CONTENTS

Number 2, February 1967

Immunochemical Studies on Delayed and Arthus-Type Hypersensitivity Reactions. I. The Relationship between Antigenic Determinant Size and Antibody Combining Site Size. Stuart F. Schlossman and Herbert Levine ........................................................ 211
Candida Precipitins. William H. Chew and Thomas L. Theus ........................................ 220
Studies on the Radiosensitive Phase of the Primary Antibody Response in Rabbits. I. The Role of the Macrophage. James F. Pribnow and Myron S. Silverman ................................................... 225
Suppression by Antihistamine of Passive Cutaneous Anaphylaxis Produced with Anaphylactic Antibody in the Guinea Pig. Henry Z. Movat, Nancy L. Di Lorenzo, Norton S. Taichman, Sam Berger and Howard Stein .................................................. 230
Synthetic Polypeptide Metabolism. III. Degradation and Organ Localization of Isomeric Synthetic Polypeptide Antigens. Charles B. Carpenter, Thomas J. Gill, III and L. T. Mann, Jr. ........................................ 236
An Antigen Common to Mouse Cells and Salmonella typhimurium. William Boyle ............. 256
Studies on the Specificity of the Cellular Infiltrate of Delayed Hypersensitivity Reactions. Stanley Cohen, Robert M. McCluskey and Baruj Benacerraf .................................................. 269
Application of the Paired Label Radioantibody Technique to Tissue Sections and Cell Smears. Nobuyuki Tanigaki, Yasuo Yagi and David Pressman .............................................................. 274
Antibodies against Human Leukemia Cell Lines. Nobuyuki Tanigaki, Yasuo Yagi, George E. Moore and David Pressman .............................................................. 281
Interaction of Penicillin and Erythrocytes. Alan S. Josephson and Allan P. Kaplan .......... 293
Papain Fragmentation of the Subunits of Human Macroglobulin. Kaoru Onoue, Tadamitsu Kishimoto and Yuichi Yamamura .............................................................. 303
Differentiation of Arboviruses by Immunoelectrophoresis. Raúl R. Caudrado and Jordi Casals ...... 314
Estradiol-Induced Wasting Syndrome in Neonatal Mice. Richard W. Reilly, John S. Thompson, Robert K. Bielski and Charles D. Severson .................................................. 321
The Effect of Estrogenic Hormones on Immune Responses in Normal and Irradiated Mice. John S. Thompson, Margaret K. Crawford, Richard W. Reilly and Charles D. Severson .................................................. 331
Detection of Immune Response against Synthetic Polymers of Amino Acids Employing the Plaque-Forming Cell System. I. Reaction with Sheep Erythrocytes Coated with Polymer. Patricia Walsh, Paul Maurer and Marianne Egan .................................................. 344
Effect of Anticoagulants on Delayed Hypersensitivity Reactions. Stanley Cohen, Baruj Benacerraf, Robert M. McCluskey and Zoltan Ovary .................................................. 351
Thermostable Brain-Specific Autoantigen. Felix Milgrom, Z. Maide Tuggae, Walter Campbell and Erneet Witebsky .................................................. 359
The Lectins of Maclura pomifera: Zymographic Studies, Distribution in the Developing Plant and Production in Tissue Cultures of Epicotyls. J. M. Jones, L. P. Cawley and G. W. Teresa ... 364
Antibody Response of Rhesus Monkeys to a Density Gradient Purified Murine Leukemia Virus (Rauscher). Louis R. Sibel, Mary Alexander Fink, Carol L. McCune and Carolyn A. Cowles .... 368
Physicochemical and Immunologic Properties of Eluates Containing I-125 Anti-Rho(D). Susie W. Fong and S. P. Masouresidi .................................................. 374
Similarities between Rabbit Antibodies Produced following Ingestion of Bovine Serum Albumin and following Parenteral Immunization. Richard M. Rothberg, Sumner C. Kraft and Richard S. Farr .................................................. 386
Studies Concerning the Importance of Mononuclear Cells in the Development of Experimental Hepatitis. F. Scheiffarth, H. Warnatz and K. Mayer .................................................. 396
Autoradiographic Experiments Concerning the Importance of Mononuclear Cells in Experimental Hepatitis. H. Warnatz, F. Scheiffarth, F. Wolf and H. J. Schmidt .......................................................... 402

Announcement. A Summer Course in Immunology ........................................................................ 406

Suppression of the Primary and Secondary Immune Response of the Mouse by Phytohemagglutinin. Federico Spreafico and Edwin M. Lerner, II ........................................................................ 407

The Relationship between Maternal Rh0 Antibody Combining Properties and Severity of Erythroblastosis. Harold S. Goodman, L. Masaitis and G. Mizera ........................................................................ 425

Immunologic Unresponsiveness to Allergic Thyroiditis in Guinea Pigs. S. B. Salvin and H.-L. Liauw .................................................................................... 432

Termination of Acquired Tolerance by Administration of Small Lymphocytes. A. Michael Denman, Thomas L. Vischer and Peter Stastny ........................................................................ 442

Role of the Thymus in Tolerance. V. Suppressive Effect of Treatment with Nonaggregated and Aggregated Bovine γ-Globulin on Specific Immune Responses in Normal Adult Rats. Igal Gery and Byron H. Waksman ........................................................................ 446

The Binding of Naturally Occurring Anti-B Isohemagglutinins to the B Antigens of Human Erythrocytes. Mary B. Gibbs and Hermilio A. Toro ........................................................................ 461

The Alteration of Endotoxin by Postheparin Plasma and Its Purified Fractions. II. Relationship of the Endotoxin Detoxifying Activity of Euglobulin from Postheparin Plasma to Lipoprotein Lipase. Duane R. Schultz and Elmer L. Becker ........................................................................ 482

Allergen-Binding Activity of γE, γG and γA Antibodies in Sera from Atopic Patients: In Vitro Measurements of Reaginic Antibody. Kimishige Ishizaka, Teruko Ishizaka and Margaret M. Hornbrook ........................................................................ 490

An Effect upon the Regulation of Gene Expression: Allotype Suppression at the α Locus in Heterozygous Offspring of Immunized Rabbits. Rose Mage, Gwendolyn O. Young and Sheldon Dry ........................................................................ 502

Antibody Responses in Experimental Infections with Listeria monocytogenes. A. S. Armstrong and C. P. Sword ........................................................................ 510

The Nature of C-Reactive Protein in Acute Phase Serum: Evidence for an Equilibrium Form Containing A Mucopolysaccharide of Serum. Y. Hokama, Monroe K. Coleman and Richard F. Riley ........................................................................ 521

The Immunologic Properties and Identity of Mucopolysaccharides Associated with C-Reactive Protein in Acute Phase Human Serum. Y. Hokama, Monroe K. Coleman and Richard F. Riley ........................................................................ 529

Synthesis of Human Immunoglobulins in Germinal Centers of Lymphoid Organs. Pierre Burtin and Denise Buffe ........................................................................ 536

Immunochemical Study of Influenza Virus and Associated Host Tissue Components. Calderon Howe, Lucille T. Lee, Arild Harboe and Gunnar Haukenes ........................................................................ 543

Heterogeneity and Sequence of Appearance of Rabbit Antibodies to Hog Intrinsic Factor. I. Michael Samloff and Eugene V. Barnett ........................................................................ 558

Antigenic Analysis of an N-Terminal Fragment of a Type K Bence Jones Protein. Margaret Tan and Wallace Epstein ........................................................................ 568

Anti-Pasteurella pestis Factor from Mice and Guinea Pigs. II. Some Chemical and Physical Characteristics. Daniel M. Eisler, Beverly Hill, Eleanor K. von Metz, Wei-Jen Chang and Robert J. Heckly ........................................................................ 576

Enhanced Immunologic Sensitization of Mice by the Simultaneous Injection of Antigen and Specific Antiserum. III. The Role of Antigen in Controlling the Immune Response Elicited with Immune Complexes. Geronimo Terres and Sherie Leaver Morrison ........................................................................ 584

Nonspecific Agglutination of Tanned Sheep Erythrocytes by Heat-Inactivated Mouse Serum Collected from Diluted Blood. J. Munoz ........................................................................ 593

The X-Y-Z Scheme of Immunoocyte Maturation. II. The Effect of Antigen on Spontaneous Escape from Immune Paralysis. Stanley J. Dowden and Eli E. Sercarz.............................. 827
The X-Y-Z Scheme of Immunoocyte Maturation. III. Early IgM Memory and the Nature of the Memory Cell. Eli E. Sercarz and Vera S. Byers................................................................. 836
Uptake by Mononuclear Phagocytes of Protein-Coated Bentonite Particles Stabilized with a Carbodiimide. Robert R. Carpenter and Petronilo B. Barsales................................. 844
An Alteration of Secreted Immunoglobulin in Serum. Eckeart Kölsch.................................. 854
Changes in Subcellular and Circulating Antibody Levels during the Hemolysin Response in Rabbits. Susan E. Chapman and Dieter H. Suedendorf................................................ 860
Subgroups of L Type Bence-Jones Proteins. A. Ruffilli and C. Baglioni..................................... 874
Histocompatibility and Tumor Virus Antigens Identified on Cells Grown in Tissue Culture by Means of the Mixed Hemadsorption Reaction. Rolf F. Barth, J. Åke Esmark and Astrid Fagraeus................................................................. 888
Hypersensitivity to Ascaris Antigens. I. Skin-Sensitizing Activity of Serum Fractions from Guinea Pigs Sensitized to Crude Extracts. Gill Streján and Dan H. Campbell.............................. 893
Protein Conjugates of Polysaccharide from Cryptococcus neoformans. Mayer B. Goren and Gardner M. Middlebrook................................................................. 901
Experimental Murine Cryptococcosis: Effect of Hyperimmunization to Capsular Polysaccharide. Mayer B. Goren.................................................................................. 914
Canine Immunoglobulins. II. Antibody Activities in Six Immunoglobulin Classes. John S. Johnson, John H. Vaughan and Scott N. Swisher.............................. 935
A Serologic Study of Herpesvirus Hominis Strains by Microneutralization Tests. Frank P. Pauls and Walter R. Dowdle......................................................... 941
Further Studies on Effect of Endotoxin on Antibody Response of Rabbit to Common Antigen of Enterobacteriaceae. H. Y. Whang and E. Neter.............................................. 948
Precipitation and Neutralization of Bacteriophage f2 by Rabbit Antibodies. David T. Rowlands, Jr................................................. 958
Antibody Content of Single Antibody-Forming Cells. Kengo Horibata and Jonathan W. Uhr......................................................... 972
The Presence of Antibody to Chikungunya and Other Serologically Related Viruses in the Sera of Sub-Human Primate Imports to the United States. V. R. Harrison, J. D. Marshall and N. B. Guilloud......................................................... 979
Immune Hemolysis: An Inter-Species Study. William D. Linscott............................................ 991
Preparative Purification of Lung-Localizing Rabbit Anti-Rat Lung Antibodies in Vitro. Osamu Tsuzuku, Yasuo Yagi and David Pressman ............................................... 1004
Suppression of the Tuberculin Reaction by High Concentrations of Tuberculin and the Relationship of this Phenomenon to the Potency Assay of Tuberculin. Harold Baer and Robert W. Kolb...................................................................................... 1015
The Immune Response to Human γG-Immunoglobulin in Rabbits Unresponsive to Fe Fragment and H Chain Protein. Hans L. Spiegelberg and William O. Weigle ........................................................... 1020
Changes in the Concentrations of the γc-Globulin and the γG-Globulin of Bovine Cerebrospinal Fluid with Maturation. Catherine F. C. MacPherson ........................................................... 1039
Immunity to the 6C3HED Ascites Tumor following Treatment of Tumor-Bearing Mice with Escherichia coli L-Asparaginase. Morton D. Prager, Joseph Roberts and Nicholas Bachynsky ........................................................... 1045
Isolation of Rat Lung Antigens Capable of Neutralizing Localizing Activity of Anti-Lung Antibodies. Osamu Tsuzuku, Yasuo Yagi and David Pressman ........................................................... 1053
Antibody Responses of Rhesus (Macaca mulatta) Monkeys Experimentally Infected with Coxsackieviruses of Group B and Group A, Type 9. II. Heterotypic Antibody Responses to Echoviruses, Polioviruses and Reovirus Type 1. Nathalie J. Schmidt, Juanita Dennis and Edwin H. Lennette ........................................................... 1060
Immunochromeproperties of Fe Fragment of Rabbit γG-Globulin. Kenneth Amiraian, Lillian Duchna and James Purcell ........................................................... 1067
Antibody and Gland Studies in Cortisone and ACTH-Injected Birds. Bruce Glick ........................................................... 1076
Response and Specificity of Anti-Shigella Rabbit Antibody. T. Tsuchiya, Y. Fukazawa, T. Shinoda and T. Okoshi ........................................................... 1085

The Behavior of Autologous Thyroglobulin in the Circulation of Rabbits Immunized with Either Heterologous or Altered Homologous Thyroglobulin. William O. Weigle and Gloria J. High. ........................................................... 1105
Repeated Infections with Respiratory Syncytial Virus. Marc Beem ........................................................... 1115
Antibodies against Staphylococcal Teichoic Acids and Type-Specific Antigens in Man. Harry Daugherty, R. Russell Martin and Arthur White ........................................................... 1123
Neutralization of Different Murine Interferons by Antibody. M. Boxaca and K. Paucker ........................................................... 1130
The Effect of Kaolin on Immunoglobulins: An Improved Technique to Remove the Nonspecific Serum Inhibitor of Reovirus Hemagglutination. John J. Mann, Roger D. Rossen, James R. Lehric and Julius A. Kasel ........................................................... 1136
Systemic Tuberculin Sensitivity in Mice. I. Factors Contributing to Active Tuberculin Shock. Shou-Hwa Han and Russell S. Weiser ........................................................... 1152
Systemic Tuberculin Sensitivity in Mice. II. Hypothermia as an Indicator of Tuberculin Shock in Actively and Passively Sensitized Mice. Shou-Hwa Han and Russell S. Weiser ........................................................... 1158
Systemic Tuberculin Sensitivity in Mice. III. The Effects of Adrenalectomy and Treatment with Antianaphylactic Agents. Shou-Hwa Han and Russell S. Weiser ........................................................... 1163
Characteristics of Direct and Indirect Complement-Fixing Antibodies Obtained from Turkeys Infected with Ornithosis Agent. Gordon R. Dreesman, Albert A. Benedict and R. W. Moore. ........................................................... 1167
Rabbit Antibodies Induced by Calf Thymus Histone-Serum Albumin Complexes. Ann. L. Sandberg, Maurice Liss and B. David Stollar ........................................................... 1182
Structural Characteristics of Hemolytic Antibodies as Determined by the Effects of Ionizing Radiation. Wendell F. Rosse, Herbert J. Rapp and Tibor Borsos.......................... 1190

Factors Affecting the Degree of Nonspecific Staining Given by Fluorescein Isothiocyanate Labeled Globulins. G. Ann Herbert, Bertie Pittman and William B. Cherry....................... 1204

Studies on the Neutralization of Japanese Encephalitis Virus. I. Application of Kinetic Neutralization to the Measurement of the Neutralizing Potency of Antiserum. Yoshikatsu Ozaki and Kanafu Tabeyi............................................................ 1218

Experimental Streptococcal Glomerulonephritis in Rats. Lois H. Lindberg, Kenneth L. Vosti and Sidney Raffel......................................................................................... 1231

Antigenic and Immunogenic Studies on Purified Tetanus Toxoid. P. A. Nielsen, F. B. Ablondi, M. V. Querry, Cecilia Gussoni and M. S. Cooper................................. 1248

Characterization of Hamster Antibody Reacting with Papovavirus SV40 Tumor Antigen. Satvir S. Tevethia ......................................................................................... 1257

Duration of Immunity to Tuberculosis in Mice Vaccinated Intravenously with Oil-Treated Cell Walls of Mycobacterium bovis Strain BCG. R. L. Anacker, W. R. Barclay, W. Brehmer, C. L. Larson and E. Ribi................................................................. 1265

The Effect of Antigen on the Rate of Guanosine-8-C14 Incorporation by Lymphocytes. Lewis W. Mayron and Peter Baram........................................................................ 1274

A Tissue Hemadsorption Inhibition Neutralization Test for Rubella Antibody. Ray Murphy, George J. Scheff and Richard A. Morrissey........................................ 1286

Antigenic Analysis of a Metazoan Parasite, Toxocara canis. II. Purification and Analysis of Two Antigenic Components. Edward L. Jeska................................. 1290

Infectivity Assay of Reoviruses: Comparison of Immunofluorescent Cell Count and Plaque Methods. Mary E. McClain, Rex S. Spendlove and Edwin H. Lennette 1301

Adoptive Immunity to Intracellular Infection. J. K. Frenkel.................................. 1309

The Incidence of HI Antibody to Influenza Virus A2/Singapore/1/57 in Individuals of Blood Groups A and O. C. W. Potter and G. C. Schild................................. 1320

Antibody Production by Mice Repopulated with Limited Numbers of Clones of Lymphoid Cell Precursors. J. Trentin, N. Wolf, V. Cheng, W. Fahlberg, D. Weiss and R. Bonhag..... 1326
