Enhancement of the Replication of Measles Virus by Mitomycin C. FRED RAPP AND DARLENA VANDERSLICE. 753
Studies on Immunity in Experimental Leptospirosis: The Immunogenicity of Leptospira icterohaemorrhagiae Attenuated by γ-Irradiation. WILLIAM T. HUBBERT AND JAMES N. MILLER. 759
Relationship between Affinity of Anti-dinitrophenyl Antibodies and Their Biologic Activities. JEAN HURLIMANN AND ZOLTAN OVARY. 765

N.I.L.—HOCH
First Universal High-Precision Dialyzer
DIALYSTAT®
BULLETIN 4-5000 FOR COMPLETE DESCRIPTION
For the recovery of dialyzable salts, the removal or recovery of acids, and the separation of colloidal material from other solutes.
- ROUTINE DIALYSIS • ANALYTICAL STUDIES • THIN-LAYER DIALYSIS • PRESSURE DIALYSIS
- CRYDIALYSIS • CONTINUOUS FLOW DIALYSIS • PREPARATIVE DIALYSIS • MICRO-DIALYSIS

The N.I.L.-Saravis High-Pressure Cell for Concentration Dialysis
BULLETIN 4-5200

FEATURES
- Output 30-40 ml per hour for 5% serum albumin at 35 psi.
- Uses standard dialysis grade Visking casing.
- 5% serum albumin retained completely at pressures up to 150 psi. No distortion of pores in Visking casing.
- Main dialysis element is porous stainless steel cylinder. Completely safe operation up to 200 psi.
- Cell assembly made of delrin, silicone rubber, and stainless steel.
- Cell volume 140 ml.
- Cell includes air-bleed valve.

National Instrument Laboratories
