SHANDON

UNIVERSAL ELECTROPHORESIS SYSTEM

ACCESSORIES

FOR IMMUNO-ELECTROPHORETIC TECHNIQUES

Slide Tray and Perspex Scraper provide uniform and reproducible gel thickness.

Cutting the gel with the Universal Pattern Cutter.

Schematic diagram of immuno-electrophoretic pattern

The immuno-electrophoretic technique has been developed in the Shandon system for use as a routine method.

Apparatus dimensions are standardized, regular microscope slides are used, agar gel thickness is reproducible, and running times are reasonably constant.
