INDEX

A2 influenza viruses, antigenic variation of, 47
Abrams, Gerald D., 105
Acriflavine hydrochloride, suppression of antibovine serum albumin production by, 682
Adenovirus-12, properties of, 976
Agglutination, enumeration of free cells in, 62
— of latex particles without antigen adsorption, 710
Agglutinin response, peritoneal phagocytes in, 765
Agulu, Luis A., 62
Albumin antigens, reverse passive anaphylaxis with, 443
Allergy, wasp sting, polistes venom immunization against, 785
Allogenic skin grafts, rejection, 22
Amino acids, aromatic, in inhibition of complement system, 629
6-Aminopenicillanic acid, penicillin G and cephalothin, common antigenic determinants of, 696
Anaphylactic reactions, antigen-antibody complexes initiating, 111, 121
Anaphylaxis, antigen excess in, 890
— mouse, lysosomes in, 692
— passive cutaneous, in hay fever patients, 498
—, —, quantitative comparison of abilities of haptens initiating, 111
—, —, reverse, with albumin antigens, 443
—, reverse passive cutaneous, with ovalbumin, 456
Antibodies, anti-kidney, cross-reactions of, 950
— arbovirus, guinea pig, 1
— blood groups A-B cross-reacting, specificity of, 197
— complement-fixing, in primary and secondary typhus, 723
— enterovirus, in ascitic fluids, 257
— fluorescent, method, serologic differentiation of trachoma strains by, 467
— formation, action of stimulators of, 492
—, — adjuvant action of bacterial endotoxins on, 416
— to protein antigens, suppression of, 966
— humoral, studies of, in thyroiditis, 329
— incomplete and combining, effect of prolonged immunization on, 423
— inhibition by tissue factors, 379
— iodine-labeled rabbit, degradation, 674
— mobility, differences in, 819
— neutralized poliovirus, reactivation by physical means of, 143
— production by determined cells, 91
— Q fever, radioisotope precipitation test for study of, 959
— rabbit, heat stability of, 31
— response, after immunization with parainfluenza viruses, 67
—, primary, fate of radioactive bovine γ-globulin during, 105
— titer, relation to antigen persistence, 938
— to equine influenza virus, 563
— to foot-and-mouth disease, 858
— typhus, 195 and 73, 734
—, —, primary and secondary, 723
—, univalent half-molecules of, 603
— virus neutralizing, nature of, 344
Anti-bovine serum albumin production, suppression by acriflavine hydrochloride, 682
Antigen, bacterial, fate of, in macrophages, 898
— catabolism and lysosomes, 544
— complement, absence of, in NZB mice, 437
— D (Rho), in erythroblastosis fetalis, 472
— excess in anaphylaxis, 890
— heat stability of antibodies in fractions of antisera to, 31
— immunogenic, complement fixation reaction for measurement of, 611
— of bacteriophage ϕ X 174, 18
— of Borrelia turicatae, 805
— of respiratory mucosa, 741, 752
— of Sendai virus, 658
— organ-specific, of liver, testicle and pituitary, 157
— persistence, relation to antibody titer, 938
— protein, hypersensitivity to, 74
— suppression of delayed hypersensitivity and antibody formation to, 908
— S and V, of Sendai virus, 658
— Shigella, adoptive tolerance to, 352
— establishment of unresponsiveness to, 205
— interference with establishment of immunologic tolerance to, by specific antisemur, 921
— subarachnoid and intracerebral, 760
Antigen-antibody absorption tests for groups B and A, type 9, coxsackieviruses, 482
— complexes initiating anaphylaxis, 111, 121
— reaction, platelet damage by, 236, 247
Antigenic relationships between WEE strains, 365
— variation among influenza B viruses, 301
— of A2 influenza viruses, 47
Antigenicity of penicillin, cephalothin and 6-aminopenicillanic acid, 696
Antiglobulin in normal serum, 184
— reaction, mixed, applied to monolayer cell cultures, 539
Antimycobacterial activity of tuberculostatic factor on intracellular bacilli, 220
Antinuclear factors and nucleoprotein, effect on ionic strength on reaction between, 214
Antisera, inhibition of hypersensitivity by treatment with, 555
—production, and characterization in the complement reaction, 877
—, specific, interference with establishment of immunologic tolerance to Shigella antigens by, 921
—to various antigens, heat stability of antibodies in fractions of, 31
Antithymocyte serum and hypersensitivity, 74
Antiviral activity of N-ethylisatin thiosemicarbazone, 794
—factors in human milk and serum, 262
Arana, Jose A., 337
Arbesman, Carl E., 741, 752
Arbovirus antibodies, guinea pig, 1
Arquembourg, Renee Cornille, 307
Artenstein, Malcolm S., 344
Ashe, Warren K., 385
Azadova, N. B., 658
Bacilli, intracellular, antimycobacterial activity of tuberculostatic factor on, 220
Bacteriophage φ X 174, antigens of, 18
—, intracellular distribution and degradation of, in mammalian tissues, 544
—, relationship between blood clearance and viruria in mice and rats with, 833
Banovitz, Jay, 824
Barron, Almen L., 401
Barth, Werner F., 410, 819
Basch, Ross S., 629
Baumstark, John S., 214
Bell, E. J., 883
Bellanti, Joseph A., 1, 344
Bennett, John E., 916
Berkhoff, H., 467
Billote, Juanito B., 966
Blood clearance and viruria, relationship, 833
Boand, A. V., 475
Boas, Herbert S., 741, 752
Borman, Earle K., 282
Borrelia turicatae, antigens of, 805
Borsos, Tibor, 205, 510, 662
Bovine serum albumin, induction of tolerance to, by x-ray, 430
Brandrius, Michael W., 696
Brill-Zinsser disease, serologic studies of, 723, 734
Bronchitis vaccine, avian infectious, evaluation of immunity with, 538
Buescher, Edward L., 1, 47, 344
Bullock, Ward E., 317
Burgdorfer, W., 883
Carrageenan and complement, first component of, interaction, 662
Carson, Margaret E., 99
Cells, determined, antibody production by, 91
—, homologous lymph node, transfer of immunity by, 234
—, mammalian cultures, reactions of human sera with, 401
—, monolayer cultures, mixed antiglobulin reaction applied to, 530
—, plaque-forming, survival curves for production of, 715
—, species of origin of, identification by mixed hemadsorption, 530
—, transplants, lymphoid, prevention of immunologic tolerance by, 205
Cephalothin, 6-aminopenicillanic acid, penicillin G, common antigenic determinants of, 696
Chang, P. W., 67
Chimerism and immunologic tolerance, 150
Clostridium perfringens, type D toxins, 551
Clostridioides immitis, immunization of mice to, 132
Cold environment, immunity and resistance to infection, interrelationship of, 649
—exposure, role in immunity, 649
Cole, Roger M., 898
Complement, antigenic component of, absence of, in NZB mice, 437
—, components of, molecular size of, 510
—, first component of, and carrageenan, interaction, 662
—fixation, induction of, and α-globulin, 824
— test on poliomyelitis vaccine, 611
—fixing antibodies in primary and secondary typhus, 723
—, effect of prolonged immunization on, 423
—reaction, antiserum production, and characterization in, 877
—system, inhibition of, 629
Conjugates, protein, immune response to, 177
Connell, John T., 498
Cowen, K. M., 858
Coxsackievirus gel diffusion studies, 482
Criental, Crile, 662
Cryptococcus neoformans, polysaccharide, 916
Cross-reactivity between groups A and C streptococci, 282
Crowle, Alfred J., 74, 555
Cuadrado, R. R., 67
D and L polymers, comparison of, 289
D (Rh) antigen in erythrolasticosis fetalis, 272
Dale, H. E., 760
Dannenberg, Arthur M., Jr., 99
Davenport, Fred M., 301, 563
Davidsohn, I., 423
Davis, L. E., 760
Decker, Walter J., 805
Degradation, immune, in passively sensitized mice, 667, 674
Dennis, Juanita, 482
de Vries, Andre, 164
Distemper and measles viruses, antigenic relationship between, 622
DNP-erythrocytes, hemagglutination of, 317
Donaldson, Paul, 710
Dreyfus, Joseph C., 62
Dvorak, Harold F., 966
E* transformation reaction, resolution into multiple steps, 295
Edwards, V. M., 47
Encephalomyelitis, Western equine, antigenic relationships between strains, 365
Endotoxin, bacterial, action of posterior hypothalamus on, 641
--, adjuvant action of, on antibody formation, 416
--, induction of mitosis in macrophages by, 37
Enterovirus antibodies in ascitic fluids, 257
Enzymes, hydrolytic, of rabbit mononuclear exudate cells, 99
Equine influenza virus, antibodies to, 563
Erythroblastosis fetalis, D (Rh) antigen in, 272
Erythrocyte chimerism and acquired immunologic tolerance, 150
Erythrocytes, human, hemagglutination reactions of, 317
Escherichia coli urinary infections, 337
Espmark, J. Åke, 530
N-Ethylisation β-thiosemicarbazone, antiviral activity of, 794
Fabiyi, Akinyele, 257
Fagraeus, Astrid, 530
Fahey, John L., 84, 410, 819
Farr, Richard S., 692
Felsenfeld, Oscar, 805
Fibroma virus, influence of heparin on resistance to infection with, 228
Fishel, Charles W., 379
Flax, Martin H., 966
Flocculation test and law of mass action, 586
Fluorescent antibody method, serologic differentiation of trachoma strains by, 467
—technique in detection of immunechemical aspects of cross-reactivity between groups A and C streptococci, 282
Foley, Edward J., 794
Foot-and-mouth disease virus, antibodies to, 858
Forbes, Ian J., 37
Francis, Thomas, Jr., 563
Frank, Michael M., 295
Frick, O. L., 890
Friedman, Herman, 205, 352, 921
Frothingham, Thomas E., 521
Fudenberg, H. H., 514
Gaon, Jakob A., 723, 734
Gery, Igal, 950
Gibs, Mary B., 55, 62
Gill, Fred A., 898
βc-Globulin, mouse, 877
—of human serum, 307
γ-Globulin, aggregated, 824
—, bovine, radioactive, fate in mouse, 105
—localization, studies of, in thyroiditis, 329
—subunits, interaction of rheumatoid factors with, 927
γG-Globulin synthesis and Gm genes, 514
Gm genes and γG-globulin synthesis, 514
Gocke, D. J., 236, 247
Goldblum, Natan, 164
Grafts, skin, allogeneic, rejection of, 22
Greenwalt, Tibor J., 272
Greiff, Donald, 395
Haff, Richard F., 842
Halasz, Nicholas A., 253
Halpern, B. N., 443, 456
Hapten-polysine conjugates, immunogenicity of, 289
Haptens which evoke passive cutaneous anaphylaxis, effect of molecular size on abilities of, 121
—quantitative comparison of abilities of, 111
Hase, Tatsuo, 191
Hasenclever, H. F., 916
Haurowitz, Felix, 963
Hauschild, Andreas H. W., 551
Havens, M. L., 475
Heat stability and rabbit antibodies, 31
Heaton, E., 234
Heimer, Ralph, 502
Hemagglutination measurements, electronic, evaluation of, 55, 62
—methods, limitations, 55
—of DNP-erythrocytes, 317
—passive, in determination of Pasteurella pestis antibody patterns, 778
—studies of D (Rh) antigen in erythroblastosis fetalis, 272
Hemagglutinins, specific, production, 22
Hemolysis, immune, lysolecithin formation in, 40
Henderson, J. R., 365
Hennessy, Albert V., 301
Heparin, influence on resistance to infection with fibroma virus, 228
Herlem, G., 455
Herpes labialis, antigenic variations in herpes simplex virus isolants from, 385
Herpes simplex virus, antigenic variations in, 385
Higginbotham, R. D., 228
Hiroyo, Shun-ichi, 927
Histoplasma inhibitory factor, 592
Histoplasmosis, studies on, 592
Holmes, George E., 1
Homografts, skin, enhancement of, by passive transfer, 253
Hong, Richard, 603
Hornung, Maria, 307
Hooley, R. J., 475
Host, immunologic status of, and pyelonephritis, 337
Howe, Calderon, 197
Hu, C. C., 555
Hypersensitivity, delayed, inhibition of development of, 555
— to protein antigens, suppression of, 966
— to protein antigens, 74
Hypothalamus, posterior, action of, on bacterial endotoxin, 641
Immune degradation in passively sensitized mice, 667, 674
— hemolysis, terminal steps of, 295
— reactions, platelet damage by, 236, 247
— response, differentiation of lymphocytes in, 568
— to protein conjugates, 177
— sheep red cells, radiosensitivity of, 715
Immunity, cold environment and resistance to infectionship, interrelationship of, 649
— evaluation in avian infectious bronchitis, 538
— postoncotic, to transplantable tumors, 461
— role of cold exposure in, 649
— transfer of, by sensitized homologous lymph node cells, 294
Immunization, antibody responses of different animals after, 67
— prolonged, 423
— with avian infectious bronchitis, evaluation, 538
Immunoelectrophoresis in determination of Pasteurella pestis antibody patterns, 778
— quantitative factors in, 942
Immunogenicity of hapten-polylysine conjugates, 289
Immunoglobulins of mice, 410
— serum, quantitative determination of, 84
Infection, resistance to, cold environment, and immunity, interrelationship of, 649
Influenza B viruses, antigenic variation among, 301
— sialic acid receptors in adsorption of, 542
— viruses ($A_2$), antigenic variation of, 47
Innis, Michael D., 406
Interferon, serologic specificity of, 371
Intracellular bacilli, antmycobacterial activity of tuberculostatic factor on, 220
Intracerebral antigens, immunologic response to, 760
Ionic strength and antinuclear factors, 214
Isacson, P., 67
Ishizaka, Kimishige, 824
Ishizaka, Teruko, 824
Jackson, George Gee, 337
Johnson, Arthur G., 105, 416
Kano, Kyoichi, 401
Kantor, Fred S., 317
Karakawa, Walter W., 282
Kass, Edward H., 641
Katzelnelson, E., 467
Keller, Robert, 143
Kennedy, J. C., 715
Khasman, E. L., 492
Kidney localizing antibody, cross-reactions of, 950
Kirk, B. E., 475
Klein, Paul A., 461
Kochan, Ivan, 220
Koffler, David, 329
Kong, Yi-Chi M., 132
Kozij, Vera M., 337
Krause, Richard M., 282
Laekman, David B., 883, 959
Laffin, Robert J., 214
Latex agglutination without antigen adsorption, 710
Lee, E. L., 423
Lee, George G., 538
Lem, Nancy E., 794
Lennette, Edwin H., 482
Leukemia, myeloid, agglutinating factor in, 406
Levine, Bernard B., 111, 121
Levine, H. B., 132
Levine, Leo, 586
Li, Isabel W., 852
Liacopoulos-Briot, M., 443, 456
Liacopoulos, P., 443, 456, 890
Lieberman, Melvin, 794
Lindemann, Jean, 461
Linacott, William D., 430
Lipton, Murray M., 323
Liver, organ specific antigens of, 157
Loan, R. W., 760
Loveless, Mary Hewitt, 755
Lymphocyte, homologous, transfer of immunity by, 224
Lymphocytes in immune response, 868
Lysis, immune, of thymus and spleen cells, 358
Lysolecithin, formation in immune hemolysis, 40
Lysosomes and antigen catabolism, 544
— in mouse anaphylaxis, 692
Lysozyme, macrophage, and tuberculosis, 99
MacFarlane, J. O., 475
Macmorine, H. G., 611
Macrophages, fate of bacterial antigen in, 898
Mahin, Dorsey T., 191
Makinodan, T., 765, 868
Marcus, Stanley, 578
INDEX

1965

Mardiney, M. R., Jr., 877
Mørtensen, L., 514
Mass action and flocculation test, 586
Mazow, Jack B., 741, 752
McCarthy, John S., 214, 966
McCulloch, E. A., 715
McKelvey, Eugene M., 84
McNeill, David, 778
McQueen, James L., 563
Measles and distemper viruses, antigenic relationship between, 622
—virus, predicted stability of, 395
Membranes, human mucous, antigenic properties of, 741, 752
2-Mercaptoethanol, difference in response to, in primary and secondary typhus, 734
Merritt, Katharine, 416
Meyer, K. F., 778
Michaels, Richard H., 262
Middleton, Elliott, Jr., 40
Milgrom, Felix, 157, 401
Milk, antiviral factors in, 262
Mims, Grover R., 184
Minuse, Elva, 301, 563
Mitchell, S., 289
Mitosis, induction of, in macrophages by endotoxin, 37
Mononuclear exudate cells, hydrolytic enzymes of, 99
Moroz-Perlmutter, Chaya, 164
Morrison, Sherie Leaver, 667
Mucous membranes, human, antigenic properties of, 741, 752
Mudd, Stuart, 852
Mulhasanovie, Mujessira, 723
Müller-Eberhard, H. J., 877
Mumps and Sindbis viruses, concurrent infection, 521
Murillo, George J., 228
Murray, Edward S., 723, 734
Myhre, Byron A., 272
Nall, Thomas M., 785
Nedelkoff, B., 234
Nettlesheim, Paul, 808
Neurotoxin, purified, of Vipera palpestris venom, 164
Neva, Franklin A., 833
Nisonoff, Alfred, 603
Norins, Leslie C., 437
Northey, William T., 649
Nosenzo, Carlo J., 502
Nucleic acid, enhancement of antibody formation by, 416
—preparations, adjuvant action of, 416
Nucleoprotein and antinuclear factors, effect of ionic strength on reaction between, 214
O'Connor, Jane M., 723, 734
O'Hern, Elizabeth M., 592
Oreskes, Irwin, 567
Orloff, Marshall J., 253
Osler, Abraham G., 236, 927
Ovalbumin, reverse passive cutaneous anaphylaxis with, 456
Ovary, Zoltan, 410, 819
Palmer, Jerry L., 603
Panda, J. N., 760
Parainfluenza viruses, 67
Parker, C. W., 289
Paronetto, Fiorenzo, 329
Passive arthus reactions, effect of molecular size on abilities of haptens evoking, 412
—cutaneous anaphylaxis in hay fever patients, 498
—transfer, enhancement of skin homografts by, 253
Pasteurella pestis antibody patterns, 778
Pasteurella tularensis, fate of, 578
Paucker, Kurt, 371
Penicillin G, cephalothin and 6-aminopenicillanic acid, common antigenic determinants of, 696
Pennington, Karen, 710
Perkins, Eugene H., 765
Permeability, vascular, induced by polynucleosinic acid, 12
Perramont, M. F., 443
Phagocytes, peritoneal, in agglutinin response, 765
Phillips, Gerald B., 40
Picken, E. G., 883
Pike, Robert M., 31
Pituitary, organ specific antigens of, 157
Plaque-forming cells, survival curves for production of, 715
Plasma requirement for immune platelet damage, 247
Plasmacytes in thymus of normal rat, 172
Platelet damage by antigen-antibody reaction, 236, 247
Plotz, Charles M., 567
Poliomyelitis vaccine, complement fixation test on, 611
—, one-dose potency test for, 475
Poliovirus, antibody-neutralized, reactivation of, 143
—, relationship between blood clearance and viruria in mice and rats with, 833
Polistes venom immunization against wasp-sting allergy, 785
Pollikoff, Ralph, 794
Polynucleosinic acid, vascular permeability induced by, 12
Polynucleotides, biologic properties of, 12
Porter, Philip J., 641
Pressman, David, 950
Protein antigens, hypersensitivity to, 74
---, suppression of delayed hypersensitivity and antibody formation to, 966
---conjugates, immune response to, 177
---, soluble, in rat liver, 191
---, streptococcal M, fate of, after phagocytosis by macrophages, 898
Pseudoglobulin rheumatoid factors, 502
Pyelonephritis and immunologic status of the host, 337
Q fever antibodies, radioisotope precipitation test for study of, 959
Raffel, Sidney, 890
Rafyi, A., 805
Raggi, Livio G., 538
Rapp, Herbert J., 295, 510, 662
Respiratory mucosa, fractionation of, 752
---, serologic specificity of, 741
Reticuloendothelial system, lysosomes of, association with mouse anaphylaxis, 692
Rheumatoid factor, 502
---autoinhibition, 567
---, interaction with γ-globulin subunits, 927
Richter, Maxwell, 938
Rickettsia akari, identification and classification, 883
Rickettsia australis, identification and classification, 883
Rickettsia Australia, identification and classification, 883
Righettel, Wilton A., 395
Roberts, J. A., 622
Rofe, Ursula, 18
Rose, Noel R., 741, 752
Rus, Sudie B., 1
Russe, Henry P., 74
Russell, Warren J., 942
Ruthenberg, Janet M., 12
Sainte-Marie, Guy, 172
Samuelson, Joel S., 682
Saturno, A., 385
Scherp, Henry W., 358
Schiffman, Gerald, 197
Schlesinger, Michael, 358
Schmit, Nathalie J., 482
Schultz, Irwin, 833
Schulze, Mary Louise, 31
Sendai virus, antigens of, 658
Serum albumin, human and bovine, degradation, 667
---, antithymocyte, and hypersensitivity, 74
---, factor, heat-labile, associated with intracellular killing of Staphylococcus aureus, 852
---, human and animal, Q fever antibodies in, 959
---, βc-globulin of, 307
---, reactions with mammalian cell cultures, 401
---immunoglobulins, quantitative determination of, 84
---, mouse, use in identification and serologic classification of Rickettsia akari and Rickettsia australis, 883
---, normal, antiglobulins in, 184
---proteins, avian, immunologic unresponsiveness to, 705
Sherman, William B., 498
Shigella antigen, adoptive tolerance to, 352
---, establishment of unresponsiveness to, 205
---, interference with establishment of immunologic tolerance to, by specific antiserum, 921
Sialic acid receptors in adsorption of influenza, 842
Simmonvitch, L., 715
Sindbis and mumps viruses, concurrent infection, 521
Sinsheimer, Robert L., 18
Skin grafts, allogeneic, rejection of, 22
---homografts, enhancement of, by passive transfer, 253
---reactivity, induction of, and γ-globulin, 824
---sensitizing activity of mouse immunoglobulins, 410
Smith, C. E., 132
Smith, James W., 696
Smith, Kendall O., 976
Smith, Linda, 220
Sorem, Gail L., 674
Species identification, mixed hemadsorption test for, 530
Spleen cells, immune lysis of, 358
Stability, heat, and rabbit antibodies, 31
Staphylococcus aureus, intracellular killings of, 852
Steane, Edwin A., 272
Steinman, Harry G., 696
Stewart, P. Brian, 682
Stewart, Richard C., 842
Streptococci, groups A and C, cross-reactivity between, 282
Subarachnoid antigens, immunologic response to, 760
Sweet, Lawrence C., 105
Tabert, Gayle G., 959
Takahashi, T., 423
Talmage, David W., 150
Templeis, C. H., 705
Terres, Geronimo, 667, 674
Testicle, organ specific antigens of, 157
Tetanus, transfer of immunity to, by sensitized homologous lymph node cells, 234
Thiel, J. A., 289
Thorpe, Bert D., 578
Thymus, immune lysis of, 358
—of normal rat, plasmocytes in, 172
Thyroiditis, experimental, serologic and immunofluorescent studies on, 329
Till, J. E., 715
Tocopherol, sensitization to, 323
Tolerance, adoptive, to Shigella antigen, 352
—, immunologic, and chimerism, 150
—, —, interference with establishment of, 921
—, —, prevention of, 205
—to bovine serum albumin, induction to, by x-ray, 430
Trachoma strains, serologic differentiation of, 467
Transplants, cell, lymphoid, prevention of immunologic tolerance by, 205
Trautman, R., 868
Treadwell, Perry E., 692
Tuberculosis and macrophage lysozyme, 99
Tuberculostatic factor, antimycobacterial activity of, on intracellular bacilli, 220
Tuggac, Z. Maide, 157
Tumors, mouse, unspecific, antigenic similarities between, 461
—, transplantable, postoncolytic immunity to, 461
Tyan, Marvin L., 22
Typhus antibody, primary and secondary, serologic studies, 723, 734
—, —, 19S and 7S, 734
Uchitel, I. Ya., 492
Uhr, Jonathan W., 544
Unresponsiveness, immunologic, 966
Uryvayev, L. V., 658
Vaccine, avian infectious bronchitis, evaluation of immunity with, 638
—, poliomyelitis, one-dose potency test for, 475

CONTENTS

S. Shulman, E. Centeno, F. Milgrom and E. Witebsky: Immunological studies on adrenal glands. V. Chemical studies on the rabbit adrenal-specific autoantigen

O. Mäkelä and N. A. Mitchison: The role of cell number and source in adoptive immunity

O. Mäkelä and N. A. Mitchison: The effect of antigen dosage on the response of adoptively transferred cells

L. Kjellén: On the capacity of pepsin-digested antibody to neutralize adenovirus infectivity

Beatrice S. T. Chan: Quantitative changes in the basophil cells of guinea-pig bone marrow following the administration of Ascaris body fluid

D. A. Willoughby, M. N. I. Walters and W. G. Spector: Lymph node permeability factor in the dinitrochlorobenzene skin hypersensitivity reaction in guinea-pigs

L. Kjellén: Cell resistance induced by virus-antibody complexes

P. G. Klein and H. J. Wellensiek: Multiple nature of the third component of guinea-pig complement. I. Separation and characterization of three factors a, b and c, essential for haemolysis

H. J. Wellensiek and P. G. Klein: Multiple nature of the third component of guinea-pig complement. II. Separation and description of two additional factors β and d: preparation and characterization of four intermediate products

H. Rangel and D. Repka: The use of passive haemolysis in the quantitative estimation of anti-protein antibodies

The Subscription price in the United States and Canada is $40.00 for two volumes of six parts per year (Single copies $4.00 each)

Most economical screening test for RA factors

BACTO EOSIN LATEX TEST

Bacto-EOSIN LATEX TEST is the NEWEST and most ECONOMICAL slide latex fixation screening test for the Antigammaglobulin Factors associated with RHEUMATOID ARTHRITIS (RA). Basically positive latex fixation tests indicate hypermacroglobulinemia. Bacto-EOSIN LATEX TEST is easily completed in three minutes using finger tip blood or serum. The product is not dated and costs less than all other latex fixation tests for RA factors. Bacto-EOSIN LATEX TEST is proven in use to give comparable results to other screening tests. The test kit includes a Positive Control. A negative control serum is not necessary with this test.
