sheldon Dray, Laboratory of Immunology, National Institute of Allergy and Infectious Diseases, National Institutes of Health, Bethesda, Md. 20014. All other subscriptions should be sent to the publishers.

Change of address: Publisher must be notified 60 days in advance. Journals undeliverable because of incorrect address will be destroyed. Duplicates can be obtained (if available) from the publisher at the regular price of single issues.

New subscriptions and renewals are entered to begin with the first volume of the year when subscription is received. Should any issue of the current volume be out of print at the time the subscription order is received, the pro-rata value of such numbers will be refunded to the subscriber.

Subscriptions should be renewed promptly: To avoid a break in your series, subscriptions should be renewed promptly. The publishers cannot guarantee to supply back issues on belated renewals.

Correspondence concerning all business matters should be addressed to

VIRUSES
NUCLEIC ACIDS
AND CANCER

The facts, ideas, theories and discussions of 78 internationally known cancer researchers, converging upon the solution of the human cancer problem, make this book a relatively complete picture of all now known in the field. The viral concept of oncogenesis, applied to human cancer, is still only a working hypothesis. Many basic and unanswered questions block access to an ultimate solution. Reports of recent work are given here, and partial answers supplied to some of the problems cancer researchers are focusing on today.

Published for The University of Texas M. D. Anderson Hospital and Tumor Institute. Edited by Russell W. Cumley, Ph.D., University of Texas Medical Center, Houston.

1963 704 pp., 288 figs. $16.00

THE WILLIAMS & WILKINS COMPANY

425 E. PRESTON STREET/BALTIMORE, MARYLAND, U.S.A. 21202
CONTENTS

S. Cohen: Nomenclature of human immunoglobulins (Editorial)
P. Wolf and K. W. Walton: Investigation of a quantitative anomaly encountered in the assay of fibrinogen by immuno-diffusion
D. C. Dumonde, Lucille Bittenisky, G. J. Cunningham and J. Chaven: The effects of antibodies on cells. I. Biochemical and histochemical effects of antibodies and complement on ascites tumour cells
J. A. Forrester, D. C. Dumonde and E. J. Ambrose: The effects of antibodies on cells. II. Changes in the electrophoretic mobility of ascites tumour cells treated with antibodies and complement
J. D. Smiley and H. E. Jasins: Incorporation of [14C] hexoses into the carbohydrate of gamma2-globulin in vitro
K. James: A study of the alpha2-macroglobulin homologues of various species
Sonia Baur, I. M. Roitt and D. Doniach: Characterization of the human gastric parietal cell auto-antigen
Ann M. Dresser: Antibody formation in the recipients of tissue cultured spleen cells
R. J. Cook: Reversed passive haemagglutination systems for the estimation of tetanus toxins and antitoxins
W. Norton and M. Ziff: Electron microscopic observations on the localization of antigen in the tuberculin reaction
H. Rangel: Study of the cross-reaction between rabbit anti-bovine serum albumin antibodies and equine serum albumin
H. E. Jasins and L. E. Glynn: The antigenicity of some synthetic poly-iminoacids. I. Antigenic properties of poly-L-proline
A. E. Pierce and A. Feinstein: Biophysical and immunological studies on bovine immune globulins with evidence for selective transport within the mammary gland from maternal plasma to colostrum

The Subscription price in the United States and Canada is $40.00
for two volumes of six parts per year (Single copies $4 each)
