THE JOURNAL OF IMMUNOLOGY

Information for Contributors

Manuscripts should be carefully revised and the original and one carbon copy should be sent to

DR. JOHN Y. SUGG
Journal of Immunology
Cornell Medical College
1300 York Ave.
New York, N. Y. 10021

Authors will be charged $35.00 per page for all pages in excess of 6 per article.

Author's alterations of type or illustrations on proof are charged to the author if in excess of an average of $1.00 per printed page; correction of printer's errors are not charged to the author.

Reprints must be ordered in advance. A table showing cost of reprints, with an order slip is sent with proof. Orders for purchased reprints must be limited to 1,000 copies. The invoice or reprints will also include charges for illustrations, excess pages and tabular matter, if any.

Instructions for the Preparation of Manuscript

Copy should be typed double-spaced on one side only of 8½ x 11 paper. Even material that is to be set in a type size smaller than that of the main text (footnotes, references, etc.) should be double-spaced.

The author should supply a short title for use as a running head. This should be typed on a separate sheet as the first page of manuscript. Type the complete title of the article on a second sheet, and the authors' names and affiliations on a third sheet. All material that is to be set in a type size different from that of the main text should be typed on separate sheets. This includes tabular matter, case histories, quotations, formulas and other subsidiary matter in the text, footnotes, bibliographies, and legends for illustrations. Displayed formulas which are to be built up to more than one line of type, even if they are the same size type as the text, should be on a separate page. Legends should not be attached to or written on the illustration copy. Positions for tables and figures in the text may be indicated in the margin of the text page.

Manuscripts that do not conform to these instructions will be cut and rearranged so that the matter to be set in different sizes of type can be separated.

Galley proof. Authors will receive galley proofs of their papers set separately as outlined above. Galleys will be arranged in the following order: tables, running heads, footnotes, figure legends, text, bibliography. All material that has been cut from the body of the text will be inserted in its proper place in the galleys. This includes formulas, quotations, case histories, and other subsidiary matter. Manuscript will be arranged in this order: formulas, tables, footnotes, figure legends, text inserts including bibliography, text.

Illustrations. Copy for illustrations should be unmounted glossy photographs clearly identified as to number, author's name, and top of figure in soft crayon on the back. Graphs should be in India ink on bluelined paper. If larger than 9 x 12, they must be accompanied by glossy photographs within this size.
"Scientists who have a common and important purpose and who use rather similar methods to achieve it will always in the end demand a journal devoted to their own special interests. So it has been with transplantation biology, a scientific growth of remarkable vigor, and this new journal Transplantation."

From the Editorial by P. B. Medawar

Transplantation is the journal of definitive publication, containing formal papers and brief reports, abstracts of basic and clinical papers on tissue transplantation and immunological reactions, and featuring bibliographies of pertinent special topics.

Edited by: L. Brent, H. Conway, E. J. Eichwald, N. Kaliss and J. E. Murray

Transplantation is published bimonthly, 600 pages a year. Price per year... $15.00

Facts, ideas, theories and discussions presented by 78 internationally famous cancer researchers, and converging upon the solution of the human cancer problem, make this single volume a relatively complete reflection of all that is known in the field.

The viral concept of oncogenesis, as applied to human cancer, is still only a working hypothesis because of the many basic and unanswered questions which block access to an ultimate solution. During this symposium, reports on recent advances were given, and partial answers supplied to such queries as

Do viruses cause all tumors and cancers in animals? Are viruses an indispensable factor in tumor development?

What is the chemical composition of tumor viruses, and the structure of oncogenic nucleic acids?

How does the virus development take place?

and others representative of some of the problems upon which all cancer researchers are focusing today.

Published for The University of Texas M. D. Anderson Hospital and Tumor Institute. Edited by Russell W. Cumley, Ph.D., University of Texas Medical Center, Houston.

1963 704 pp., 288 figs. $16.00
IMMUNOLOGY

Official Journal of the BRITISH SOCIETY FOR IMMUNOLOGY
Editor: L. E. GLYNN

VOL. 8, NO. 5 MAY 1965

CONTENTS

M. MAUREEN DALE: The applicability of anaphylactic tests in studies of antigen mixtures. I. The sensitivity of the tests

M. MAUREEN DALE: The applicability of anaphylactic tests in studies of antigen mixtures. II. The discriminatory capacity of the tests

R. N. HAMBURGER AND S. E. MILLS: Passive immune kill of cells in tissue culture

P. BARAM AND M. M. MOSKO: A dialysable fraction from tuberculin-sensitive human white blood cells capable of inducing tuberculin-delayed hypersensitivity in negative recipients

INGRID V. ALLEN: The effect of irradiation on the fever of delayed hypersensitivity

JEAN M. DOLBY: The antibacterial effect of Bordetella pertussis antisera

JEAN M. DOLBY AND W. A. VINCENT: Characterization of the antibodies responsible for the 'bactericidal activity patterns' of antisera to Bordetella pertussis

J. L. MONGAR AND B. A. V. PERERA: Oxygen consumption during histamine release by antigen and compound 48/80

B. A. V. PERERA AND J. L. MONGAR: Effect of anoxia, glucose and thioglycollate on anaphylactic and compound 48/80-induced histamine release in isolated rat mast cells

M. S. BROOK: The immunological behaviour of mature C57BL/6J mice thymectomized at birth

The Subscription price in the United States and Canada is $40.00 for two volumes of six parts per year (Single copies $4.00 each)
