Gel Double Diffusion Studies with Group B and Group A, Type 9, Coxsackieviruses.
On the Mechanism of Adjuvant Action of Nonspecific Stimulators of Antibody Formation. I. Ya. Uchitel and E. L. Khasman .................................................... 492
Relationship of Passive Cutaneous Anaphylaxis to Antibodies in the Serum of Ragweed Hay Fever Patients after Injection Treatment. John T. Connell and William B. Sherman ............................................................. 498
Pseudoglobulin Rheumatoid Factors. Ralph Heimer and Carlo J. Nosenzo ........ 502
Estimation of Molecular Size of Complement Components by Sephadex Chromatography. Tibor Borsos and Herbert J. Rapp .................................................... 510
Gm Genes and γ-globulin Synthesis in the Human Fetus. L. Martinez and H. H. Fudenberg .................................................................................. 514
Lack of Correlation between Infectivity, Serologic Response and Challenge Results in Immunization with an Avian Infectious Bronchitis Vaccine. Livio G. Raggi and George G. Lee .................................................................................. 530
Intracellular Distribution and Degradation of Bacteriophage in Mammalian Tissues. Jonathan W. Uhr and Gerald Weissmann .................................................... 538
Separation of Clostridium perfringens Type D Toxins. Andreas H. W. Hauschild ............................................................. 544
Inhibition of the Development of Delayed Hypersensitivity by Treatment with Antiserum. Alfred J. Crowle and C. C. Hu .................................................................................. 550
Studies of Antibodies to 1956 and 1963 Equine Influenza Viruses in Horses and Man. Elva Minuse, James L. McQueen, Fred M. Davenport and Thomas Francis, Jr. ...................... 559
Autoinhibition of Rheumatoid Factor Reactivity Demonstrated by a Block Hemagglutination Procedure. Irwin Oreskes and Charles M. Plotz .................................................... 566
Phagocytosis and Intracellular Fate of Pasteurella tularensis. III. In Vivo Studies with Passively Transferred Cells and Sera. Bert D. Thorpe and Stanley Marcus ............................................................. 572
The Flocculation Test and the Law of Mass Action. Leo Levine and Louise Wyman ............................................................. 577
Studies on Histoplasmosis. II. The Histoplasma Inhibitory Factor in Hamsters Incubated Intradermally or Subcutaneously. Elizabeth M. O’Hern .......................... 591
Univalence of Half-Molecules of Rabbit Antibody. Richard Hong, Jerry L. Palmer and Alfred Nisonoff .................................................................................. 603
A Study of the Antigenic Relationship between Human Measles Virus and Canine Distemper Virus. J. A. Roberts .................................................................................. 622
Inhibition of the Third Component of the Complement System by Derivatives of Aromatic Amino Acids. Ross S. Basch ............................................................. 629
Role of the Posterior Hypothalamus in Mediating the Lethal Action of Bacterial Endotoxin in the Rat. Philip J. Porter and Edward H. Kass .................................................................................. 636
