Print ISSN: 0022-1767 Online ISSN: 1550-6606.
## CONTENTS

**Number 1, January 1967**

- Physical Structure of a Native Protoplasmic Polysaccharide from *Escherichia coli*. J. A. Rudbach, R. L. Anacker, W. T. Haskins, K. C. Milner and E. Ribi ................................................... 1
- Distribution of the Human Rho(D) Antigen in the Red Cells of Non-Human Primates. S. P. Masiouredis, Mary Edith Dupuy and Margaret Elliot ................................................... 8
- Studies on Human Peripheral Blood Lymphocytes *In Vitro*: III. Fine Structural Features of Lymphocyte Transformation by Pokeweed Mitogen. Steven D. Douglas, Peter F. Hoffman, Jan Borjeson and Lawrence N. Chessen ................................................... 17
- Immunologic Relationship between Blood Group Substances and a Fucose-Containing Glycolipid of Human Adenocarcinoma. Sen-Itiroh Hakomori, Jerzy Kocieciak, Kurt J. Bloch and Roger W. Jeanloz ................................................... 31
- Demonstration of Tissue-Specific Soluble Antigens in Human Skin by Immunodiffusion. Toshiyuki Aoki and Tokuji Fujinami ................................................... 39
- The Pathogenesis of Theiler's GD VII Encephalomyelitis Virus Infection in Mice as Studied by Immunofluorescent Technique and Infectivity Titrations. Chien Liu, Julius Collins and Eleanor Sharp ................................................... 46
- The *in Vitro* Absorption of Anti-Brain Radioantibodies with Brain Sediments: Some Unusual Properties and a Quantitative Method. Eugene D. Day and Sylvester Lassiter ................................................... 56
- Reversal of Post-Thymectomy Wasting Disease in Mice by Multiple Thymus Grafts. Osias Stutman, Edmond J. Yunes, Carlos Martinez and Robert A. Good ................................................... 79
- Quantitative Hemadsorption, a New Assay Technique. II. Assay of Neutralizing Antibodies to Hemadsorbing Viruses. N. B. Finter ................................................... 88
- Bacteriophage Neutralizing Activity of Fragments Derived from Rabbit Immunoglobulin by Papain Digestion. G. W. Stemke and E. S. Lennox ................................................... 94
- Agglutination of Particulate Antigens in Agar Gel. Felix Milgrom and Ulana Loza ................................................... 102
- Runt Diseases Induced by Non-Living Bacterial Antigens. Richard D. Ekstedt and Lawrence L. Hayes ................................................... 110
- Complement Associated Peptidase Activity of Guinea Pig Serum. I. Role of Complement Components. Neil R. Cooper and Elmer L. Becker ................................................... 119
- Complement Associated Peptidase Activity of Guinea Pig Serum. II. Role of a Low Molecular Weight Enhancing Factor. Neil R. Cooper ................................................... 132
- Rabbit γA- and γM-Immunoglobulins with Allotypic Specificities Controlled by the λ Locus. Edward A. Lichter ................................................... 139
- Competition between, and Effectiveness of, IgG and IgM Antibodies in Indirect Fluorescent Antibody and Other Tests. Irwin Cohen, Leslie C. Norins and Alfredo J. Julian ................................................... 143
- Some Observations on the ABO Antigen Sites of the Erythrocyte Membranes of Adults and Newborn Infants. Sol Haberman, Pat Blanton and James Martin ................................................... 150
- Streptococcal Related Glomerulonephritis. II. Glomerulonephritis in Rhesus Monkeys Immunologically Induced Both Actively and Passively with a Soluble Fraction from Human Glomeruli. A. S. Markowitz, Raymond Clasen, Bernard D. Nidus and Herman Aines ................................................... 161
- Studies on Immunologic Unresponsiveness during Secondary Disease. II. The Effect of Added Donor and Host Immunologically Competent Cells. John S. Thompson, Eric L. Simmons, Richard H. Moy and Margaret K. Crawford ................................................... 179
Gross and Microscopic Skin Reactions to Killed Typhus Rickettsiae in Human Beings. Charles L. Wisseman, Jr., Yehia el Batawi, William H. Wood, Jr. and Antonio R. Noriega .......... 194

Notices ....................................................................................... 210

NUMBER 2, FEBRUARY 1967

Immunochemical Studies on Delayed and Arthus-Type Hypersensitivity Reactions. I. The Relationship between Antigenic Determinant Size and Antibody Combining Site Size. Stuart F. Schlossman and Herbert Levine. .......................... 211

Candida Precipitins. William H. Chew and Thomas L. Theus. .......................... 220

Studies on the Radiosensitive Phase of the Primary Antibody Response in Rabbits. I. The Role of the Macrophage. James F. Pribnow and Myron S. Silverman. .......................... 225

An Antigen Common to Mouse Cells and Salmonella typhimurium. William Boyle. .......................................................... 256

Application of the Paired Label Radioantibody Technique to Tissue Sections and Cell Smears. Nobuyuki Tanigaki, Yasuo Yagi and David Pressman. .......................... 274

Antibodies against Human Leukemia Cell Lines. Nobuyuki Tanigaki, Yasuo Yagi, George E. Moore and David Pressman. .......................... 281

Interaction of Penicillin and Erythrocytes. Alan S. Josephson and Allan P. Kaplan. .......................... 293

Papain Fragmentation of the Subunits of Human Macroglobulin. Kaoru Onoue, Tadamitsu Kishimoto and Yuichi Yamamura. .......................... 303

Differentiation of Arboviruses by Immunelectrophoresis. Raul R. Caudrado and Jordi Casals. .......................... 314

The Effect of Estrogenic Hormones on Immune Responses in Normal and Irradiated Mice. John S. Thompson, Margaret K. Crawford, Richard W. Reilly and Charles D. Severson. .......................... 331

Detection of Immune Response against Synthetic Polymers of Amino Acids Employing the Plaque-Forming Cell System. I. Reaction with Sheep Erythrocytes Coated with Polymer. Patricia Walsh, Paul Maurer and Marianne Egan. .......................... 344

Thermostable Brain-Specific Autoantigen. Felix Milgrom, Z. Maide Tuggae, Walter Campbell and Erneet Witebsky. .......................... 359

Antibody Response of Rhesus Monkeys to a Density Gradient Purified Murine Leukemia Virus (Rauscher). Louis R. Sibel, Mary Alexander Fink, Carol L. McCune and Carolyn A. Cowles. .......................... 368

Physicochemical and Immunologic Properties of Eluates Containing I-125 Anti-Rh0(D). Susie W. Fong and S. P. Masouredis. .......................... 374

Similarities between Rabbit Antibodies Produced following Ingestion of Bovine Serum Albumin and following Parenteral Immunization. Richard M. Rothenberg, Sumner C. Kraft and Richard S. Farr. .......................... 386

Studies Concerning the Importance of Mononuclear Cells in the Development of Experimental Hepatitis. F. Scheiffarth, H. Warnatz and K. Mayer. .......................... 396

A Mechanism of Bacterial Interference in Vitro. John C. Ribble .............................................................. 716
Neutralizing and Hemagglutination-Inhibiting Activity of Nasal Secretions following Experimental Human Infection with A2 Influenza Virus. Robert H. Alford, Roger D. Rossen, William T. Butler and Julius A. Kasel .................................................................................................................. 724
Formation and Isolation of Rabbit Antibodies to a Synthetic Antigen of Low Molecular Weight. Felix Borek, Yehudit Stupp and Michael Sela .................................................................................................................. 739
Immunoglobulins of the Rhesus Monkey (Macaca mulatta). I. Antiserum to Bovine Serum Albumin and the Dinitrophenyl Antigenic Determinant. James D. Lakin, Roy Patterson and Jacob J. Pruzansky .................................................................................................................. 745
Quantitative Hemagglutination Studies on Several Anti-A Lectins. Aparna Chattoraj .............................................................. 757
The Association of Increased Spontaneous Lymphocyte Transformation in Vitro with Clinical Manifestations of Drug Hypersensitivity. Fred A. Gill .................................................................................................................. 778
Studies on Rabbit Lymphocytes in Vitro. VII. The Induction of Blast Transformation with the F(ab')2 and Fab Fragments of Sheep Antibody to Rabbit IgG. Stewart Sell.......................... 786
The Use of the Preparative Ultracentrifuge to Detect Primary Interactions between 111Labeled Antigen and Antibody. Richard M. Rothenberg and Richard S. Farr.......................... 792
Antigenic Analysis of Human Cells and Tissues: Differential Susceptibility of Antigens to Physical or Chemical Treatment. Shihau-Yen Chiu, Patricia J. Baker and K. Gerhard Brand.................. 806
Duck Immunoglobulins. I. Structural Studies on a 5.7S and 7.8S γ-Globulin. Howard M. Grey.................. 811
Duck Immunoglobulins. II. Biologic and Immunoochemical Studies. Howard M. Grey.................. 820
The X-Y-Z Scheme of Immunoocyte Maturation. II. The Effect of Antigen on Spontaneous Escape from Immune Paralysis. Stanley J. Dowden and Eli E. Sercarz.................. 827
The X-Y-Z Scheme of Immunoocyte Maturation. III. Early IgM Memory and the Nature of the Memory Cell. Eli E. Sercarz and Vera S. Byers .................................................. 836
Uptake by Mononuclear Phagocytes of Protein-Coated Bentonite Particles Stabilized with a Carbodiimide. Robert R. Carpenter and Petronilo B. Barsales.................. 844
An Alteration of Secreted Immunoglobulin in Serum. Eckehart Kölsch.................. 854
Changes in Subcellular and Circulating Antibody Levels during the Hemolysin Response in Rabbits. Susan E. Chapman and Dieter H. Sussdorf.................. 860
Subgroups of L Type Bence-Jones Proteins. A. Ruffilli and C. Baglioni.................. 874
Histocompatibility and Tumor Virus Antigens Identified on Cells Grown in Tissue Culture by Means of the Mixed Hemadsorption Reaction. Rolf F. Barth, J. Åke Espmark and Astrid Fagraeus.................. 888
Hypersensitivity to Ascaris Antigens. I. Skin-Sensitizing Activity of Serum Fractions from Guinea Pigs Sensitized to Crude Extracts. Gill Strejban and Dan H. Campbell.................. 893
Protein Conjugates of Polysaccharide from Cryptococcus neoformans. Mayer B. Goren and Gardner M. Middlebrook.................. 901
A Serologic Study of Herpesvirus Hominis Strains by Microneutralization Tests. Frank P. Pauls and Walter R. Dowdle.................. 941
Further Studies on Effect of Endotoxin on Antibody Response of Rabbit to Common Antigen of Enterobacteriaceae. H. Y. Whang and E. Neter.................. 948
Precipitation and Neutralization of Bacteriophage f2 by Rabbit Antibodies. David T. Rowlands, Jr.......................... 958
Antibody Content of Single Antibody-Forming Cells. Kengo Horibata and Jonathan W. Uhr.................. 972
The Presence of Antibody to Chikungunya and Other Serologically Related Viruses in the Sera of Sub-Human Primate Imports to the United States. V. R. Harrison, J. D. Marshall and N. B. Guilloud.................. 979
Immune Hemolysis: An Inter-Species Study. William D. Linescott.................. 991
Preparative Purification of Lung-Localizing Rabbit Anti-Rat Lung Antibodies in Vitro. Osamu Tsuzuku, Yasuo Yagi and David Pressman ............................................... 1004
Suppression of the Tuberculin Reaction by High Concentrations of Tuberculin and the Relationship of this Phenomenon to the Potency Assay of Tuberculin. Harold Baer and Robert W. Kolb ................................................................. 1015
The Immune Response to Human γG-Immunoglobulin in Rabbits Unresponsive to Fc Fragment and H Chain Protein. Hans L. Spiegelberg and William O. Weigle ............................................................... 1020
Changes in the Concentrations of the γc-Globulin and the γG-Globulin of Bovine Cerebrospinal Fluid with Maturation. Catherine F. C. Macpherson .................................................. 1039
Immunity to the 6C3HED Ascites Tumor following Treatment of Tumor-Bearing Mice with Escherichia coli L-Asparaginase. Morton D. Prager, Joseph Roberts and Nicholas Bachynsky ............................................................. 1045
Isolation of Rat Lung Antigens Capable of Neutralizing Localizing Activity of Anti-Lung Antibodies. Osamu Tsuzuku, Yasuo Yagi and David Pressman ............................................................... 1053
Antibody Responses of Rhesus (Macaca mulatta) Monkeys Experimentally Infected with Cosackieviruses of Group B and Group A, Type 9. II. Heterotypic Antibody Responses to Echo-viruses, Polioviruses and Reovirus Type 1. Nathalie J. Schmidt, Juanita Dennis and Edwin H. Lennette ................................................................. 1060
Immunochromeproperties of Fe Fragment of Rabbit γG-Globulin. Kenneth Amirsian, Lillian Duchna and James Purcell ............................................................. 1067
Antibody and Gland Studies in Cortisone and ACTH-Injected Birds. Bruce Glick ................................................................. 1076
Response and Specificity of Anti-Shigella Rabbit Antibody. T. Tsuchiya, Y. Fukazawa, T. Shinoda and T. Okoshi ................................................................. 1085

Number 6, June 1967

The Behavior of Autologous Thyroglobulin in the Circulation of Rabbits Immunized with Either Heterologous or Altered Homologous Thyroglobulin. William O. Weigle and Gloria J. High... 1105
Repeated Infections with Respiratory Syncytial Virus. Marc Beem .................................................................................. 1115
Antibodies against Staphylococcal Teichoic Acids and Type-Specific Antigens in Man. Harry Daugherty, R. Russell Martin and Arthur White ................................................................. 1123
Neutralization of Different Murine Interferons by Antibody. M. Bozacea and K. Paucker .................................................................................. 1130
The Effect of Kaolin on Immunoglobulins: An Improved Technique to Remove the Nonspecific Serum Inhibitor of Reovirus Hemagglutination. John J. Mann, Roger D. Rosser, James R. Lehrich and Julius A. Kasel .................................................................................. 1136
Skin Sensitizing Antibodies: A Comparative Study of Canine and Human PK and PCA Antibodies and a Canine Myeloma Protein. John H. Rockey and Robert M. Schwartzman .................................................................................. 1143
Systemic Tuberculin Sensitivity in Mice. I. Factors Contributing to Active Tuberculin Shock. Shou-Hwa Han and Russell S. Weiser ................................................................. 1152
Systemic Tuberculin Sensitivity in Mice. II. Hypothermia as an Indicator of Tuberculin Shock in Actively and Passively Sensitized Mice. Shou-Hwa Han and Russell S. Weiser .................................................................................. 1158
Systemic Tuberculin Sensitivity in Mice. III. The Effects of Adrenalectomy and Treatment with Antianaphylactic Agents. Shou-Hwa Han and Russell S. Weiser .................................................................................. 1163
Characteristics of Direct and Indirect Complement-Fixing Antibodies Obtained from Turkeys Infected with Ornithosis Agent. Gordon R. Dreesman, Albert A. Benedict and R. W. Moore .................................................................................. 1167
Rabbit Antibodies Induced by Calf Thymus Histone-Serum Albumin Complexes. Ann. L. Sandberg, Maurice Liss and B. David Stollar .................................................................................. 1182
Structural Characteristics of Hemolytic Antibodies as Determined by the Effects of Ionizing Radiation. Wendell F. Rosse, Herbert J. Rapp and Tibor Borsos.......................... 1190
Factors Affecting the Degree of Nonspecific Staining Given by Fluorescein Isothiocyanate Labeled Globulins. G. Ann Herbert, Bertie Pittman and William B. Cherry............................... 1204
Experimental Streptococcal Glomerulonephritis in Rats. Lois H. Lindberg, Kenneth L. Vosti and Sidney Raffel.............................................................................. 1231
Antigenic and Immunogenic Studies on Purified Tetanus Toxoid. P. A. Nielsen, F. B. Ablondi, M. V. Querry, Cecilia Gussoni and M. S. Cooper........................................... 1248
Characterization of Hamster Antibody Reacting with Papovavirus SV40 Tumor Antigen. Satvir S. Tevethia................................................................. 1257
Duration of Immunity to Tuberculosis in Mice Vaccinated Intravenously with Oil-Treated Cell Walls of Mycobacterium bovis Strain BCG. R. L. Anacker, W. R. Barclay, W. Brehmer, C. L. Larson and E. Ribi................................................................. 1265
The Effect of Antigen on the Rate of Guanosine-5'-P Incorporation by Lymphocytes. Lewis W. Mayron and Peter Baram........................................................................ 1274
A Tissue Hemadsorption Inhibition Neutralization Test for Rubella Antibody. Ray Murphy, George J. Scheff and Richard A. Morrissey........................................... 1286
Antigenic Analysis of a Metazoan Parasite, Toxocara canis. II. Purification and Analysis of Two Antigenic Components. Edward L. Jeska............................................... 1290
Infectivity Assay of Reoviruses: Comparison of Immunofluorescent Cell Count and Plaque Methods. Mary E. McClain, Rex S. Spendlove and Edwin H. Lennette.................................................. 1301
Adaptive Immunity to Intracellular Infection. J. K. Frenkel......................................................................................................................... 1309
The Incidence of HI Antibody to Influenza Virus A2/Singapore/1/57 in Individuals of Blood Groups A and O. C. W. Potter and G. C. Schild........................................... 1320
Antibody Production by Mice Repopulated with Limited Numbers of Clones of Lymphoid Cell Precursors. J. Trentin, N. Wolf, V. Cheng, W. Fahlberg, D. Weiss and R. Bonhag........ 1326
