Detection of Two Antibodies in Single Plasma Cells by the Paired Fluorescence Technique. R. N. Hiramoto and M. Hamlin .......................................................... 214

Chromatographic Purification of Tetramethylrhodamine-Immune Globulin Conjugates and Their Use in the Cellular Localization of Rabbit γ-Globulin Polypeptide Chains. John J. Cebra and Gerald Goldstein .......................................................... 230

Frequency Distribution of α, γ, κ, and λ Polypeptide Chains in Human Lymphoid Tissues. George M. Bernier and John J. Cebra .......................... 246

The Stability of Messenger Ribonucleic Acid in Antibody Synthesis. Velta Lazda and Jason I. Stahl .......................................................... 254

Purification and Some Properties of Anti-Testosterone Antibodies. Paula E. Zimmerman, Sam M. Beiser and Bernard F. Erlanger .......................................................... 262

An Immunogenetic Study of the Rabbit Agglutinator Factor (Anti-Antibody). Carl Cohen and Robert G. Tissot .......................................................... 273

Digestion of Anti-Kidney Antibody: Effects on Its Nephrotoxicity and Ability to Fix Complement. Parker A. Small, Jr. and James H. Baxter .......................................................... 282

Association of Immunologic Determination with the Lymphocyte Fraction of the Peritoneal Fluid Cell Population. Ivan Jeanne Weiler and Eberhardt Weiler .......................................................... 288

Subtypes of Bence-Jones Proteins. Ralph L. Nachman, Ralph L. Engle, Jr. and Stefan Stein .......................................................... 293

Mercaptoethanol-Sensitive Antibody Production in Germ-Free Mice and Guinea Pigs. Stewart Sell .......................................................... 300

Role of the Liver and Appendix in the Serum Hemolysin Response in Rabbits. Lawrence R. Draper and Dieter H. Sussdorf .......................................................... 306

The Effectiveness of Acriflavine and Ineffectiveness of Proflavine as Immunosuppressant Agents. Joel S. Samuelson, P. Brian Stewart, Sumner C. Kraft and Richard S. Farr .......................................................... 314

Modification of Runt Disease by Treatment of the Donor with Lyophilized Tissues. Michael Schlesinger and Ruth Goitein .......................................................... 323

Immunochromical Study of Antigenic Specificity in Delayed Hypersensitivity. III. Suppression of Hapten-Specific Delayed Hypersensitivity by Conjugates of Varying Size. S. Leskowitz and V. E. Jones .......................................................... 331

Improved Measurement of Influenza Virus Hemagglutinin Titer. Gail Lorenz Miller .......................................................... 336

The Immunoglobulin Sequence. I. Arrest by 6-Mercaptopurine and Restitution by Antibody, Antigen or Splenectomy. Khurshed Sahar and Robert S. Schwartz .......................................................... 345

The Isolation and Characterization of a New Component of Hemolytic Complement, C'3e. Kozo Inoue and Robert A. Nelson, Jr. .......................................................... 355

Influence of Antigen Dosage on Kinetics of Hemagglutinating Antibody Production. J. F. Albright and T. W. Evans .......................................................... 368

Single Lymph Node Cells Producing Heteroclitic Bacteriophage Antibody. O. Makela .......................................................... 378

Surface Properties of the Egg and Mouse Lines of A1 Influenza Virus. L. Borecký, V. Lackovič and V. Rathová .......................................................... 387
