THE JOURNAL OF IMMUNOLOGY

Information for Contributors

Manuscripts should be carefully revised and the original and one carbon copy should be sent to

DR. JOHN Y. SUGG
Journal of Immunology
Cornell Medical College
1300 York Ave.
New York, N. Y. 10021

Authors will be charged $35.00 per page for all pages in excess of 6 per article.

Author's alterations of type or illustrations on proof are charged to the author if in excess of an average of $1.00 per printed page; correction of printer's errors are not charged to the author.

Reprints must be ordered in advance. A table showing cost of reprints, with an order slip is sent with proof. Orders for purchased reprints must be limited to 1,000 copies. The invoice or reprints will also include charges for illustrations, excess pages and tabular matter, if any.

Instructions for the Preparation of Manuscript

Copy should be typed double-spaced on one side only of 8½ x 11 paper. Even material that is to be set in a type size smaller than that of the main text (footnotes, references, etc.) should be double-spaced.

The author should supply a short title for use as a running head. This should be typed on a separate sheet as the first page of manuscript. Type the complete title of the article on a second sheet, and the authors' names and affiliations on a third sheet. All material that is to be set in a type size different from that of the main text should be typed on separate sheets. This includes tabular matter, case histories, quotations, formulas and other subsidiary matter in the text, footnotes, bibliographies, and legends for illustrations. Displayed formulas which are to be built up to more than one line of type, even if they are the same size type as the text, should be on a separate page. Legends should not be attached to or written on the illustration copy. Positions for tables and figures in the text may be indicated in the margin of the text page.

Manuscripts that do not conform to these instructions will be cut and rearranged so that the matter to be set in different sizes of type can be separated.

Galley proof. Authors will receive galley proofs of their papers set separately as outlined above. Galleys will be arranged in the following order: tables, running heads, footnotes, figure legends, text, bibliography. All material that has been cut from the body of the text will be inserted in its proper place in the galleys. This includes formulas, quotations, case histories, and other subsidiary matter. Manuscript will be arranged in this order: formulas, tables, footnotes, figure legends, text inserts including bibliography, text.

Illustrations. Copy for illustrations should be unmounted glossy photographs clearly identified as to number, author's name, and top of figure in soft crayon on the back. Graphs should be in India ink on bluelined paper. If larger than 9 x 12, they must be accompanied by glossy photographs within this size.
A publication comprising the papers presented at the Third Spore Conference, held at Allerton Park, Ill., 2–4 October 1964.

Table of Contents

Vladimir Vinter. Commencement of Synthetic Activities of Germinating Bacterial Spores and Changes in Vulnerability of Cells During Outgrowth.

Minoru Uehara and Hilmer A. Frank. Factors Affecting Alanine-Induced Germination of Clostridial Spores.

J. C. Lewis, N. S. Snell, and Gordon Alderton. Dormancy and Activation of Bacterial Spores.

L. Leon Campbell, Christina M. Richards, and Esther E. Sniff. Isolation of Strains of Bacillus steaerothermophilus with Altered Requirements for Spore Germination.

V. R. Shrivivasan. Intracellular Regulation of Sporulation of Bacteria.

Arturo Falaschi, James Spudich, and Arthur Kornberg. Deoxyribonucleic Acid Polymerase and Related Enzymes in Spores of Bacillus subtilis.

Roy H. Doi. Genetic Transcription of Bacillus subtilis.

John Spizizen. Analysis of Asporogenic Mutants in Bacillus subtilis by Genetic Transformation.

I. Takahashi. Mapping of Spore Markers on the Chromosome of Bacillus subtilis.

Ernst Freese and Michael Cashel. Initial Stages of Germination.

Jekiel Szulmajster and Richard S. Hanson. Physiological Control of Sporulation in Bacillus subtilis.

A. Keynan and Harlyn Halvorson. Transformation of a Dormant Spore into a Vegetative Cell.

Discussion. Hillel S. Levinson and Mildred T. Hyatt.

Harold J. Blumenthal. Changes in Carbohydrate Metabolism of Bacillus cereus Spores During the Return to Vegetative Growth.

L. Leon Campbell and H. Orin Halvorson, Editors
