A NEW CONCEPT OF PATHOGENESIS, DIAGNOSIS AND THERAPY OF ALLERGY

and

A NEW CONCEPT OF AUTO-IMMUNE DISEASES

Allergy and Anaphylaxis as Metabolic Error

By Z. Z. Godowski, M.D., Ph.D., M.R.C.P. (Edin.)

VOLUME 1:

DUAL RESPONSE TO ANTIGENIC STIMULATION

Principles of Basic Science Applicable in Anaphylactic Hypersensitivity.

Immuno-metabolic Mechanism of Allergy and Anaphylaxis.
The Role of Eosinophils in Allergy and Anaphylaxis.

VOLUME 2:

ANABOLIC HORMONES IN IMMUNO-METABOLIC THERAPY

Physiopathology of Anabolic Hormones.

Hypothalamic Disease and its Relationship to Hypersensitivity.

Clinical Classification of Thyroid Diseases Based Upon Pathogenic Mechanism.

Anabolic Diseases: Aging, Auto-immunity Diseases versus Neoplasms.

Immuno-metabolic Evaluation of Allergic Patient.

Immuno-metabolic Management of Allergic Patient.

Six Cardinal Points of Immuno-metabolic Therapy.

IMMUNO-METABOLIC PRESS, INC.
55 East Washington Street, Suite 1413
Chicago, Illinois 60602, U.S.A.

Gentlemen:

Please send me the following volumes:

☐ Volume 1 ........................................... $17.00
☐ Volume 2 ........................................... 17.00
☐ Volumes 1 and 2 (special price) ....... 30.00

Please enclose check with order

Gillies & Dodds: BACTERIOLOGY ILLUSTRATED

Since bacteriology is essentially visual in its impact on the student, and since most textbooks are inadequate in this respect, Bacteriology Illustrated fills a very real need in medical education. This distinguished new atlas, devoted to the essentials of bacteriology, illustrates with photographs (many in color) the actual microscopic and cultural appearances. It has three main sections: 1) a general introduction to bacteriology which features an excellent bibliography; 2) a thorough description of the features essential for the isolation and classification of species; 3) a detailed explanation of the procedures used in diagnostic bacteriology. While the book is intended mainly to serve as a primer for medical students, it will also be of value to those in such disciplines as nursing and pharmacy.

By R. R. Gillies, M.D., D.P.H., M.C.Path., Senior Lecturer in Bacteriology, University of Edinburgh; and T. C. Dodds, F.I.M.L.T., F.I.B.T., F.R.P.S., Director of the Medical Photography Unit, University of Edinburgh.

1965 168 pp., 166 figs. (110 in color) $9.75

Lamanna & Mallette:

BASIC BACTERIOLOGY—
Its Biological and Chemical Background, 3rd ed.

For more than ten years Basic Bacteriology has been accepted as one of the most popular books in its field. Drs. Lamanna and Mallette, recognizing the progress made in bacteriology since their 1959 edition, have updated their text with many additions and revisions to reflect the great advances in knowledge and technique. Major emphasis is still on the principles of physics, chemistry and biology as applied to bacteriology. Numerical taxonomy, enzyme biosynthesis and nomenclature, metabolism of nitrogen compounds, photosynthesis, genetics, and permeability phenomena are areas in which important revisions have been made.

By Carl Lamanna, Ph.D., Scientific Advisor, Life Science Division, Office of Chief of Research and Development, Department of the Army; and M. Frank Mallette, Ph.D. Professor of Biochemistry, The Pennsylvania State University.

1965 Approx. 950 pp., 200 figs. $17.50
READY...SET TO GO!

THE NALGENE® FILTER UNIT*

When you open the sterile package, this complete membrane filter assembly is ready for immediate use. Everything you need is included — even the Metrical™ membrane filter. Just attach a vacuum source. When you're finished . . . throw the filter unit away. The next one is sitting on your shelf — just as sterile, just as ready. No more hours spent assembling, autoclaving, cooling. No risk of damaging membranes. The new Nalgene Filter Unit is packaged, sterile, ready to use and disposable. Available with 0.20 micron plain or 0.45 micron grid membranes. Only $9.00 per shelf pack of 12. For complete information, use the coupon.

THE JOURNAL OF IMMUNOLOGY

Information for Subscribers

Published monthly, beginning January, 1929. (From 1916-1925, and in 1928 Volumes I-X, inclusive, and Vol. XV published bi-monthly.)

The Subscription price is $28.00 per year in U.S.A.; $29.25 in Canada; $30.00 elsewhere. Single copies, when available, are $2.75 in U.S.A.; $3.00 elsewhere. The subscriptions of members of the American Association of Immunologists are included in the membership dues and are handled by the Association's Treasurer, Dr. Sheldon Dray, American Association of Immunologists, 9650 Wisconsin Avenue, Bethesda, Md. 20014. All other subscriptions should be sent to the publishers.

Change of address: Publisher must be notified 60 days in advance. Journals undeliverable because of incorrect address will be destroyed. Duplicates can be obtained (if available) from the publisher at the regular price of single issues.

New subscriptions and renewals are entered to begin with the first volume of the year when subscription is received. Should any issue of the current volume be out of print at the time the subscription order is received, the pro-rata value of such numbers will be refunded to the subscriber.

Subscriptions should be renewed promptly: To avoid a break in your series, subscriptions should be renewed promptly. The publishers cannot guarantee to supply back issues on belated renewals.

Correspondence concerning all business matters should be addressed to

ionagar

NO. 2

The finest agar available anywhere.

COLAB®

COLAB LABORATORIES, INC.
CHICAGO HEIGHTS, ILLINOIS, U. S. A.

DISTRIBUTED EXCLUSIVELY THROUGH

BAUSCH & LOMB

Bausch & Lomb has been selected by Marine Colloid, Inc. as exclusive distributor for SeaKem® Brand Agarose in the laboratory and clinical fields.

DATA

Strongly-gelling Agar extract (powder form)
Non-ionic, with minimal adsorption and electroendosmosis
High optical clarity
Sulfate content—less than 0.5%
Ash content—less than 1.5%
Moisture content—less than 15%
(Asay available on request.)
Supplied in standard units of 25, 100 and 250 grams. Larger quantities available on request. For information about the Bausch & Lomb Spectrophor I electrophoresis equipment, write for folder No. 34-2080. Bausch & Lomb, 22020 Bausch Street, Rochester, New York 14602.
Fluorescein Isothiocyanate (FIC) fluorescent antibody techniques have proven valuable in the diagnosis of various communicable diseases, polio, rabies and typhoid, the identification of antigens, microorganisms and as a research tool in probing the mechanisms of antibody formation and cytochemical studies on the distribution of homologous proteins in tissues and organs.

Previously, however, investigators using the fluorescent antibody technique have been annoyed with non-specific green fluorescence of certain tissue or with non-specific uptake of fluorescein conjugate.

Recently, a counterstaining procedure for use in conjunction with FIC has been reported by Hall and Hanson (1). This method utilizes aluminum chelates of dihydroxy azo dyes.

Now, NBCo offers the entire group of azo dyes in convenient kit form: (An assortment of 5 grams each of the listed counter stains for $6.25.)

Flazo Orange
Superchrome Blue B Extra
Diamond Red ECB—Extra Conc.
Diamond Black

Pontachrome Blue Black ZF
Pontachrome Violet SW
Acid Alizarin

Fluorescent Labeling
For the convenience of laboratories desiring a complete initial stock, NBCo offers an assortment of one each of the following biochemicals in 100 mg. ampuls at $12.50.

5 Dimethyl Amino-1 Naphthalene Sulfonl Chloride on Celite 10%
Fluorescein Isothiocyanate on Celite 10%
Rhodamine B Isothiocyanate on Celite 10%
Rosamine B 4' Isothiocyanate on Celite 10%
Fluorescein Amine (Fraction I or II)
Fluorescein Isothiocyanate
Rhodamine B Isothiocyanate
Rosamine B 4' Isothiocyanate
5 Dimethyl Amino-1-Naphthalene-1 Sulfonl CI (DNS)

Phone collect, 216-662-0212 (U.S.A. only.) NBCo guarantees shipment within 60 minutes of your call, one-day delivery anywhere in the continental U.S.A., 80 hours anywhere in the world. Send for our free catalog containing more than 3000 items.

(1) As reported in Chem. & Eng. News (Sept. 10, 1962). The literature references should not be interpreted as either an endorsement or disapproval of the biochemicals by the cited investigator.
