CONTENTS

NUMBER 1, JANUARY 1966

Mechanisms of γ-Globulin Synthesis. Saroj Tawde, Matthew D. Scharff and Jonathan W. Uhr ........................................ 1
Esterase, Peptidase, and the Enhancement of Guinea Pig Complement. Kenneth Amiraian and James D. Purcell .......................... 8
Role of Interferon during Viremia. I. Production of Circulating Interferon. Samuel Baron, Charles E. Buckler, Richard V. McCloskey and Ruth L. Kirschstein .......................................................... 12
Role of Interferon during Viremia. II. Protective Action of Circulating Interferon. Samuel Baron, Charles E. Buckler, Robert M. Friedman and Richard V. McCloskey ........................................ 17
Alteration of the Specificity of Lectin by Chemical Modification. II. Shoji Matsubara and William C. Boyd .............................. 25
The Allergic Response to Stinging Insects: Biochemical and Immunologic Studies on Bee Venom and Other Bee Body Preparations. Sidney Shulman, Fred Bigelsen, Raymond Lang and Carl Arbesman .................................................. 29
Pathogenesis of Venezuelan Equine Encephalomyelitis Virus. II. Infection in Young Adult Mice. William D. Kundin ..................... 49
Preparations of Saliva Inhibiting Reovirus Hemagglutination. A. Martin Lerner, Elizabeth Jane Bailey and Marvin Kofender .......................................................... 59
Specific Proteins in Serum of Total-Body Irradiated Humans. A. J. Luzzio, B. I. Friedman, J. G. Kereiakes and E. L. Saenger .......................................................... 64
Clearance of Salmonella typhimurium in Mice and Immunity to Mouse Typhoid: A Comparison of the Activities of Hyperimmune Rabbit γ-Globulin and Porter's Fragment I Obtained by Papain Hydrolysis. J. W. Shands, Jr., H. Stalder and E. Suter ................................. 68
Viruria in Herpes Simplex Infection of Mice. Irwin Schultz and Franklin A. Neva .......................................................... 74
Studies on the Mechanism of the Cytolytic Effect of Sensitized Lymphocytes. Werner Rosenau and Henry D. Moon ...................... 80
Strain ES4 Avian Leukosis Virus: Titration and Immunologic Characterization. Linda Lucans, Dorothy Beard, A. J. Langlois and J. W. Beard .......................................................... 85
The Stability of Neutralization of Poliovirus by Native Antibody and Enzymatically Derived Fragments. Robert Keller .................. 96
Structural Characteristics of Red Cell Autoantibodies. M. Elaine Eyster, Ralph L. Nachman, William N. Christenson and Ralph L. Engle, Jr .......................................................... 107
Arthus Type Inflammation with Rabbit γM Antibody. Tomio Tada and Kimishige Ishizaka .......................................................... 112
Further Studies on the Mechanism of Antibody-Complement Induced Hemolysis: Specificity of Complement. J. G. Scott, R. I. Weed and S. N. Swisher .......................................................... 119
Immunizing and Toxic Properties of Particulate Antigens from Two Immunogenic Type of Pasteurella multocida of Avian Origin. Kenneth L. Heddeleston, Paul A. Rebers and Alfred E. Ritchie .......................................................... 124
Adjuvant Properties of Bacterial Cell Wall Mucoproteins. Juanita Bird Holton and John H. Schwab ........................................................................................................ 134
Heterogeneity of Antibody Producing Cells and Antibody as a Result of Environmental Alterations in Tissue Culture. Roy Patterson, Irena M. Suzsko and Mary F. Orr .......................................................... 139
Influence of Corticosteroid Therapy on Serum Complement, Agglutinins, Free-Boundary Electrophoresis, Total Protein and Blood Counts in Dogs with Staphylococcal Bacteremia. Aldona L. Balth, Mark H. Leper and Valentina T. Lolans .................................................................. 149
A Comparison of Some Commonly Used Methods for Detecting Antibodies to Bovine Albumin in Human Serum. Percy Minden, Robert T. Reid and Richard S. Farr .................................................................. 180
The Immunologic Competence of Mouse Thymus Cells Measured by the Graft vs. Host Spleen Assay. Henry Sosin, Henry Hilgard and Carlos Martinez

Evaluation of the Demonstration of Complement-Requirements of Neutralizing Antibody as a Means for Early Diagnosis of Herpes Virus Infections. Kamesaburo Yoshino and Sadako Taniguchi

The Relation between Isolated Human Amyloid Fibrils and Human γ-Globulin and Its Subunits. Edgar S. Cathecart and Alan S. Cohen

Studies on Antigenic Composition of Amyloid. F. Milgrom, R. Kasukawa and E. Calkins

Immunofluorescent Studies on Rubella-Infected Tissue Cultures and Human Tissues. Wilna A. Woods, Richard T. Johnson, Daniel D. Hostetler, Martha L. Lepow and Frederick C. Robbins

Human Cytomegalovirus: Properties of the Complement-Fixing Antigen. Matilda Benyesh-Melnick, Vladimir Vonka, Fern Probstmeyer and Ira Wimberly

The Immune Response to Circulating Autologous Hemagglutinins. A. U. Sargent, J. Myers and M. Richter

Adoptive Tolerance Transferred by Bone Marrow, Spleen, Lymph Node or Thymus Cells. Bertie F. Argyris

Vaccination against Human Leprosy Bacillus Infections of Mice: Protein by BCG Given during the Incubation Period. Charles C. Shepard

Difference in Mechanism of Viral Neutralization under In Vitro and In Vivo Conditions. Natalie E. Cremer, Edwin H. Lennette, Shirley J. Hagens and Frances Y. Fujimoto

Absence of Agglutinin Formation in Spleen Cell Cultures from Immunologically Tolerant Mice. Herman Friedman

The Effect of the Scorbatic State on Tuberculin Hypersensitivty in the Guinea Pig. I. Passive Transfer of Tuberculin Hypersensitivty. Burton Zweiman, William F. Schoenwetter and Eugene A. Hildreth

Agglutinins for Human Erythrocytes in Mollusks. William C. Boyd, Rebecca Brown and Lyle G. Boyd

Heterogeneity of Immune Anti-A Antibody in Relation to Forssman Antigen. Mitsuo Yokoyama and H. H. Fudenberg

Hemaggglutination-inhibiting Antibody Responses in Human Infections with Group B Coxsackieviruses. Nathalie J. Schmidt, Edwin H. Lennette and Juanita Dennis

The Induction of a Hyporesponsive State to Hemocyanin. William O. Weigle

Weight Estimates of Rabbit Anti-Human Albumin Based on Antigen-Binding Capacity. James J. Mulligan, Jr., Abraham G. Osler and Eugene Rodriguez

Weight Estimates of Rabbit Anti-Human Serum Albumin Based on Antigen-Binding and Precipitin Analyses: Specific Hemagglutinating Activities of 7 S and 19 S Components. Abraham G. Osler, James J. Mulligan, Jr. and Eugene Rodriguez

Delayed Skin Reactivity to Carbohydrate and Protein Fractions of Mycobacterium bovis (BCG) Culture Filtrate in the Absence and Presence of Serum Antibody. H. Baer and S. D. Chaparas

A Hemaggglutination Test and a Specific Depolymerase for Studying Immunologic Paralysis in Mice. Marcus S. Brooke

Studies on the Induction, Specificity, Prevention and Breaking of Immunologic Paralysis and Immunity to Pneumococcal Polysaccharide. Marcus S. Brooke

Contents

Equine Anti-Hapten Antibody. III. The Comparative Properties of \( \gamma G \) and \( \gamma A \)-Antibodies.
Norman R. Klinman, John H. Rockey, Gretchen Frauenberger and Fred Karush ........... 587

Influenza Virus Subunit Vaccines: Immunogenicity and Lack of Toxicity for Rabbits of Ether-
and Detergent-Disrupted Virus. R. G. Webster and W. G. Laver .......................... 596

The Production of Congenital Malformations Using Tissue Antisera. V. Fluorescent Localization
of Teratogenic Antisera in the Maternal and Fetal Tissue of the Rat. Victor Slotnick and
Robert L. Brent ................................................................. 606

Immunogenicity of Insolubilized Bovine Serum Albumin. Arthur A. Hirata and Dieter H. Suss-
dorf ...................................................................................... 611

The Effect of Hydrostatic Pressure on the Rate of Inactivation of Cypridina Luciferase by Specific
Antibody. Frederick I. Tsuji, David L. Davis and David H. Donald ...................... 614

Heterogeneity in the Complementation of Polypeptide Subunits of a Purified Antibody Isolated
from an Individual Rabbit. Richard Hong and Alfred Nisonoff ............................ 622

Enterovirus Hemagglutination: Inhibition by Aldoses and a Possible Mechanism. A. Martin
Lerner, Lawrence D. Gelb, James R. Tillotson, Mary M. Carruthers and Elizabeth J. Bailey.. 629

Some Characteristics of Human Immunoglobulin. John Bienenstein and Kurt J. Bloch ................................. 637

Serologic Features of Mycoplasmal Arthritis in Swine. Kimmo Aho, William P. Switzer, Robert
W. Lightfoot, Jr. and Charles L. Christian ................................................ 646

Antigenic Determinants of Human \( \beta_2 \) and \( \beta_3 \) Globulins. Clark D. West, Neil C. Davis, Judith
Forristal, John Herbst and Roger Spitzer ...................................................................... 650

Pathogenesis of Influenza in Ferrets. I. Tissue and Blood Manifestations of Disease. Richard
F. Haff, Paul W. Schriver, Claire G. Engle and Richard C. Stewart ................................. 659

The Epidemiology of a Herpes Virus Infection of New World Monkeys. A. W. Holmes, James A.
Devine, Edward Nowakowski and Friedrich Deinhardt ........................................... 668

The Effect of the Scorbutive State on Tuberculin Hypersensitivity in the Guinea Pig. II. In Vitro
Mitotic Response of Lymphocytes. Burton Zweiman, Richard W. Besdine and Eugene A.
Hildreth .................................................................................. 672

Use of Sarcoma 180/TG to Prepare Hyperimmune Ascitic Fluid in the Mouse. Alan C. Sartorelli,
David S. Fischer and Wilbur G. Downs ................................................... 676

Catabolism of \( \gamma G \)-Globulin with Reduced Interehain Disulfide Bonds in Rabbits. George L.
Cohen and Mart Mannik .................................................................. 683

Studies on Japanese B Encephalitis Virus Vaccines from Tissue Culture. VI. Development of a
Hamster Kidney Tissue Culture Inactivated Vaccine for Man. (1) Obtaining Maximum Titers
of Virus Using an Attenuated Strain of OCT-541. Medhat A. Darwish and William McD.
Hammon .................................................................................. 691

Immunologic Response to the Nitro-Olefin. Alan S. Josephson .................................. 699

Benzylpenicilloyl Specific Serum Antibodies to Penicillin in Man. I. Development of a Sensitive
Hemagglutination Assay Method and Hapten Specificities of Antibodies. Bernard B.
Levine, Michael J. Fellner and Vera Levytska .................................................. 707

Benzylpenicilloyl-Specific Serum Antibodies to Penicillin in Man. II. Sensitivity of the Hemag-
glutination Assay Method, Molecular Classes of the Antibodies Detected, and Antibody
Titers of Randomly Selected Patients. Bernard B. Levine, Michael J. Fellner, Vera Levytska,
Edward C. Franklin and Norman Alisberg ..................................................... 719

Immunologic Studies of Anthrax. IV. Evaluation of the Immunogenicity of Three Components of
Anthrax Toxin. B. G. Mahlandt, F. Klein, R. E. Lincoln, B. W. Haines, W. I. Jones, Jr., and
R. H. Friedman .................................................................................. 727

Mitosis in Mouse Peritoneal Macrophages. Ian J. Forbes ........................................... 734

7S-1 and 7S-2 Antibody Response in the Mouse. I. Influence of Strain, Antigen and Adjuvant.
John E. Coe .............................................................................. 744

Number 5, May 1966

Comparisons of Antibodies Reacting with DNA. I. Systemic Lupus Erythematosus Sera and
Rabbit Antibodies Induced by DNA-Methylated Bovine Serum Albumin Complexes. B.
David Stollar and Ann L. Sandberg ..................................................... 755

Comparisons of Antibodies Reacting with DNA. II. Rabbit Antibodies Induced by Nucleoside-
Protein Conjugates. Ann L. Sandberg and B. David Stollar ................................. 764

Hydroxylamine as an Inactivating Agent for Foot-and-Mouth Disease Virus. O. N. Fellowes.. 772
Immunofluorescent Detection of Antibody to Lymphocytic Choriomeningitis Virus in Man. Sophia M. Cohen, Irene A. Triandaphilli, James L. Barlow and John Hotehin .............. 777
Serum Protein Alterations Induced by Listeria monocytogenes Infections. C. P. Sward ........ 790
Immunochromic Studies on Dextrans. IV. Further Characterization of the Determinant Groups on Various Dextran Involved in Their Reactions with the Homologous Human Antidextran. Mitsuo Torii, Elvin A. Kabat and H. Weigel ....................................... 797
Alteration of the Specificity of Lectin by Chemical Modification. III. Phenylazobenzylation of Lima Bean and Sophora japonica Lectins. Shoji Matsubara and William C. Boyd .......... 829
Immuneologic Tolerance Induced by a Combination of Chloramphenicol and 6-Mercaptopurine. A. Cruchaud .................................................. 832
Atypical Antigenic Properties of a γA Myeloma Protein. C. K. Osterland and H. Chaplin, Jr. ... 842
The Adjuvant Action of Endotoxin in Thymectomized Mice. Priscilla A. Campbell, David T. Rowlands, Jr., Michael J. Harrington and Phyllis D. Kind ................. 849
The Specificity of pH and Ionic Strength Effects on the Kinetics of the Rh (D)-Anti-Rh (D) System. Arthur E. Barnes ................................................................ 854
Production of Antibody against Bradykinin: Demonstration of Specificity by Complement Fixa-tion and Radio-Immunossay. Jocelyn Spragg, K. Frank Austen and Edgar Haber ........... 865
Effect of Interferon Treatment on Interferon Production. Robert M. Friedman ............... 872
Serologic Relationships between β-Lysins of Different Species. Audria Matheson, Robert S. Jensen and David M. Donaldson .......................................................... 885
Agar Gel Diffusion Method for the Study of Antigenic Components of Mumps Virus. Raul R. Cuadrado ................................................................. 892
A Specific Anti-B Lectin for Routine Diagnostic Purposes. Aparna Chatteraj and William C. Boyd ................................................................. 898
Enhanced Immunologic Sensitization of Mice by the Simultaneous Injection of Antigen and Specific Antiserum. II. Effect of Varying the Antibody-Antigen Ratio and the Amount of Immune Complex Injected. Sherie Leaver Morrison and Geronimo Terres ................. 901
Studies on Synthetic Polypeptide Antigens. XV. The Immunochemical Properties of Ferrocenyl-poly Glu*Lys*Tyr* (No. 2) Conjugates. T. J. Gill, III and L. T. Mann, Jr. ....... 906
Forssman Antigen and Antibody: Preparation of Water Soluble Antigen and Measurement of Antibody Concentration by Precipitin Analysis by C’1a Fixation and by Hemolytic Activity. Herbert J. Rapp and Tibor Borsos .......................... 913
The Formation in Vitro of Cold Auto-Hemagglutinins with Anti-I Specificity. R. van Furth and Martina Dieselloff-den Duik ............... 920
γ-Globulin and Antibody Formation in Vitro. V. The Secondary Response Made by Splenic White
