Conversion of Nonimmune Spleen Cells to Antibody-forming Cells by RNA: Strain Specificity of the Response. EDWARD P. COHEN, RICHARD W. NEWCOMB AND LOUISE K. CROSBY............................................................ 583
Experimental Infection of Parainfluenza Virus Type 5 in Mice, Hamsters and Monkeys. P. W. CHIANG AND G. D. HSIUH.......................................................... 591
Immunologic Reactivity in Neonatally Thyroidectomized Rats Receiving Competent Lymphoid Cells during Immunization. KATARINA ISAKOVIC, BYRON H. WAKSMAN AND CHRISTINE WENNERSTEN.................................................. 602
Reactivity of Rheumatoid Factor with Rabbit γ-Globulin. FREDERIC C. MCDUFFIE, TATSURO OIKAWA AND ICHIRO NISHI.............................................. 614
Effect of Hypothermia on Systemic Anaphylaxis: Limitations of Cold Protection. KURT J. BLOCH, JOSEPH M. LANE AND K. FRANK AUSTEN....................... 621
An Albumin and γ-Globulin Characteristic of Bovine Cerebrospinal Fluid. CATHERINE F. C. MACPHERSON AND MURRAY SAFFRAN........................................ 629
Studies on Herpes Simplex. XI. The Antiviral Dynamics of 5-Iodo-2-deoxyuridine in Vivo. ERNEST JAWETZ, RICHARD SCHULZ, VIRGINIA COLEMAN AND MASAO OKUMOTO.......................................................... 635
The Soluble Protective Antigen and the Histamine-sensitizing Factor of Bordetella pertussis. ROBERT E. PIERONI, EDWARD J. BRODERICK AND LEO LEVINE......... 643
Passive Uveal Anaphylaxis in Guinea Pigs. MARIO LANZIERI.......................................................... 651
Specific Suppression of Tumor Growth by Isolated Peritoneal Macrophages from Immunized Mice. BOYCE BENNETT.......................................................... 656
Antigens in Immunity. X. Induction of Immunologic Tolerance to Salmonella adelaide Flagellin. G. J. V. Nossal, G. L. ADA AND CAROLINE M. AUSTIN........ 665
 Destruction of Splenic Transplantation Antigens by a Factor Present in Liver. MARK A. MANDEL, ANTHONY P. MONACO AND PAUL S. RUSSELL.............................. 673
Characteristics of Herpes Zoster and Varicella Viruses Propagated in Vitro. ELI GOLD.......................................................... 683
Complement Fixation Studies with a Varicella-Zoster Antigen. ELI GOLD AND GERALDINE GODEK.......................................................... 692
Inhibition of Interferon Action by Puromycin. ROBERT M. FRIEDMAN AND JOSEPH A. SONNABEND.......................................................... 704
Comparative Immune Diffusion at Gelatin-Agar Interfaces: A Presumptive Test for Protein and Acidic Polysaccharide Antigens. W. F. DUDMAN...................... 718
Inhibition of Antibody Production and Acquired Immunologic Tolerance by Actinomycin. HENRY N. CLAMAN AND EDWIN A. BRONSKY.......................................................... 722
The Aggregation of γ-Myeloma Proteins. JANE H. MORSE.......................................................... 730
Adsorption of Attenuated and Neurovirulent Poliovirus Strains to Central Nervous System Tissues of Primates. DONALD H. HARER AND PERNELL W. CHOPPIN........ 737
Some Observations on the Behavior of Vaccinia Virus Particles with Antiserum, Particularly Their Agglutination. G. J. GALASSO AND D. G. SHARP............ 746
Enhancement of the Replication of Measles Virus by Mitomycin C. Fred Rapp and Darlena Vander Sielce .......................... 753
Studies on Immunity in Experimental Leptospirosis: The Immunogenicity of Leptospira icterohaemorrhagiae Attenuated by γ-Irradiation. William T. Hubbert and James N. Miller ........................................... 750
Relationship between Affinity of Anti-dinitrophenyl Antibodies and Their Biologic Activities. Jean Hurlimann and Zoltan Ovary ................................. 765
